Project Acronym	ResC4EU
Project Title	Resilient Supply Chains for Europe
Project No.:	101137643
Project Start date	01 January 2024
Project duration	36 months

Deliverable No.	D8.3
Deliverable Title	First Report on Communication and Dissemination Activities completed in M12 (original M9)
Work Package/Task	WP8 / Task 8.1
Deliverable Type	R – Document
Dissemination level	Public
Version No.	1.2 (submitted)
Version Date	15 May 2025

Deliverable Lead	Scaberia AS
Lead Responsible	Frank Schmull
Contributing Partners	AID, ATIM, CU, FHG, GTW, ISL, LITC, MCN, PKTK
Contributing Authors	Dr. Ulrike H. Lueder (SCA)
Due month/date	M9/ 30 Sep'24
Submission date	M17/ 15 May'25

Public	Public, fully open, automatically published by EC as download in CORDIS ResC4EU project's page & published by ResC4EU Consortium as download on ResC4EU website
Confidential	Confidential or sensitive, only for members of the ResC4EU Consortium (including the Commission Services)

ATIM:	Advanced Technologies in Manufacturing Cluster
CU:	Composites United e.V.
FHG:	Fraunhofer Institute for Casting, Composite and Process Technology
GTW:	GreenTwin GmbH
ISL:	Institute of Shipping Economics and Logistics
LITC:	Latvian Information Technology Cluster
MCN:	Maritime Cluster Northern Germany e.V.
PKTK:	Polish Cluster of Composite Technologies
SCA:	Scaberia AS

1 Executive Summary

This document is Deliverable **D8.3 First Report on Communication and Dissemination Activities completed in M12** of the EU-funded ResC4EU project. It provides an overview of all communication and dissemination activities performed by the ResC4EU consortium to effectively promote the project and its results in the first year (M1-M12) of the ResC4EU project.

The first year of the project focussed on the development of the project's branding, the project website, and to build-up a strong social media presence.

The first pack of valuable and quality communication materials and tools comprised ResC4EU brochure, ResC4EU roll-up, ResC4EU PowerPoint presentation, Template for ResC4EU Deliverable reports, Template for ResC4EU PowerPoint presentations, and an excel tool for collecting and reporting communication and dissemination activities.

All consortium partners, in particular the ResC4EU Clusters, have used the first communication pack to raise initial awareness about the ResC4EU project and planned support for SMEs among their members and beyond.

ResC4EU was mentioned in **at least 36 media articles** in the international press and presented at **34 events** targeting the **industry, SMEs and citizens** - most of which were organised by the ResC4EU Cluster partners and their networks. Through the media articles, an estimated **54,000 people** were reached, with an additional **5,950 people** reached through the events. Initial **policy engagement activities** have taken place.

Outstanding is also ResC4EU social media presence. A total of **18 dedicated LinkedIn news** were created and published by SCA, generating an impressive **358,653 impressions** and an outstanding **average engagement rate of 53,53%**. An effective multiplier effect was created by utilising the partners own LinkedIn accounts for reposts.

By M12, the ResC4EU LinkedIn account had **651 followers**, with 340 gained during the first seven months (M3-M9) after its launch. The magic '500 followers' was reached in November 2024, following major LinkedIn posts about the 'Three days in Krakow events' and KOMPOZYT EXPO activities.

In summary, the interim **key performance indicators (see section 10, page 96)** have been reached and our communication strategic approach as presented in D8.2 Dissemination and Communication Plan was a great success.

2 Introduction

2.1 Purpose of this document

The purpose of this document is to present the deliverable **D8.3 First Report on Communication and Dissemination Activities** of the ResC4EU project in the first year (M1-M12). Please note that D8.3 was originally only covering M1-M9 but was extended to M12 to cover a whole year.

2.2 Document structure

The main part of the document covers:

- **Deliverable and Milestones (section 3):** A summary of all planned and achieved deliverables and milestones related to communication and dissemination activities during the first project year (M1-M12).
- **Communication Materials & Project Visual ID in Year 1 (section 4):** An overview of all communication materials produced in the first project year (M1-M12).
- **Digital Communication in Year 1 (section 5):** An overview of activities on the ResC4EU website and ResC4EU social media channels during the first project year (M1-M12).
- **Articles – Media Publications in Year 1 (section 6):** An overview of press releases and media articles published in the first project year (M1-M12).
- **Articles – Scientific Publications in Year 1 (section 7):** An overview of peer-reviewed scientific publications and other scientific publications in the first project year (M1-M12).
- **Events – Targeting Industry, SMEs & Citizens in Year 1 (section 8):** An overview of industry fairs, conferences, and meetings where ResC4EU was presented in the first project year (M1-M12).
- **Events – Targeting Research Communities and Policy Engagement in Year 1 (section 9):** An overview of scientific and policy-related events (e.g. conferences) where ResC4EU was presented in the first project year (M1-M12).
- **Key Performance Indicators (KPIs) achieved in Year 1 (section 10):** An Executive summary of communication and dissemination KPIs achieved in the first project year (M1-M12).
- **ANNEXES (section 11):** Supporting materials including ResC4EU branding, ResC4EU communication materials, ResC4EU website snapshots, ResC4EU LinkedIn news posts, all published articles, and records of events participation during the first project year (M1-M12).

2.3 Targeted group

This report is intended for use by the ResC4EU Consortium partners to comply with the contractual obligations of the Grant Agreement: to ensure the visibility of EU funding, to report all communication and dissemination activities carried out during the project, and to maximise the outreach and impact of project results, particularly among SMEs.

This document is public.

3 Deliverables and Milestones in Year 1 (M1-M12)

Table 1 and 2 below presents a list of deliverables and milestones related to communication and dissemination activities planned and achieved in the first year (M1-M12) of the ResC4EU project.

Table 1: Deliverables – planned and completed in M12.

Del. no	Del. name	Lead	Type	Diss. level	Due Month	Status
D8.1	Project Website, Social Media Launch, First Communication Pack and Guide	SCA	DEC	PU	M2 29 Feb'24	Submitted M4, 30 apr'24
D8.2	Dissemination and Communication Plan	SCA	Docu- ment	PU	M6 30 Jun'24	Submitted M13, 31 jan'25
D8.3	First Report on Communication and Dissemination Activities completed in M9	SCA	Report	PU	M9 30 Sep'24	This report.

D: Deliverable; DEC: Website, etc.; PU: Public.

Table 2: Milestones – planned and achieved in M12.

MS no	Del. name	Lead	Means of verification	Due Month	Status
MS 1	Website and Social media presence	SCA	Project presentation available and functional; Invitations to join cluster activities via social media.	M2 29 Feb'24	100% achieved, M3, 4 mar'24. Website & LinkedIn online since 4 mar'24

MS: Milestone.

Deliverable D8.1 Project Website, Social Media Launch, First Communication Pack and Guide (submitted M3, March 4, 2024) describes the development of the project's branding (ResC4EU logo, ResC4EU brand book), the ResC4EU website, the ResC4EU social media account, and the creation of the first communication pack, and guidelines for their use. The first pack of high-quality communication materials and tools includes ResC4EU brochure, ResC4EU roll-up banner, ResC4EU PowerPoint presentation, Template for ResC4EU deliverable reports, Template for ResC4EU PowerPoint presentations, as well as an Excel tool for collecting and reporting communication and dissemination activities.

Deliverable D8.2 Dissemination and Communication Plan (submitted M13, January 31, 2025) outlines the overarching communication and dissemination strategy, including objectives, phases, target audiences, and communication channels. It details the planned activities for the entire project duration, including a timeline for implementation and key performance indicators (KPIs) to measure their effectiveness.

This report is **deliverable D8.3 First Report on Communication and Dissemination Activities completed in M12 (originally M9)**. Please note that we have extended the reporting period from M9 to M12 to have a close year of all cluster activities to enable a better planning for the upcoming two years to reach a total of 100+ cluster events.

4 Communication Materials & Project Visual ID in Year 1 (M1-M12)

These are materials for the use by all project partners that will carry the visual identity of the project.

All communication materials were made available for downloading at the ResC4EU website and at the ResC4EU's project repository.

Annex 11.1 shows the communication materials designed and produced by SCA.

4.1 ResC4EU Logo

A ResC4EU logo suite was designed as part of the project visual ID (for details, see *Deliverable D8.1 Project Website, Social Media Launch & First Communication Pack and Guide*).

4.2 ResC4EU Brand book

A Brand Book describing the visual project ID including the ResC4EU logo suite was created by SCA as guideline for all communication materials and tools (for details, see *Deliverable D8.1 Project Website, Social Media Launch & First Communication Pack and Guide*).

4.3 ResC4EU Roll-up

A first eye-catching roll-up banner was designed by SCA for the use at events to increase ResC4EU's visibility and attract SMEs.

4.4 ResC4EU Brochure

A brochure was designed and created by SCA to raise awareness what the ResC4EU project is about (objectives, targeted SMEs, support to be offered to SMEs, benefits for SMEs, project partners) and for distribution at events or by email to inform and attract potential SMEs.

4.5 ResC4EU Project presentation

A short project presentation (eleven slides) was produced by SCA introducing the ResC4EU project to begin communicating about the purpose of the project (objectives, targeted SMEs, support to be offered to SMEs, benefits for SMEs, project partners) and for the use at events to inform and attract potential SMEs.

4.6 ResC4EU Template for Deliverable reports

A word template for the creation of deliverable reports was created by SCA.

4.7 ResC4EU Template for PowerPoint presentations

A template (PowerPoint) for the creation of presentations at internal and external meetings was created by SCA.

4.8 Summary of Communication Activities (M1-M12) – Communication materials

Table 3 summaries all communication activities done related to the creation of the ResC4EU Project Visual ID and branding in the period M1 to M12 of the ResC4EU project in line with the online reporting scheme in the EU Tender Portal for reporting communication activities.

Table 3: Communication Activities (M1-M12) - List of Communication materials produced (for reporting in EU portal, see also Annex 11.1)

N o	Ty pe	Communication Activity Name (max. 50 characters with spaces)	Part icipant	Description (max. 500 characters with spaces)	Web Link	Who? Targeted audience (select 1 or more)	How? Communic ation Channel (select only 1)	Outcome (max. 200 characters with spaces) – specific KPIs	Status
1	C O M	ResC4EU Logo suite, Project visual ID	SCA (FS)	ResC4EU Logo suite is available for downloading at the ResC4EU Website since 17 Apr'24. <u>Designer:</u> - External consultant for basic design and SCA for logo suite. <u>Activities:</u> - Create ResC4EU project visual ID and branding.	https://www.resc4eu.com	1. Industry, business partners 2. Innovators 8. Citizens 10. Specific end user communities (clusters/associa.) 12. Other (media)	5. 3	C O M	ResC4EU Rollup, Project visibility ID	SCA (FS)	ResC4EU Rollup is available for downloading at the ResC4EU website since 17 Apr'24. This is an eye-catching roll-up banner designed for the use at events to increase ResC4EU's visibility and attract SMEs. <u>Designer:</u>	https://www.resc4eu.com	1. Industry, business partners 2. Innovators 8. Citizens 10. Specific end user communities (clusters/associa.)	7. Print materials (rollup)	Used by all project partners on various exhibitions and events	2. Deliver ed

				- SCA (FS, UL) <u>Activities:</u> - Create ResC4EU project visual ID and branding (particularly the eye-catching photo and orange highlighted tagline) - Promote ResC4EU through own project rollup.		12. Other (media)			
4	C O M	ResC4EU Brochure, Project Introduction	SCA (FS, UL)	ResC4EU Brochure is available since 17 Apr'24. Designed to raise awareness what the ResC4EU project is about (objectives, targeted SMEs, support to be offered to SMEs, benefits for SMEs, project partners) and for distribution at events or by email to inform and attract potential SMEs. <u>Designer & author:</u> - SCA (FS, UL) <u>Activities:</u> - Inform about ResC4EU project - Promote ResC4EU through own project brochure.	https://www.resc4eu.com	1. Industry, business partners 2. Innovators 8. Citizens 10. Specific end user communities (clusters/associa.) 12. Other (media)	7. Print materials (rollup)	Distributed by all project partners on various exhibitions and events	2. Delivered
5	C O M	ResC4EU Presentation, Project Introduction	SCA (FS, UL)	ResC4EU Presentation is available since 17 Apr'24. A short project presentation (eleven slides) has been produced introducing the ResC4EU project to begin communicating about the purpose of the project (objectives, targeted SMEs, support to be offered to SMEs, benefits for SMEs, project partners) and for the use at events to inform and attract potential SMEs. <u>Designer & author:</u> - SCA (FS, UL) <u>Activities:</u> - Inform about ResC4EU project - Promote ResC4EU through own project brochure.	https://www.resc4eu.com	1. Industry, business partners 2. Innovators 8. Citizens 10. Specific end user communities (clusters/associa.) 12. Other (media)	5. Other (power point presentation)	Used by all project partners on various exhibitions and events	2. Delivered

6	C O M	ResC4EU Template for deliverables, Project visual ID	SCA (FS, UL)	ResC4EU Template (word) for producing the deliverable reports of the ResC4EU project is available for downloading at the ResC4EU Website since 17 Apr'24. <u>Designer & Author:</u> - SCA (FS, UL). <u>Activities:</u> - Create ResC4EU project visual ID and branding.	https://www.resc4eu.com	1. Industry, business partners 2. Innovators 8. Citizens 10. Specific end user communities (clusters/associa.) 12. Other (media)	5. Other (template)	Used by all project partners for following deliverables: D1.1, D1.2, D1.3, D1.4, D3.1, D8.1.	2. Delivered
7	C O M	ResC4EU Template for presentation, Project visual ID	SCA (FS, UL)	ResC4EU Template (power point) for producing power point presentations is available for downloading at the ResC4EU Website since 17 Apr'24. <u>Designer & Author:</u> - SCA (FS, UL). <u>Activities:</u> - Create ResC4EU project visual ID and branding.	https://www.resc4eu.com	1. Industry, business partners 2. Innovators 8. Citizens 10. Specific end user communities (clusters/associa.) 12. Other (media)	5. Other (template)	Used by all project partners at various occasions: General Assembly meetings (GAM), Monthly Project meetings (Jour Fixe), team meetings, workshops.	2. Delivered

5 Digital communication in Year 1 (M1-M12)

Digital communication typically refers to media that use digital platforms, like websites, social media, email, and other internet-based channels.

5.1 ResC4EU Project Website

The ResC4EU project website (<https://www.resc4eu.com>) has been online since March 4, 2024 (M3) and is hosted and managed, with content creation by Scaberia AS (SCA).

A detailed description of the website was included in Deliverable **D8.1 Project Website, Social Media Launch, First Communication Pack and Guide** (public, SCA).

Annex 11.2.1 shows some photos of the ResC4EU project website design.

The website serves as the project's primary platform for a broad audience access to information and updates about ResC4EU. It is periodically updated with the latest news, events, and public documents for downloading.

As listed in **Table 4**, by M12 (31.12.2024) 13 publicly available documents has been available for download, and 9 news have been published.

Table 4: ResC4EU Project Website – Updates in Year 1 (M1-M12).

Website analytics

The ResC4EU project website is monitored by Mateo Analytics, which provides insights into its reach and engagement with targeted audiences.

Table 5 summarises the key performance parameters for success (KPIs) of the ResC4EU project website, from its launch on March 7, 2024 (M3), through December 31, 2024 (M12).

Table 5: ResC4EU Project Website – planned and achieved KPIs in Year 1 (M1-M12).

Channel	Indicator	Target for M12 (31 Dec'24)	Actual achieved M12 (31 Dec'24)	Status
ResC4EU Project Website	Number of Visits	500+	2,121	100% achieved
	Number of Page views	---	4,127	---
	Number of Unique page views	---	3,160	---
	Number of Downloads	30+	134	100% achieved
	Number of Unique downloads	---	112	---

By M12, the ResC4EU website recorded **2,121 visits**, including 1,447 visits during the first seven months of its launch (M3-M9).

Most visits originated from **Germany (24.3%)**, both globally and within Europe, followed by the USA (15.7%), Brazil (5.8%), Ireland (5.3%), Austria (5.1%), Latvia (4.4%), Poland (4.3%), the Netherlands (3.9%), and Spain (3.1%) (see **Table 6** with Mateo Analytics details).

However, the majority of visits (1,407 or 66.3%) were based in Europe.

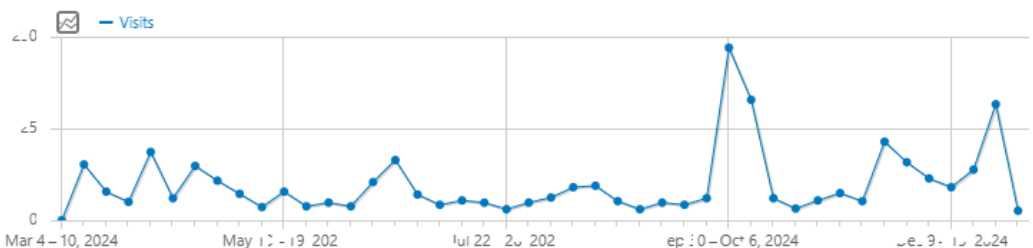

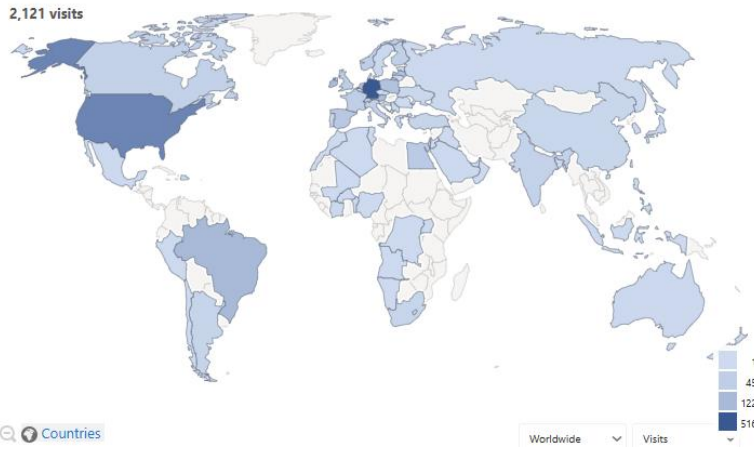

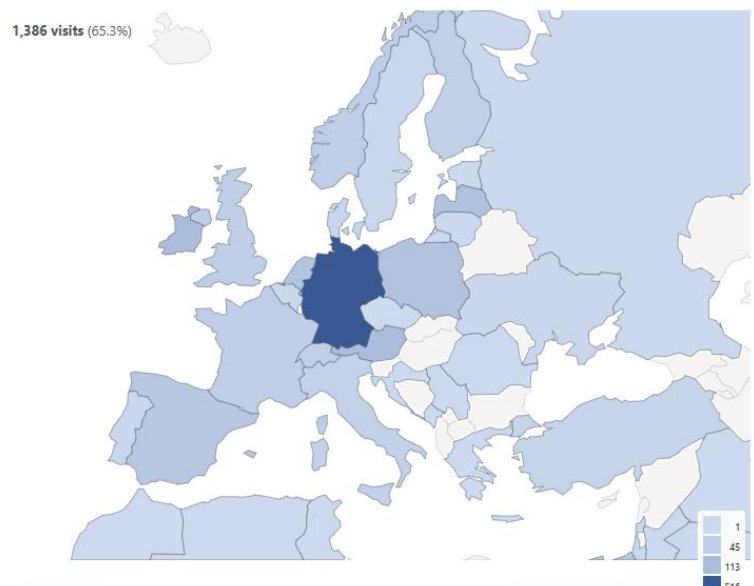

By M12, the website recorded **4,127 page views**, including 3,008 page views during the first seven months after its launch (M3-M9).

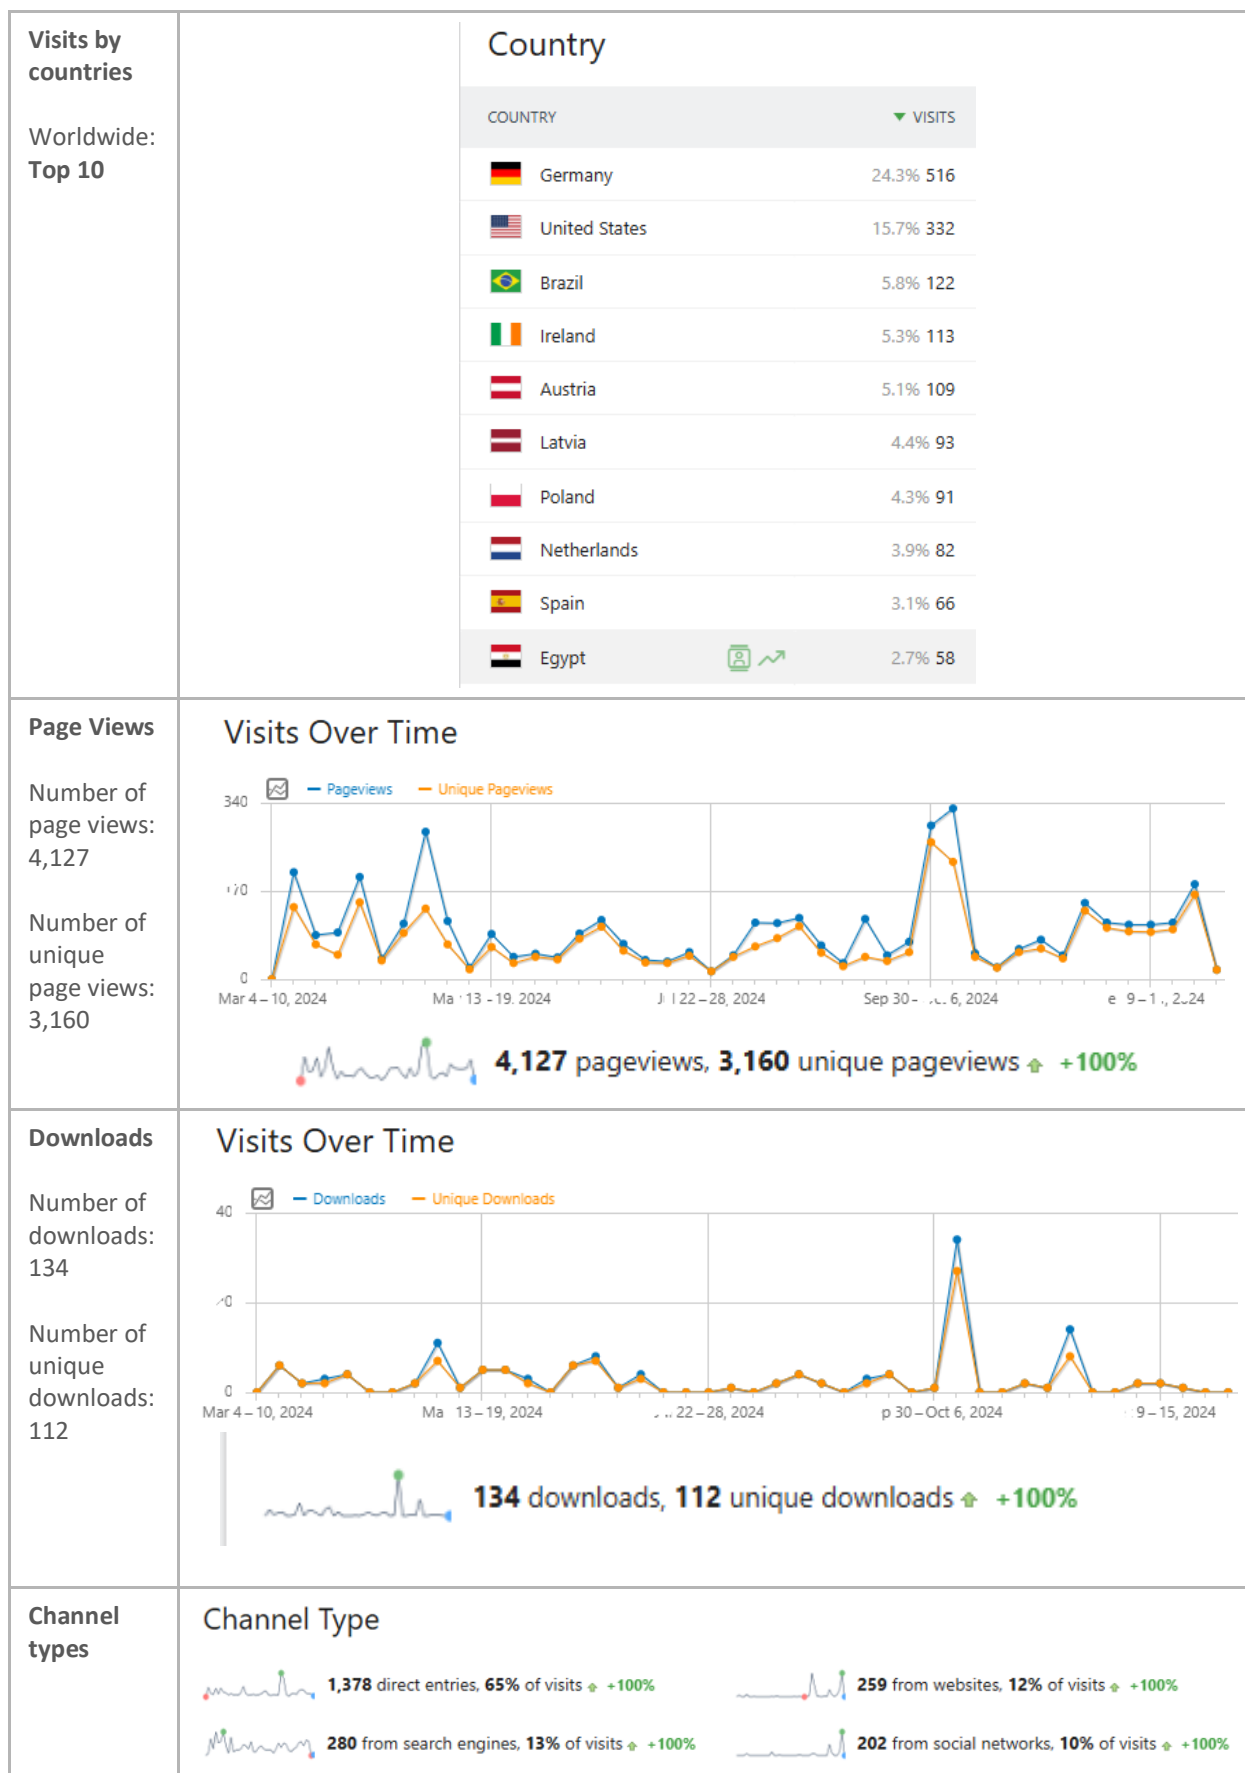

By M12, the website also recorded **134 downloads**, including 101 downloads during the first seven months after its launch (M3-M9).

Regarding the channel types, the **majority of visits (65%) came directly** to the website, 13% from search engines, 12% from other websites, and 10% from social networks (LinkedIn).

There was a clear correlation between the major ResC4EU project communication activities and the impact on website visits.

Table 6: ResC4EU Project Website – Mateo Analytics (M3-M12).

Website KPIs	Matao Analytics
Number of visits: 2,121	Visits Over Time 
Visits by countries Worldwide: Top 1 Germany	Visitor Map 2,121 visits 
Visits by countries Europe: Top 1 Germany	Visitor Map 1,386 visits (65.3%) 

5.2 ResC4EU Social Media presence

The ResC4EU LinkedIn account (<https://www.linkedin.com/company/resc4eu>) has been online since March 4, 2024 (M3), hosted and managed with content creation by Scaberia AS (SCA).

The goal is to build a ResC4EU community with 1000+ followers on LinkedIn, progressively growing by the end of the project and to drive traffic to the ResC4EU website while promoting the project's activities.

In 2024, the social media presence has been used to share compelling messages to raise awareness of the project, stimulating engagement of the stakeholders, and facilitate rapid communication, such as the presentation of ResC4EU at international fairs and conferences.

LinkedIn Analytics

The ResC4EU LinkedIn account is monitored by LinkedIn Analytics, which provides insights into its reach and engagement with targeted audiences.

Table 7 summarises the key performance indicators (KPIs) of our ResC4EU LinkedIn account from its launch on March 4, 2024 (M3), to December 31, 2024 (M12).

Table 7: ResC4EU Social Media presence – planned and achieved KPIs in Year 1 (M1-M12).

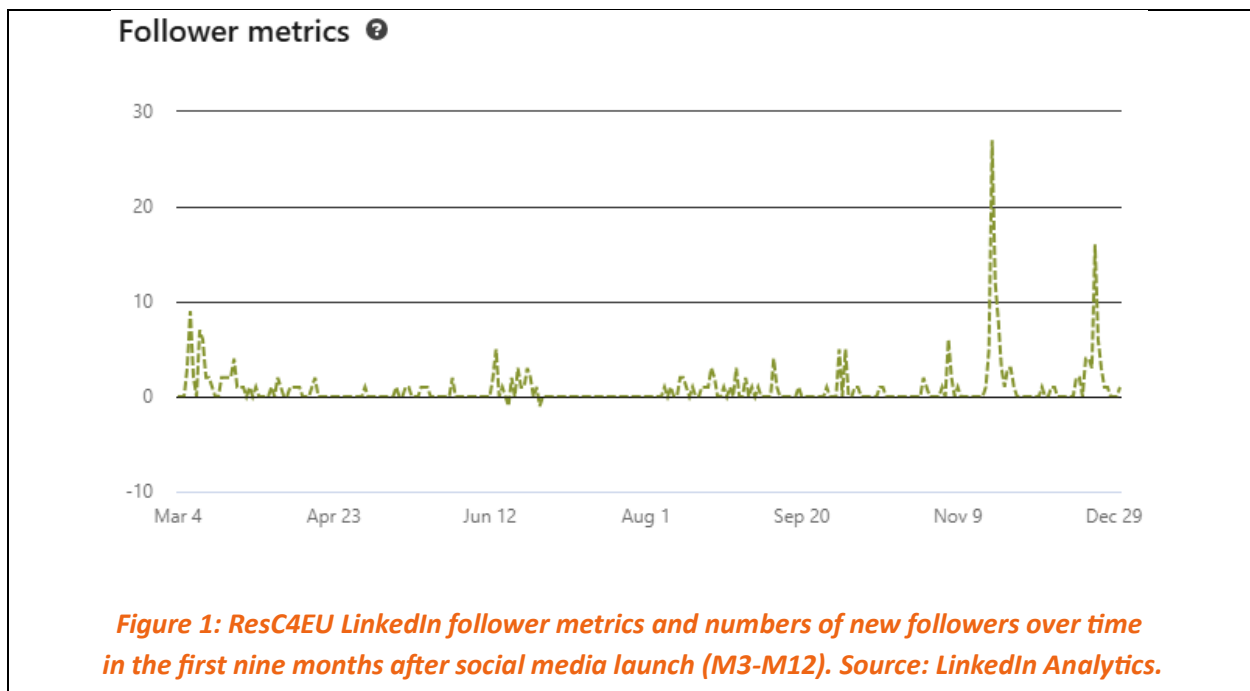

Channel	Indicator	Target for M12 (31 Dec'24)	Actual achieved M12 (31 Dec'24)	Actual achieved Status (%)
ResC4EU LinkedIn account	Number of followers	250+	651	100% achieved
	Number of posts	---	18	---
	Number of impressions	---	358,653	---
	Number of reactions	---	913	---
	Number of Engagements	---	6,701	---
	Engagement rate	---	53,53 % in average	---

A total of **18 posts** were created and published by SCA, generating an impressive **358,653 impressions** and an outstanding **average engagement rate of 53,53%**.

By M12, the ResC4EU LinkedIn account had **651 followers**, with 340 gained during the first seven months (M3-M9) after its launch. The magic '500 followers' was reached in November 2024, following major LinkedIn posts about the 'Three days in Krakow events' and KOMPOZYT EXPO activities.

More details are provided below.

Figure 1 shows the **follower metrics** and the number of new followers over time on ResC4EU's LinkedIn account during the period from M3 to M23 (Mar-Dec'24).

The top followers in Europe are from the following regions:

- **Germany** (Greater areas of Bremen, Munich, Hamburg, Rostock, Berlin, Dresden),
- **Spain** (Greater areas of Valencia, Barcelona, Malaga, Madrid, Vigo),
- **Portugal** (Greater areas of Lisbon, Porto, Leiria),
- **Poland** (Greater areas of Krakow, Warsaw),
- **Ireland** (Greater area of Dublin, Athlone, Galway),
- **UK** (Greater area of London),
- **Italy** (Greater areas of Milan, Rome, Turin, Latina),
- **Turkey** (Greater areas of Istanbul, Ankara),
- **Norway** (Greater area of Oslo),
- **France** (Greater area of Paris).

Table 8 lists the ResC4EU LinkedIn posts published in 2024 along with their **content engagement metrics**. A total of **18 ResC4EU LinkedIn posts** were created and published by SCA, with the highest impressions and engagements generated by posts related to 'SMM24' and 'Three days in Krakow with the KOMPOZYT EXPO'.

Additionally, SCA made 29 reposts, which are not accounted by the LinkedIn Analytics for the ResC4EU account.

Annex 11.2.2 shows the ResC4EU LinkedIn posts written and published by our Communication Manager, Frank Schmull (Scaberia AS), during the period from M3 to M12 (4 Mar'24 – 31 Dec'24).

Table 8: ResC4EU Social Media presence (M1-M12) – List of ResC4EU LinkedIn News.

No	ResC4EU LinkedIn news /post No.	Timing	Impressions	Engagements	Engagement rate	Reposts

	TOTAL M3-M12		358,653	6,701	53,53 % in average	117

All project partners promoted actively the ResC4EU LinkedIn posts (produced by SCA) by **reposting** them through their own social media channels which created a reach out of another 28,320 LinkedIn followers as listed in **Table 9** and/or simply through ‘likes’ and ‘comments’.

Table 9: ResC4EU Social Media presence (M1-M12) – Multipliers.

Channel	Type	LinkedIn Followers by M12	Re-posts of ResC4EU LinkedIn posts by M12
AID	ResC4EU Cluster partner	5,397	11 (+ 10 by employees)
ATIM	ResC4EU Cluster partner	1,366	2
CU	ResC4EU Cluster partner	6,616	2 (+ 2 by employees)
LITC	ResC4EU Cluster partner	1,506	7
MCN	ResC4EU Cluster partner	6,305	0 (+7 by employees)
PKTK	ResC4EU Cluster partner	739	0 (+8 by employees)
ISL	ResC4EU RTO partner	1,758	4
FHG (IGCV)	ResC4EU RTO partner	6,003	1
GTW	ResC4EU SME partner	92	5 (+1 by employee)
SCA	ResC4EU SME partner	296	16 (+26 by employees)
	TOTAL M1-M12	28,320	48 (102)

In addition, ResC4EU Cluster partners have produced own LinkedIn posts to address directly their cluster members in their mother tongue, but also to report about their own events (see Table 10).

Table 10: ResC4EU Social Media presence (M1-M12) – Partner's own posts.

Channel	Type	LinkedIn Followers by M12	Partner's own LinkedIn posts by M12
AID	ResC4EU Cluster partner	5,397	0
ATIM	ResC4EU Cluster partner	1,366	2
CU	ResC4EU Cluster partner	6,616	3
LITC	ResC4EU Cluster partner	1,506	2
MCN	ResC4EU Cluster partner	6,305	3 (+ 1 by employees)
PKTK	ResC4EU Cluster partner	739	5
ISL	ResC4EU RTO partner	1,758	0
FHG (IGCV)	ResC4EU RTO partner	6,003	1
GTW	ResC4EU SME partner	92	6
SCA	ResC4EU SME partner	296	5
	TOTAL M1-M12	28,320	32 (33)

5.3 ResC4EU Videos

By M12, SCA has produced two promotional videos for LinkedIn:

1. 'Three Days in Krakow' with the Grand Opening of the ResC4EU Platform at the KOMPOZYT EXPO
2. 'Merry Christmas from the ResC4EU Team'

which have gained great impressions (see **Table 8:** No.17, No.18). The 'Three Days in Krakow' video gained 6,147 views (ResC4E LinkedIn statistic).

More promotional videos introducing the project and the upcoming SME support programme are planned from M13 onwards when available.

5.4 Summary of Communication activities (M1-M12) – ResC4EU Website

Table 11 summaries all digital communication activities related to the ResC4EU Website done in the period M1 to M12 of the ResC4EU project in line with the online reporting scheme in the EU Tender Portal for reporting communication activities.

5.5 Summary of Communication activities (M1-M12) – ResC4EU LinkedIn News

Table 12 summaries all digital communication activities related to the ResC4EU LinkedIn account done in the period M1 to M12 of the ResC4EU project in line with the online reporting scheme in the EU Tender Portal for reporting communication activities.

Table 11: Communication Activities (M1-M12) - ResC4EU Website reach out (for reporting in EU portal, see also Annex 11.2.1)

6 Articles – Media articles in Year 1 (M1-M12)

This section lists all articles published targeting industry, SMEs and the public. This includes press releases, media articles about ResC4EU in both national and international press, as well as media articles distributed through the ResC4EU cluster's own communication channels (e.g. cluster's magazines or newsletters).

An **estimated 54,000 people** have been reached in Europe, particularly in Germany, Poland, Spain, Latvia and Ireland with focus on industry and SMEs across all 14 targeted industry sectors as well as citizen in Europe and globally.

6.1 Press releases and Articles in the PRESS

The ResC4EU project has produced and launched two press releases by M12 (see **Table 13**).

Table 13: ResC4EU Press releases (M1-M12)

No	Press release title	Published	Issued by	see
1	International Consortium Launches Initiative to support EU businesses to Enhance Resilient Supply Chains for Europe	09 Mar'24	ResC4EU/ Scaberia AS	Annex 11.3.1
2	Grand opening of the ResC4EU platform to support companies withstanding supply chain disruptions	30 Sep'24	ResC4EU/ Scaberia AS	Annex 11.3.2

Press release analysis

The press releases have been a great success and led to significant visibility for the ResC4EU project, the European collaboration, and the EU funding received, both in Europe and globally. **Table 14** lists, for each press release, the press response as well as media articles and newsletters published by consortium partners.

By M12, **32 individual media outlets** have been reached, and more than 32 media articles have been published in the press with news about the ResC4EU project and the launch of the ResC4EU Platform.

The first press release received significant attention from German media, particular in business news and tech news. For example:

- Business Portal Norway, (online portal, Germany, Norway)
- Idw Nachrichten (online portal, Germany)
- Vwi - Verband Deutscher Wirtschaftsingenieure (Germany)
- LOGISTIK HEUTE (online magazine, Germany)
- Industry.zero & Transformation (online magazine)
- Kooperation International (online portal published by BMBF, a German governmental institution)
- TEXTINATION (online magazine, Germany)
- Midlands Ireland website (online news, Ireland)

The second press release received significant attention from European and global media, including business news, tech news, and daily news. For example:

- KOMPOZYT EXPO® press, Poland, Europe
- World Insiders, Tech news, global
- Eastern Tribunal, Tech news, Europe
- Frontal Report, Tech news, Europe
- Asialogue, Tech news, Asia
- Daily Tech Geek, Tech news, Europe
- Financial Capital, Business news, Europe
- Financial Metrics, Business news, Europe
- BENZINA, Business news, Europe
- eTradeWire, Business news, Europe
- Digital Journal, Daily news, Europe
- DPN-Digital Press Network, Daily news, Europe
- Boston Chron, Daily news, US
- The Chronicle Journal, Daily news, US

	promoting the ResC4EU project and the ResC4EU platform (B2B marketplace).
Regions reached	Europe and global.
Stakeholder reached	Citizen, industry, SMEs (manufacturing, supplier, supply chain, tech-savvy SMEs) and research communities.
Est. number of persons reached	Estimated 39,000 people reached
More info	Details and reach out of each publication are listed in Table 16 and 17 and the published articles are show in Annex 11.4.2 .

6.2 Other Media articles

In total, additional 6 media articles were produced by the ResC4EU consortium partners as listed in **Table 16 (section 6.5)**.

Four articles were published in their own digital and printed magazines to reach out specific to their industry members:

- **DIARIO DIGITAL Actualidad AIDIMME** (online portal, publisher is AIDIMME, in Spanish)
- **kompozty.net** (online portal, publisher is PKTK, in Polish)
- **Lightweight, Composite Magazine** (printed magazine, publisher is PKTK, in English & Polish).

Two articles were published in other media:

- **Business News** (online portal of Mediaplanet, Ireland)
- **KOMPOZYT EXPO press** (online portal, publisher is KOMPOZYT EXPO, in Polish and English)

Details and reach out of each publication are listed in **Table 16** and the published news are shown in **Annex 11.4.3**.

6.3 Newsletters

In addition to the media articles, the ResC4EU clusters, published **16 newsletters or news** via their own organisation websites to reach out to their industry members, and particularly to their member SMEs. But also, the other project partners contributed with news.

Table 15: ResC4EU Newsletters/News by Project partners in M1-M12.

Channel	Type	Number of Newsletters/News published by project partners
AID	ResC4EU Cluster partner	0
ATIM	ResC4EU Cluster partner	1
CU	ResC4EU Cluster partner	3
LITC	ResC4EU Cluster partner	6

MCN	ResC4EU Cluster partner	1
PKTK	ResC4EU Cluster partner	3
	TOTAL - Cluster	14
ISL	ResC4EU RTO partner	4
FHG	ResC4EU RTO partner	1
GTW	ResC4EU SME partner	1
SCA	ResC4EU SME partner	1
	TOTAL - Other	7

Details and reach out of each publication are listed in **Table 17** and the published news are shown in **Annex 11.5**.

6.4 Radio and TV promotion

A highlight was that ATIM was invited to participate in a radio show to talk about the ResC4EU project:

- **Midlands 103 Talking about business show** (radio show, Ireland)

Details and reach out of each publication are listed in **Table 18** and the published news are shown in **Annex 11.6**.

6.5 Summary of Communication activities (M1-M12) – ResC4EU’s media articles published

Table 16 summaries all traditional media activities related to non-scientific publications (media articles and newsletters) done in the period M1 to M12 of the ResC4EU project in line with the online reporting scheme in the EU Tender Portal for reporting communication activities. **Table 17** lists Newsletters. **Table 18** lists Radio and TV promotion.

Table 16: Communication Activities (M1-M12) - List of ResC4EU Media articles published (online or printed) (for reporting in EU portal)

No	Type	Communication Activity Name (max. 50 characters with spaces)	Participant	Description (max. 500 characters with spaces)	Who? Targeted audience (select 1 or more)	How? Communication Channel (select 1)	Outcome (max. 200 characters with spaces) – specific KPIs	Status

7 Articles- Scientific Publications in Year 1 (M1-M12)

At this stage, no scientific publications have been published.

8 Events – Targeting Industry, SMEs & Citizens in Year 1 (M1-M12)

In the first year of the project, ResC4EU was actively presented on **34 events** targeting industry, SMEs & citizens and a total of **about 5950 people** has been reached directly.

The ResC4EU project was showcased at selected trade fairs, exhibitions, conferences, meetings, seminars, and workshops. More details can be found below.

8.1 On Events – International Trade fairs: Exhibitions

In year 1 (M1-M12) of the project, ResC4EU has been presented at **8 international trade-fairs** (see **Table 20**) covering the targeted 14 industry sectors, where ResC4EU cluster partners – AID, CU, PKTK, MCN – regularly participate with their own booths as an exhibitor, showcases and conference contributions.

At the booths, the ResC4EU roll-ups were used to make ResC4EU visible and encourage networking activities with targeted industries and SMEs (manufacturing SMEs, supplier SMEs, supply chain SMEs, tech-savvy SMEs). However, these exhibitions were also a valuable opportunity to engage with policy makers, such as national and regional authorities.

Table 20: ResC4EU on EVENTS – Trade fair Exhibitions in M1- M12

ResC4EU on Events	Exhibitions on international and national trade fairs
Trade fairs: Exhibitions	<p>Exhibitions where ResC4EU Cluster partners (i.e. AID, CU, LITC, PKTK, MCN) participated with their own booths and promoted the ResC4EU project using roll-ups, brochures and through B2B discussions with booth visitors (order by date):</p> <p><u>International trade fairs featuring ResC4EU exhibitions:</u></p> <ol style="list-style-type: none"> GLOBAL INDUSTRIE, Paris, France, 25-28 Mar'24. Global exhibition, cross-sectoral, PKTK booth. Hannover Messe, Hannover, Germany, 22-26 Apr'24. Global exhibition, cross-sectoral, FHG booth. FIMMA + MADERALIA 2024, Valencia, Spain, 14-17 Mar'24. Global exhibition, construction, AID booth. SMM24, Hamburg, Germany, 3-6 Sep'24. Global exhibition, waterborne transport, MCN booth. Feria Hábitat Valencia (FHaV) 2024, Valencia, Spain, 20 Sep-3 Oct'24. Global exhibition, construction, hospitality, textile, AID booth. Riga COMM 2024, Riga, Latvia, 3-4 Oct'24. International exhibition, digital, electronics, cybersecurity, LITC booth. KOMPOZYT-EXPO®, Krakow, Poland, 16-17 Oct'24. International exhibition, cross-sectoral, PKTK booth. JEC Forum DACH, Stuttgart, Germany, 24 Oct'24. International exhibition, cross-sectoral, CU booth. <p><u>National trade fairs featuring ResC4EU exhibitions:</u></p>

	1. ---
Trade fairs: Exhibitions	Exhibitions where other ResC4EU partners (i.e. FHG) participated with their own booths and promoted the ResC4EU project using roll-ups, brochures and through B2B discussions with booth visitors (order by date): <u>International trade fairs featuring ResC4EU exhibitions:</u> 1. Hannover Messe , Hannover, Germany, 22-26 Apr'24. Global exhibition, cross-sectoral, FHG booth. <u>National trade fairs featuring ResC4EU exhibitions:</u> 2. ---
Number of Exhibitions	9 exhibitions in total - 8 organised by ResC4EU Clusters , and 1 organised by other ResC4EU project partners (e.g. FHG) through their own booths at international trade fairs. All exhibitions aimed to promote the ResC4EU project and foster engagement with SMEs.
Regions reached	Europe, in particular Germany, Spain, Latvia, Poland, and France. But also, globally in North America and Asia-Pacific.
Stakeholders reached	Citizens, industry, SMEs (manufacturing, supplier, supply chain, tech-savvy SMEs), innovators, but also regional authorities.
Est. number of people reached	4100 people directly reached
More info	Details of each trade fair, activities done, and reach out are listed in Table 23 and photos are shown in Annex 12 .

8.2 On Events – International Trade fairs: Conferences

Wherever appropriate, ResC4EU was presented during the accompanying conference programmes of the exhibitions listed in 8.1, through presentations, panel discussions, networking events or similar aimed to promote the ResC4EU project and foster engagement with SMEs (**see Table 21**).

Table 21: ResC4EU on EVENTS – Trade fair Conferences etc. in M1- M12

ResC4EU on Events	Events (conference, meeting, workshop, internet debate, round table, group discussion, etc.)
Trade fairs: Conferences, meetings, workshops, etc.	Besides the exhibitions listed in section 8.1, ResC4EU Cluster partners (i.e. MCN, PKTK) organised various events to further promote the ResC4EU project through presentations, panel discussions and networking activities as part of the accompanying conference programmes (order by date): <u>International trade fairs – Conferences etc.:</u> SMM24, Hamburg, Germany, 3-6 Sep'24. 1. MCN event “Reception for Northern German Ministers and Senators ” , 4 Sep'24 organised by MCN with ResC4EU presentation (monitor) by MCN and participation by SCA and ISL.

	<p>2. MCN event “Blaue Stunde”, 5 Sep’24 organised by MCN with ResC4EU presentation (roll-up) by MCN and participation by SCA and ISL. KOMPOZYT-EXPO®, Krakow, Poland, 16-17 Oct’24:</p> <p>3. PKTK Workshop “Innovations in Composites and SME support through EU projects and Clusters “ organised by PKTK with ResC4EU presentation (power point) by CU, ResC4EU model (flyer) by ISL, FHG and participation by AID, LITC, MCN, GTW, SCA, ISL, FHG</p> <p>4. PKTK Expert debate: “Collaboration as key to building resilient supply chains in the advanced composite material sector”. organised by PKTK with CU as panellist and participation by AID, LITC, MCN, GTW, SCA, ISL, FHG.</p> <p>5. PKTK Ceremony: “Launch of the ResC4EU Platform” organised by PKTK and SCA with contributions from PKTK, SCA, GTW, AID, ISL, FHG, CU.</p> <p><u>National trade fairs – Conferences etc.:</u></p> <p>1. ---</p>
Number of Events	5 events in total (workshop, panel discussion, B2B networking meetings) organised by ResC4EU Clusters promoting the ResC4EU project, engagement with SMEs and its first result – the ResC4EU platform (B2B marketplace)
Regions reached	Europe, in particular Germany and Poland
Stakeholders reached	Citizens, industry, SMEs (manufacturing, supplier, supply chain, tech-savvy SMEs), innovators, but also regional authorities
Est. number of people reached	550 people directly reached
More info	Details of each event activities done and reach out are listed in Table 23 and photos are shown in Annex 12 .

8.3 On Events – Conferences, meetings, workshops, etc.

Additional, events organised by the ResC4EU Cluster partners (AID, ATIM, CU, LITC, MCN, PKTK) and their networks (see **Table 22**) - as part of their regular cluster activities and member engagement (e.g. seminars, meetings, workshops, round tables or similar events, held either in person or online) - were used by the clusters to raise awareness about the ResC4EU project and the opportunity for SMEs to participate in the ResC4EU SME Support Programme.

Table 22: ResC4EU on EVENTS – Conferences, meetings, workshops, round tables etc. organised by ResC4EU Clusters, their Networks or Others in M1- M12

ResC4EU on Events	Events (conference, meeting, workshop, internet debate, round table, group discussion, etc.)
Organised by ResC4EU Clusters (AID, ATIM, CU, LITC, MCN, PKTK)	<p>List of events organised by ResC4EU Clusters as part of their regular cluster activities and member engagement, where the ResC4EU project was promoted using the ResC4EU roll-up banner, presentations, and B2B discussions with participants (order by date):</p> <ol style="list-style-type: none"> GreenOffshoreTech Final Event, 5-6 Jun'24 Event of the EU project GreenOffshoreTech, organised by MCN with support by CU, and SCA Meeting of members of MCN, 12 Jun'24 National Meeting, organised by MCN Meeting of members of PKTK, 20 Jun'24 Meeting, organised by PKTK Basisschulung Maritime Wirtschaft, 17-18 Sep'24 MCN Event KICKSTART Digitalisation Training, 26 Sep'24 EDIH Workshop, organised by LITC Technologietag Leichtbau, 6 Nov'24 National Conference, organised by CU MCN meets Technologies@Fraunhofer, 7 Nov'24 Conference, organised by MCN New Maritime Risks – Facing the Challenges, 20 Nov'24 Conference, organised by MCN Export info webinar, 4 Dec'24 Meeting, organised by LITC Małopolska H2Connect, 12 Dec'24 National Conference, co-organised by PKTK

Other industry targeted events where ResC4EU partners participated	List of other events at which the ResC4EU project partners participated and promoted the ResC4EU project using the ResC4EU presentation, and B2B discussions to encourage participation in the ResC4EU initiative. (order by date): <ol style="list-style-type: none"> Industrias Creativas: Retos y Oportunidades, 4 Apr'24 National Conference, participated by AID European Maritime Forum, 22 Nov'24 Conference, participated by CU Biomethane and green hydrogen - production and application, 3 Dec'24 Workshop of the Polish German Chamber of Commerce, participated by PKTK
Number of Events	20 events in total (conferences, workshops, meetings, B2B networking) with 17 events organised by ResC4EU Clusters and their networks and 3 other events promoting the ResC4EU project, engagement with SMEs and its first result – the ResC4EU platform
Regions reached	Europe, in particular Germany, Poland, Latvia, and Norway.
Stakeholders reached	Citizens, industry, SMEs (manufacturing, supplier, supply chain, tech-savvy SMEs), innovators, but also regional authorities
Est. number of people reached	1300 people directly reached
More info	Details of each event activities done and reach out are listed in Table 23 and photos are shown in Annex 12 .

8.4 On Events - Special events organised by the ResC4EU Clusters including Alliance building

In 2024, ResC4EU has been highly active in initiating contact with other EU-funded projects, other EU-funded projects and external industrial cluster organisations to explore collaborations and joint communication and dissemination activities. These efforts were led by ResC4EU Communication and Dissemination Manager (FS, SCA) and the ResC4EU Coordinator (TvR, CU).

Collaborations with Other EU-Funded Projects

ResC4EU initiated collaborations and joint activities with two cluster-facilitated EU projects aimed at supporting SMEs. These efforts began as early as Month 6 of the project and leveraged existing networks:

- **GreenOffshoreTech (H2020)** - a cluster-facilitated EU INNOSUP project providing cascade funding to SMEs, supporting a total of 83 SMEs.
 - Website: <https://greenoffshoretech.com>
 - Contact initiated by SCA.
 - SCA, CU and MCN were also project partners in GreenOffshoreTech.
 - ResC4EU was invited to present at GreenOffshoreTech's 2-day Final Event in Hamburg, Germany (5-6 June 2024), which featured an Investor Round on Day 1 and an Innovation Award competition on Day 2 with 30 supported SMEs from 7 countries pitching their innovations.
 - GreenOffshoreTech Communication Manager supported ResC4EU LinkedIn campaigns.
- **AMULET (H2020)** – A sister INNOSUP project to GreenOffshoreTech, also offering cascade funding and supporting around 30 SMEs.
 - Website: <https://amulet-h2020.eu>
 - Contact initiated by SCA.
 - PKTK severed as an ambassador cluster for AMULET.
 - Joined communication activities were conducted during AMULET's 2-day Final Event held at KOMPOZYT®EXPO in Krakow, Poland, organised by PKTK, SCA and CU.

Clustering Activities with Sister projects

ResC4EU also collaborated with its sister projects under Cluster 4 “Digital, Industry and Space” of the Horizon Europe Framework Programme (HORIZON), specifically within the topic HORIZON-CL4-2023-RESILIENCE-01-42 (Boosting generation and diffusion of advanced technologies in SMEs based on a supply chain model):

- **IDEALIST**, <https://www.idealproject.eu/>
- **RISE-SMEs**, <https://rise-sme.eu>
- **BRIDGESMEs**, <https://bridgesmes.eu>

Two alignment meetings were held in 2024 (e.g. 16 Dec'24) to exchange insights and explore potential joint activities with these projects.

Collaborations with External Industrial Cluster Organisations

ResC4EU also established collaborations with external industrial cluster organisations that have support the project:

- Necia AS (Norway) - Coordinator of GreenOffshoreTech
- FORUM OCEANO (Portugal) - Communication Manager of GreenOffshoreTech
- Bayern Innovativ, Cluster Mechatronik & Automation (Germany)
- Waste Management and Recycling Cluster (Poland)

8.5 Summary of Communication and Dissemination activities (M1-M12) – ResC4EU on Events

Table 23 summaries all communication activities related to events targeting industry, SMEs and citizens done in the period M1 to M12 of the ResC4EU project in line with the online reporting scheme in the EU Tender Portal for reporting communication activities.

Table 24 summaries all dissemination activities related to events targeting industry, SMEs and citizens done in the period M1 to M12 of the ResC4EU project in line with the online reporting scheme in the EU Tender Portal for reporting dissemination activities.

Table 23: Communication Activities (M1-M12) - List of all Events and Stakeholders reached in 2024 (for reporting in EU portal)

(Orange: organised by ResC4EU Clusters, Blue: organised by their Networks, Grey: others)

N o	T Y p e	Communication Activity Name (max. 50 characters with spaces)	Partic ipant s	Description (max. 500 characters with spaces)	Who? Targeted audience (select 1 or more)	How? Communicat ion Channel (select 1)	Outcome (max. 200 characters with spaces) – specific KPIs	Statu s
	A	Events - International Trade fairs with Exhibitions & accompanying Conferences, meetings, round tables, etc.						
1	C O M	GLOBAL INDUSTRIE , Paris, France, Mar'24, 25-28.	PKTK (AC, MC)	GLOBAL INDUSTRIE. International fair for industry leaders with 34,000 visitors and 2,300 exhibitors from 85 countries, with: 1) MIDEST: Industrial Cooperation; 2) SMART INDUSTRIES: industry 4.0, 3) INDUSTRIE: industrial equipment 4) TOLEXPO: metal industry <u>Participants:</u> - PKTK (AC, MC) <u>Activities:</u> - Promotion of ResC4EU (presentation) at PKTK booth and B2B talks with booth visitors <u>Web Link:</u> https://www.gl-events.com/en/global-industrie-2024 https://kompozyty.net/targi-global-industrie-2024/	1. Industry, business partners 2. Innovators 8. Citizens	Exhibition (global)	Reached: 1. Persons: Est. 500. 2. SMEs: Est. 300, manufacturing, supplier, supply chain, tech-savvy 3. Industries: Cross-sectoral: 6 sectors (1,3,5,6,7,8) 4. Regions: Europe, global	Deliv ered
2	C O M	Hannover Messe , Hannover, Germany, Apr'24, 22-26.	FHG (CG)	Hannover Messe International trade fair for industrial technology where industries showcase the latest advancements in manufacturing, engineering, automation, and digital technologies. Focus on industry 4.0, robotics, AI in manufacturing, renewable energy technologies, cutting-edge logistics and supply chain management solutions etc. <u>Participants:</u> - FHG (CG) <u>Activities:</u>	1. Industry, business partners 2. Innovators 8. Citizens	Exhibition (global)	Reached: 1. Persons: Est. 100. 2. SMEs: Est. 50, manufacturing, supplier, supply chain, tech-savvy 3. Industries: Cross-sectoral: All targeted 14 sectors. 4. Regions: Europe, global	Deliv ered

				- Promotion of ResC4EU at FHG booth using ResC4EU brochure and engaging in B2B discussions with booths visitors. <u>Web Link:</u> https://www.hannovermesse.de				
3	C O M	FIMMA + MADERALIA 2024 , Valencia, Spain, May'24, 14-17	AID (DI, CR)	International trade fair for furniture manufacturing industries with 440 exhibitors from 25 countries and 927 brands, on 72,000 m2 exhibition area combining two fair events: 1) FIMMA for Machinery and Tools for Woodworking and 2) ADERALIA for Suppliers. <u>Participants:</u> - AID <u>Activities:</u> - Promotion of ResC4EU project at the AID booth (ResC4EU rollup, ResC4EU TV promotion) and engaging in B2B discussions with booths visitors. <u>Web Link:</u> https://fimma-maderalia.feriavalencia.com	1. Industry, business partners 2. Innovators 8. Citizens	Exhibition (global)	Reached: 1. Persons: Est. 50. 2. SMEs: Est. 45, manufacturing, supplier, supply chain 3. Industries: 4 sectors (3, 12, 13, 14) across furniture manufacturing 4. Regions: Europe, global	Delivered
4	C O M	SMM24 , Hamburg, Germany, Sept'24, 3-6	MCN (OB, JW)	SMM (Shipbuilding, Machinery & Marine Technology) is the premier global trade fair for the maritime industry, drawing over 40,000 participants and more than 2,000 exhibitors from 120 nations in 11 halls and across 90,000 square metres. <u>Participants:</u> - MCN (OB, JW). <u>Activities:</u> - Promotion of ResC4EU project at MCN booth using ResC4EU rollup and engaging in B2B discussions with booths visitors <u>Web Link:</u> https://www.smm-hamburg.de	1. Industry, business partners 2. Innovators 4. National authorities 5. Regional authorities 6. Local authorities 8. Citizens	Exhibition (global)	Reached: 1. Persons: Est. 300. 2. SMEs: Est. 100, manufacturing, supplier, supply chain, tech-savvy 3. Industries: 9 sectors (1,4,5,6,7,8,10,11,14) across maritime/offshore markets 4. Regions: Europe, global	Delivered

5	C O M	SMM24, Hamburg, Germany, Sept'24, 5	MCN (OB, JW)	MCN's Event on SMM2024 – Reception for Northern German Ministers and Senators. <u>Organiser:</u> - MCN <u>Participants:</u> - MCN (OB, JW), SCA (UL, FS) <u>Activities:</u> - Promotion of MCN's EU projects (ResC4E) towards regional authorities <u>Web Link:</u> https://www.maritimes-cluster.de/themen-und-projekte/messe-smm/fotorueckblick-smm-2024/	1. Industry, business partners 2. Innovators 4. National authorities 5. Regional authorities 8. Citizens	Event: meeting (networking)	Reached: 1. Persons: 150. 2. SMEs: Est. 100. manufacturing, supplier, supply chain, tech-savvy 3. Industries: 9 sectors (1,4,5,6,7,8,10,11,14) across maritime/offshore markets 4. Regions: Germany	Delivered
6	C O M	SMM24, Hamburg, Germany, Sept'24, 5	MCN (OB, JW)	MCN's Blaue Stunde – A networking gathering with invited companies, politicians, clusters and others (parallel to the exhibition). <u>Organiser:</u> - MCN <u>Participants:</u> - MCN (OB, JW), SCA (UL, FS), ISL (A, L) <u>Activities:</u> - Promotion of ResC4EU at MCN's Blaue Stunde through ResC4EU rollup and B2B talks with participants (SMEs, regional authorities, other clusters, embassies, etc.) <u>Web Link:</u> https://www.maritimes-cluster.de/maritimer-kalender/blaue-stunde-bei-der-smm-2024/	1. 10 KPIs for Communication and Dissemination activities- achieved in Year 1 (M1-M12)

To evaluate the effectiveness of the communication activities, a set of metrics was defined in accordance with the Description of Action in the Grant Agreement at project start.

Table 27 provides a non-exhaustive list of key performance indicators (KPIs) that are used to monitor and measure the communication and dissemination efforts.

Accordingly, ResC4EU is well on track and have achieved almost all of its KPIs foreseen for M12.

Table 27: KPIs for ResC4EU's Communication and Dissemination activities

(Scoring: 0%, 1-25%, 26-50%, 51-80%, 81-100%)

Channel	Key Performance Indicator (*as set in GA)	TOTAL Target	Target	Achieved	Achieved (%)

Logo Summary

The ResC4EU logo is at the core of our visual identity.

The logo consist of:

- a coloured graphic element
- the project acronym "ResC4EU"
- the logo tagline "Resilient Supply Chains for Europe"

When using the logo there are some rules to follow:

- there are only two official logo versions to be used (horizontal and vertical)
- the logo must appear in its original colours
- the colour background of the logo must be white or light grey
- the minimum space around the logo must be 5 mm and should be increased wherever possible.
- the logo must not be redrawn or altered in any way (e.g. rearranged, added by other elements, rotated, etc.).
- there is a minimum size the logo must be used

PUBLIC 11

Colour palette Main colours

- Colours are part of the ResC4EU identity.
- Main colours are blue, orange, light grey, and middle grey.
- Use RGB codes for digital media
- Use CMYK codes (32-bit) for print media

RGB code:	RGB code:	RGB code:	RGB code:

PUBLIC 13

Colour palette In summary

The ResC4EU colours are part of the brand and identify

- The corporate primary colours provide a definite, solid and professional base for the ResC4EU identity.
- The colour palette must be used consistently across all communication as flat colours and not as a gradient.
- The colours must be used when designing graphics, charts, or tables.
- Main colours are blue – orange – light grey :
 - Light grey as background
 - Light grey/blue for tables
 - Orange/blue/light grey/middle grey for graphics, charts
- Additional colours are turquoise – yellow – dark grey :
 - Turquoise/yellow/dark grey additionally for charts
- The colours are also part of the text (see below).

PUBLIC 14

Typography

- Calibri light & Calibri are the primary fonts for all ResC4EU documents.
- The font has been selected due to its compatibility with all digital and print media and IT systems (Windows, Mac).

EU emblem & EU disclaimer

In summary

The EU emblem & disclaimer are part of the brand and visual identity

- In addition to the ResC4EU logo, always display the EU emblem (European flag) & the EU disclaimer (funding statement) for the acknowledgement of EU support.
- There are only two official EU emblem versions to be used (horizontal and vertical)
- No other visual identity or EU emblem may be used to highlight the EU support.
- When displayed in with other logos (e.g. of beneficiaries or sponsors), the EU emblem must be displayed at least as prominently and visibly as the other logos.
- The EU emblem must remain distinct and separate and cannot be modified by adding other visual marks, brands or text.
- Where appropriate, the EU disclaimer should be translated into local languages.
- The acknowledgement of EU support is a contractual obligations and must be done in each communication and dissemination activities (including media relations, conferences, seminars, information material, such as brochures, leaflets, posters, presentations, etc., in electronic form, via traditional or social media, etc.) and any infrastructure, equipment, vehicles, supplies or major result funded by the ResC4EU grant.

11.1.3 ResC4EU Rollup

11.1.4 ResC4EU Brochure

Supporting EU Businesses in making their production processes and supply chains more resilient and sustainable

ResC4EU is a collaboration project and initiative funded by the European Union with 3 million Euros. It aims to support EU businesses, particularly Small and Medium sized enterprises (SMEs), in becoming more resilient and sustainable and be able to quickly adapt to supply chain disruptions such as experienced during COVID-19 crisis, geopolitical tensions or disasters (e.g. Suez Channel closure, floodings, strikes) by implementing Advanced Technologies.

ResC4EU will provide an open space for collaboration facilitated by industry associations and clusters, develop and provide digital tools that can assist SMEs in detecting and anticipating disruptions in their supply chains, and offering SMEs tailored support and training programmes. Further, manufacturing SMEs in need of implementing advanced technologies will be brought together with tech-savvy SMEs providing innovative solutions.

We support various kinds of SMEs

We support SMEs from 14 Industrial sectors across Europe

We offer 4 kinds of support to SMEs – All free of charge

1 ResC4EU Assessments	2 ResC4EU Tools	3 ResC4EU Training & Networking	4 ResC4EU Network
<ul style="list-style-type: none"> ❖ Analysing your supply chain for improvements ❖ Analysing your digital readiness for improvements 	<ul style="list-style-type: none"> ❖ ResC4EU B2B Marketplace Platform to find suitable B2B partners by offering or seeking goods or services. ❖ ResC4EU Tool to alert on supply chain disruptions & for cost-efficient decisions ❖ ResC4EU Tool for transport-related risk to find best transport route ❖ ResC4EU LCA Tool to calculate the product environmental footprint 	<ul style="list-style-type: none"> ❖ ResC4EU Events to learn about new Technologies ❖ ResC4EU Working Groups to network with tech-savvy SMEs ❖ ResC4EU B2B Matching to explore concrete collaborations ❖ ResC4EU Training to build up employees' skills ❖ ResC4EU Demonstrators to simulate the benefits of supply chain resilience and of sustainability practices 	<ul style="list-style-type: none"> ❖ 14 ResC4EU pilots (one in each sector) ❖ 6 ResC4EU Industry associations/clusters including 1 EDIH ❖ Alliances with other EU Industry clusters

What we want to achieve

A “**Resilient supply chain**” is a supply chain system that **can withstand and quickly adapt to various disruptions, challenges, or changes**, while ensuring continuity of operations and minimise disruptions to the flow of goods or services.

“**Organisational resilience**” is the capacity of an enterprise to withstand, adapt and grow (recover) in the face of turbulent changes (e.g. disruptions) to meet customer demand and target performance.

Why making Supply chains resilient?

Major benefits for EU Businesses:

- **Risk Mitigation:** Withstand disruptions in transportation, natural disasters, geopolitical tensions, or other unforeseen events.
- **Business Continuity:** Keep production running, keep continuous supply to customers, and keep revenue streams.
- **Cost Reduction:** No costs due to downtime, fines, or penalties.
- **Increased Flexibility:** Quickly adapt to changes in market conditions, customer demands, or regulations.
- **Sustainability:** Easy incorporation of sustainability practices (e.g. CO2 calculations).
- **Customer Satisfaction:** Reliable and continuous supply fosters customer satisfaction, and increase customer loyalty, retention, advocacy, and trust.
- **Competitive Advantage:** Deliver any time as promised – even in challenging times.

Who we are

ResC4EU is led by a consortium of 10 robust partners from 7 European countries. It includes six of Europe's foremost industry associations and clusters, representing over 1000 SMEs across 14 European industrial sectors. Additionally, the consortium features two SMEs specialising in inter-cluster and innovation management, as well as B2B platform development. Two research organisations specialising in logistics, supply chain risk modelling, and product life-cycle assessment complete the consortium. The ResC4EU project is coordinated by the German industry association Composites United e.V. (CU).

ResC4EU
RESILIENT SUPPLY CHAINS FOR EUROPE

Withstanding Supply Chain disruptions
& making EU Businesses more Resilient and Sustainable

How to make an Existing supply chain more resilient ?

1	Risk Assessment	Identify supply chain risks (e.g. reliance on suppliers and changes in demand)
2	Diversification	Broaden supplier network, transportation routes, and sourcing locations
3	Collaboration	Exchange information and build trust with suppliers and partners
4	Agility and Flexibility	Use agile practices like dynamic sourcing, optimised inventory, responsive production
5	Redundancy and Backups	Create backup plans for critical components, suppliers, and production facilities
6	Technology Adoption	Utilise Advanced Technologies to predict and mitigate risks and improve decision-making
7	Training and Education	Train employees on risk management, supply chain resilience, Advanced Technologies

ResC4EU
RESILIENT SUPPLY CHAINS FOR EUROPE

Withstanding Supply Chain disruptions
& making EU Businesses more Resilient and Sustainable

We support various types of SMEs

1

SMEs along the supply chain

1. Manufacturing SMEs
2. Supplier SMEs
3. Supply chain SMEs

Your benefits

- learn how to overcome supply chain challenges
- learn about benefits of Advanced Technologies
- learn what is possible to do for your business
- find suitable partners (e.g. suppliers, tech SMEs, etc.) across Europe

2

Tech-savvy SMEs

providing innovative solutions from the field of **Advanced Technologies**

such as: Artificial Intelligence (AI) and machine learning, IoT, blockchain, robotics, electronics, 3D printing, advanced materials, biotechnology, etc.

Your benefits

- offer and showcase your innovative solutions to manufacturing SMEs
- exploit new business opportunities
- expand your market potential in the EU

What we want to achieve

ResC4EU project objectives

1. **Developing tools** that can be used by manufacturing SMEs for identification and mitigation of supply chain risk and disruptions.
2. **Offering an open space** for training of manufacturing SMEs and networking with tech-savvy SMEs.
3. **Accelerating Advanced Technologies** in manufacturing SMEs.
4. **Demonstrating the benefits** of supply chain resilience while also deriving improvements in sustainability (i.e. GHGs emission reduction, energy savings, resource savings).
5. **Increasing public understanding** on resilient supply chains and advanced technologies as solutions for making EU businesses more resilient and sustainable.

The ResC4EU Project is being presented at the SMM in Hamburg between 3-6 Sep. 2024. The SMM is clearly the worlds leading trade fair and conference for the maritime industry. In 2024, it is expected that more than 40.000 participants, around 2000 exhibitors from over 120 countries will meet in Hamburg.

ResC4EU Project partners will be present at the Maritime Cluster Northern Germany (MCN) booth. In addition a get together with consortium representatives during MCNs "Blaue Stunde" is possible.

Where : Messe Hamburg, Germany

When : 3-6 Sep. 2024

Booth : Hall B6, Stand 154, Maritime Cluster Northern Germany

Event : "Blaue Stunde", 5 Sep. 2024, 16-18h CET, Hall B6, Stand 146/154

Register to "Blaue Stunde" (limited seats)

ResC4EU LinkedIn post No.6 – Text & Photos made by Scaberia AS

https://www.linkedin.com/posts/resc4eu_supplychain-supplychainoptimization-logisticsmanagement-activity-7231555566156812288-6mby/

By Frank Schmuil • 8/20/2024

The ResC4EU Consortium has met for the first time ever for the Project Kick-Off in the historic Bremen Cotton Exchange, a 150-year-old landmark for global cotton trade, jointly hosted by local consortium partners, the Institute of Shipping Economics and Logistics (ISL) and the Maritime Cluster Northern Germany e.V. (MCN).

At the first day, partners have aligned planned activities for the coming months, starting with an assessment of the needs, risks, disruptions, challenges, and opportunities for SMEs.

On the second day, the ResC4EU Consortium was invited by MCN (Bremen) for a special visit to the Bremer Town Hall (UNESCO World Heritage site) and later on to visit the leading-edge Center for Eco-efficient Materials and Technologies (ECOMAT) for lightweight constructions "Made in Bremen". At ECOMAT, the consortium met further companies and regional development agencies with presentations from Bremen Invest from the Ministry of Economic Affairs, Ports and Transport, discussing Bremen's role as an international hub for transport and logistics, ECOMAT, Bremen OHB Digital Services GmbH on IT security and software development – a company of the European space and technology group OHB headquartered in Bremen, and the Transfer Center for Optimised, Assisted, highly- automated and Autonomous Systems (TOPAS).

ResC4EU LinkedIn post No.8 – Text & Photos made by Scaberia AS

<https://www.linkedin.com/feed/update/urn:li:activity:7239353528475951105/>

By Frank Schmuil • 9/10/2024

...

The ResC4EU Project, focused on resilient supply chains for Europe, was prominently featured at the SMM 2024 in Hamburg, Germany at the booth of the Maritime Cluster Northern Germany (MCN) in Hall 6.

SMM 2024 (Shipbuilding, Machinery & Marine Technology) is the premier international trade fair for the maritime industry, drawing over 40,000 participants and more than 2,000 exhibitors from 120 nations in 11 halls and across 90,000 square metres. This year's event, hailed as the best SMM ever, showcased the latest technologies, products, and innovations in shipbuilding, propulsion systems, marine equipment, and offshore technology.

Key highlights of SMM 2024:

- Exhibition : A global showcase of cutting-edge maritime technology and innovations.
- Networking : A hub for industry leaders, engineers, and decision-makers to explore trends and future developments.
- Conferences & Workshops : Focused on sustainability, digitalization, and maritime innovation.
- Innovation : Introduction of ground breaking technologies shaping the future of the industry.

Importance of SMM 2024:

- Global Reach : A platform for international business and collaboration.
- Industry Trends : Insights into the latest maritime trends and digital transformation.
- Business Opportunities : A stage for launching products, forming partnerships, and exploring new markets.

The Maritime Cluster Northern Germany (MCN) connects maritime businesses, research institutions, and organizations across Northern Germany, including Hamburg, Schleswig-Holstein, Lower Saxony, Bremen, and Mecklenburg-Western Pomerania.

The ResC4EU Project team, along with MCN and Scaberia AS, leveraged this opportunity to engage with global representatives, gaining valuable insights into resilient supply chain challenges. MCN also hosted several networking events, such as the "Blaue Stunde," and welcomed high-level political delegations. In addition, several Winner SMEs from the EU funded [#GreenOffshoreTech](#) Project have visited the booth to get informed about ResC4EU.

In summary, SMM 2024 provided the perfect platform for the ResC4EU Project to connect with global companies, marking a significant success at what is regarded as the best SMM ever.

The ResC4EU project would like to thank the MCN for their hospitality.
Best SMM ever ...

Tag 2 auf der SMM: Ein wichtiger Empfang und spannende Begegnungen

🌞 Guten Morgen von der **SMM Hamburg**! Heute erwartet uns ein besonderer Messtag: Um 10:30 Uhr empfangen wir die Wirtschaftsminister und -senatorinnen der fünf norddeutschen Bundesländer an unserem Messestand in Halle B6, Stand 154. Dabei präsentieren wir die bundeslandübergreifenden Projekte der maritimen Wirtschaft und stellen die Gewinnerprojekte unseres Nachhaltigkeitspreises MCN Cup 2023 vor.

🌟 Besucher:innen unseres Messestandes haben heute die großartige Gelegenheit, **ITK Engineering** kennenzulernen – die Gewinner des MCN Cup in der Kategorie „Digitalisierung der maritimen Wirtschaft“. Erfahren Sie alles über ihr innovatives Projekt „VIPort – Virtueller intelligenter Hafen – Nachhaltige Energieversorgung durch Digitalisierung“ direkt vor Ort.

🌍 Darüber hinaus haben Sie die Möglichkeit, aus erster Hand mehr über die Projekte **ResC4EU** und **GreenOffshoreTech** zu erfahren. Das EU-Projekt ResC4EU zielt darauf ab, Unternehmen widerstandsfähiger gegen Störungen in der Lieferkette zu machen. Im Rahmen von GreenOffshoreTech entwickeln wir gemeinsam im europäischen Verbund nachhaltige, grüne Innovationen.

💛 Auch das MariMatch steht heute wieder auf dem Programm! Diese exklusive Networking-Veranstaltung, organisiert vom Enterprise Europe Network und weiteren Partner:innen, bringt potenzielle Geschäfts- und Forschungspartner:innen in vorbereiteten Meetings zusammen. Diese exklusive Networking-Veranstaltung zwischen Halle B1 und B2 bietet die ideale Gelegenheit, abseits des Messtrubels neue Kontakte zu knüpfen.

📖 Weitere Informationen zu unseren Aktivitäten auf der SMM finden Sie in unserem digitalen Messe-Guide: <https://lnkd.in/esPehmQ5>

Wir freuen uns darauf, Sie an unserem Messestand in Halle B6, Stand 154, zu begrüßen!

#SMM2024 #Nachhaltigkeit #MCNCup #Innovation #Networking

The ResC4EU consortium proudly announces the grand opening of its ResC4EU platform, designed to support companies in making their supply chains more resilient and sustainable at this year's KOMPOZYT-EXPO®, the 13th International Trade Fair for Composite Materials, Technologies and Products, taking place from October 16-17, 2024, in Krakow, Poland.

Visit the ResC4EU booth (D59) to meet project partners and learn more about the ResC4EU initiative, which offers a comprehensive programme of digital tools, services, training and networking opportunities. The initiative is designed to help companies - particularly small and medium sized enterprises (SMEs) - become more resilient, sustainable and better equipped to respond quickly to supply chain disruptions such as those experienced during COVID-19 pandemic or other crises (e.g. the Suez Canal, the war in Ukraine, or flooding events).

The grand opening of the ResC4EU platform will take place on the first day of the fair (16:00 CET, Main Stage). Another highlight will be the panel discussion with Dr. Tjark von Reden, CEO at Composites United (12:00 CET, stage area).

ResC4EU LinkedIn post No.13 – Text & Photos made by Scaberia AS

https://www.linkedin.com/posts/resc4eu_hadea-resc4eu-activity-7256979634532007937-2Rmu/

By Frank Schmull • 10/25/2024

Last week, the ResC4EU Consortium met in Krakow, Poland, for a 3-day event, 15-17 October 2024, full of meetings, activities and enjoying Polish hospitality organised by the Polish Cluster for Composites Technologies (PKTK) - a very special "thank you" to [Andrzej Czulak](#) and [Marta Czulak](#) and their team.

The Consortium had a very special evening and get-together dinner at the "Tawerna Wilczy Dół" restaurant in the historic old town of Krakow gathering all project partners from Austria, Germany, Ireland, Latvia, Norway, Poland and Spain and experiencing traditional Polish food on the evening before. The tavern has an amazing atmosphere inspired by "The Witcher" movie with different theme rooms. We were in the throne room and some of us tried to sit on the throne ...

On Day 1, the ResC4EU Consortium held its General Assembly (GA) at the historic building of the Łukasiewicz - Institute of Ceramics and Building Materials in Krakow. This was a long meeting day, where current achievements and next steps of our ResC4EU project were discussed - always in the light how to provide best support for SMEs. Therefore, the demonstration of traditional Polish glassmaking craftsmanship, by the staff of the Łukasiewicz Institute, was a welcome lunch break.

At the end of the day, there was an opportunity to visit the historically significant Oskar Schindler's Enamel Factory, widely known from the film "Schindler's List". The visit was a clear reminder to all of us, working on an EU Project funded by the European Commission, of the core values the EU stands for and its origins as a peace project.

Last week, the ResC4EU Consortium convened in Krakow, Poland, for a 3-day event held from October 15-17, 2024. The gathering featured productive meetings, engaging activities, and a warm experience of Polish hospitality, expertly organized by the Polish Cluster for Composites Technologies (PKTK). A special thank you goes to [Andrzej Czulak](#), [Marta Czulak](#), and their dedicated team for their exceptional efforts.

On Day 2, the consortium attended the [KOMPOZYT-EXPO®](#), the 13th International Trade Fair for Composite Materials, Technologies, and Products, which took place from October 16-17, 2024, in Krakow.

It was a great honour, that the ResC4EU Coordinator, [Tjark von Reden](#) from Composites United e.V., was invited to present the ResC4EU project and initiative on the main stage of the fair to an international audience. He was also invited to participate in the expert panel discussion with representatives from industry, research, and the Polish Ministry of Development and Technology focusing on the importance of collaboration in building resilient supply chains in the advanced composite materials sector.

Another highlight of the day, marking a major milestone of the ResC4EU project, was the Grand Opening of the 'ResC4EU platform' on the main stage of the fair. The ceremony included pressing a 'red bottom', followed by a toast with champagne to celebrate the EU funding received to support SMEs in becoming more resilient. The 'ResC4EU platform' is a digital platform designed to help companies build more resilient and sustainable supply chains. On this day, the platform's B2B marketplace was launched, allowing companies to list raw materials, components, semi-finished products, goods and services, free of charge. Future expansions will introduce more advanced tools and features related to resilience measures.

Additionally, project partners from ISL and FHG IGCV showcased their initial framework for a Resilience Assessment Model at the exhibition.

The event concluded with a networking evening at the exhibition hosted by PKTK, where consortium members engaged in enriching discussions with international industry representatives. This provided an opportunity to gather direct feedback from numerous SMEs regarding their needs and their vision for further support from the project.

We are excited to announce our Webinar WCTRS-SIGB1 on the cutting-edge ResC4EU Resilience Assessment model on the World Conference on Transport Research Society (WCTRS)! This is a unique opportunity to explore the model that empower Small and Medium-sized Enterprises (SMEs) to enhance resilience against supply chain disruptions and assess vulnerabilities.

📍 World Conference on Transport Research Society (WCTRS) - WCTRS SIGB1 Webinar

📢 Announcement and Presentation of the ResC4EU Resilience Assessment model for Small and Medium-sized Enterprises (SMEs)

📅 Date: Tuesday, November 5, 2024

🕒 Time: 09:30 – 11:00 CET (UTC+1)

🔗 Zoom Link: <https://shorturl.at/Mm2qu>

🔑 Meeting ID: 81477323797

🔒 Password: 773123

What to Expect :

This interactive session will introduce the model that provides SMEs a self-assessment to measures the resilience through a comprehensive Resilience Assessment Score. This Score highlights whether the firm's resilience is balanced or unbalanced, helping to identify areas for improvement. The model also provides insights into critical vulnerabilities and offers targeted capability recommendations, including multi-tier supply chain visibility and environmental impact metrics.

Featured Speaker:

Debarshee Bhardwaj, an esteemed supply chain professional and researcher at the Institute of Shipping Economics and Logistics (ISL) with experience across academia and industry, will share his expertise on this innovative model designed to prepare SMEs for future challenges. He holds a Ph.D. from Universität Bremen, a Master of Science in Supply Chain Engineering from Jacobs University, Bremen and a B.Eng. in Mechanical Engineering from Gauhati University.

In mid-October 2024, the ResC4EU Consortium gathered in Kraków, Poland, for a highly productive three-day event held from October 15-17. The event featured collaborative meetings, engaging activities, and a warm embrace of Polish hospitality, all expertly orchestrated by the Polish Cluster for Composites Technologies (PKTK). Special thanks to [Andrzej Czulak](#), [Marta Czulak](#), and their dedicated team for their outstanding efforts in making this event a success.

On Day 3, the ResC4EU Consortium participated the second day of the KOMPOZYT-EXPO®, the 13th International Trade Fair for Composite Materials, Technologies, and Products, held from October 16-17, 2024.

The second day of the exhibition (Day 3 of the event) was dedicated to networking with other EU Projects and visiting the exhibition. It was a unique occasion, as alongside ResC4EU, several other EU projects dedicated to supporting SMEs - such as [GreenOffshoreTech](#), [AMULET H2020](#) and [Project IDEALIST](#) - were also present in Krakow. All projects received excellent support from the exhibition team, further enhancing the collaborative and international spirit of EU projects.

Throughout Day 3, attendees visited various booths, engaging with SMEs and global players in the carbon fibre and composite industries. ResC4EU Consortium members also participated in a productive meeting with KCarbon (Korea Carbon Industry Promotion Agency) and other key industry leaders, discussing potential joint activities and opportunities for collaboration.

Special thanks to [Maxime EZEQUEL](#) from the Idealist EU project for the fruitful exchange that identified new opportunities for cooperation between ResC4EU and Idealist. Looking ahead, both projects have a promising joint opportunity at the JEC World 2025 in Paris.

JEC World 2025 is the ultimate destination for the global composites industry, offering a dynamic mix of product launches, awards ceremonies, startup competitions, conferences, live demonstrations, Innovation Planets, and invaluable networking opportunities. With more than 4300 visitors, 1300 exhibitors from 100 countries in 2024 is the JEC World 2025 a must-attend event for the industry.

In mid-October, the **#ResC4EU** Consortium convened in Krakow, Poland, for an impactful three-day event filled with meetings, activities, and the warm hospitality of the Polish Cluster of Composite Technologies (**#PKTK**). A special thanks goes to **Andrzej Czulak**, **Marta Czulak**, and their dedicated team for their exceptional organization.

A Taste of Poland: Networking Dinner in Krakow's Old Town

The event commenced with a welcome dinner at the charming "Tawerna Wilczy Dół" restaurant in Krakow's historic old town. This gathering brought together project partners from Austria, Germany, Ireland, Latvia, Norway, Poland, and Spain, who enjoyed traditional Polish cuisine and began building connections for the days ahead.

Day 1: General Assembly at the Łukasiewicz Institute

The **#ResC4EU** General Assembly (GA) took place on the first day at the historic Łukasiewicz – Institute of Ceramics and Building Materials in Krakow. This full-day meeting focused on reviewing the project's progress, discussing upcoming goals, and strategizing how to best support hashtag **#SMEs** in developing resilient supply chains.

Day 2: Presence at KOMPOZYT-EXPO® and Key Milestones

On the second day, the Consortium attended the 13th International Trade Fair for Composite Materials, Technologies, and Products (**KOMPOZYT-EXPO®**).

A highlight of the day was the **#ResC4EU** Coordinator, **Tjark von Reden** of **Composites United** e.V., presenting the **#ResC4EU** initiative on the fair's main stage. His participation in an expert panel discussion alongside industry, research, and government representatives underscored the value of collaboration in strengthening supply chains within the composite materials sector.

The day's key milestone was the Grand Opening of the **#ResC4EU** Platform. This momentous occasion included a ceremonial "red button" press and a champagne toast, marking the launch of the platform's B2B marketplace. The digital platform enables companies to list raw materials, components, semi-finished products, and services at no cost, supporting resilient and sustainable supply chain development.

Day 3: Networking and Collaboration Opportunities

The final day focused on networking and exploring the exhibition. This unique occasion provided the chance to connect with other EU-funded projects, such as **GreenOffshoreTech**, **AMULET H2020**, and **Project IDEALIST**, all of which share a commitment to supporting **#SMEs** and main industry player.

This three-day event showcased the Consortium's dedication to driving innovation, collaboration, and resilience in the composite materials sector while strengthening ties with stakeholders across Europe and beyond.

Press Release

ResC4EU Consortium

FOR IMMEDIATE RELEASE

International Consortium Launches Initiative to support EU businesses to Enhance Resilient Supply Chains for Europe

Oslo, Norway, 9 March 2024 - The ResC4EU Consortium proudly announces the launch of its collaboration and support initiative "Resilient Supply Chains for Europe" (ResC4EU) funded by the European Union with 3 million Euros.

The purpose of this ambitious three-year initiative is to support EU businesses, especially small and medium sized enterprises (SMEs), to become more resilient and sustainable and be able to quickly adapt to supply chain disruptions such as experienced during COVID-19 crisis or other ongoing conflicts or disasters (e.g. Suez Channel closure, Ukraine war, floodings) by adopting advanced technologies.

The ResC4EU will provide an open space for collaboration, develop and provide models and tools that can assist companies in detecting and anticipating disruptions in their supply chain, and offering SMEs tailored support and training programmes as part of the ResC4EU Net-Zero Industry Academies.

Another focus is to explore collaboration opportunities and building alliances among traditional manufacturing SMEs in need of implementing advanced technologies and tech-savvy SMEs providing innovative solutions for more resilient and sustainable processes.

The Consortium will start with an assessment of the needs, risks, disruptions, challenges and opportunities for SMEs.

ResC4EU will bolster the resilience of European supply chains in Europe's most critical industrial ecosystems: mobility, transport & automotive; retail; proximity & social economy; textiles; tourism; aerospace & defence; renewable energy; energy-intensive industries, electronics; digital; construction; agri-food; health; and creative & cultural industries.

The ResC4EU consortium comprises six of Europe's leading industry clusters, one inter-cluster and innovation management expert (SME), one tech-savvy SME and two research organisations with a direct outreach to up to 1000 SMEs across Europe and covering all envisaged 14 industrial ecosystems. The project will be coordinated by the German Leading-edge Cluster Composites United e.V.

The ResC4EU consortium partners are:

- Composites United e.V. (CU, Germany) - Coordinator
- Maritime Cluster Northern Germany e.V. (MCN, Germany)
- Latvian Information Technology Cluster (Latvia), a European Digital Innovation Hub
- AIDIMME (Spain), Technology Institute and Innovative Business Association
- Polish Cluster of Composite Materials (PKTK, Poland), coordinated by GoFar Sp.z.o.o

Title: *Grand opening of the ResC4EU platform to support companies withstanding supply chain disruptions at KOMPOZYT EXPO in Krakow*

Web Link: <https://www.resc4eu.com/news.html>

Press Release

ResC4EU Consortium

FOR IMMEDIATE RELEASE

Grand opening of the ResC4EU platform to support companies withstanding supply chain disruptions

Oslo, Norway, 30 September 2024 - The ResC4EU consortium proudly announces the grand opening of its ResC4EU platform, designed to support companies in making their supply chains more resilient and sustainable at this year's KOMPOZYT-EXPO®, the 13th International Trade Fair for Composite Materials, Technologies and Products, taking place from October 16-17, 2024, in Krakow, Poland.

The ResC4EU platform is made for companies across various industries with a special focus on supply chains within the composite manufacturing sectors, including aerospace, automotive, rail, shipbuilding, wind energy, building and construction, electronic, healthcare and consumer products.

Visit the ResC4EU booth (D59) to meet project partners and learn more about the ResC4EU initiative, which offers a comprehensive programme of digital tools, services, training and networking opportunities. The initiative is designed to help companies - particularly small and medium sized enterprises (SMEs) - become more resilient, sustainable and better equipped to respond quickly to supply chain disruptions such as those experienced during COVID-19 pandemic or other crises (e.g. the Suez Canal, the war in Ukraine, or flooding events).

The ResC4EU project and initiative is spearheaded by leading industry associations and clusters including Composites United e.V. (CU, Germany), the Polish Cluster of Composite Materials (PKTK, Poland), the Latvian Information Technology Cluster and European Digital Innovation Hub (LITC, Latvia), the Advanced Technology in Manufacturing Cluster (ATIM, Ireland), the Maritime Cluster Northern Germany e.V. (MCN, Germany), Scaberia AS (Norway), GreenTwin GmbH (Austria), the Institute of Shipping Economics and Logistics (ISL, Germany) and the Fraunhofer Institute for Casting, Composites and Processing Technology (Fraunhofer IGC, Germany).

The grand opening of the ResC4EU platform will take place on the first day of the fair (16:30 CET, booth D59). Another highlight will be the panel discussion with Dr. Tjark von Reden, CEO at Composites United (12:00 CET, stage area).

For more information about the ResC4EU project and its initiative for companies which is funded by the European Commission with €3 million, please visit the ResC4EU website at www.ResC4EU.com.

März 12, 2

Internationales Konsortium mit Norwegen als Mitglied unterstützt KMU bei Schaffung widerstandsfähiger Lieferketten

Die Initiative **ResC4EU** hilft kleinen und mittelständischen Unternehmen dabei schnell zu reagieren, wenn Lieferketten unterbrochen werden, beispielsweise durch die Schließung des Suezkanals, Krieg in der Ukraine oder Überschwemmungen. ©BPN

Oslo, Norwegen, 9. März 2024. Zehn Unternehmen, Verbände und Institutionen aus sieben Ländern haben sich zu einem Konsortium zusammengeschlossen, um EU- und EFTA-Unternehmen, insbesondere kleine und mittelständische Unternehmen (KMU), dabei zu unterstützen, mittels fortschrittlicher Technologien widerstandsfähiger und nachhaltiger zu werden und sich schnell an Unterbrechungen der Lieferkette anzupassen. Die EU finanziert die Initiative „Resilient Supply Chains for Europe“ (**ResC4EU**) des ResC4EU-Konsortiums mit drei Millionen Euro. Das Projekt ist ab drei Jahre angelegt. Norwegen ist durch die Firma **Scaberia AS** vertreten.

Das ResC4EU-Konsortium wird Modelle und Tools entwickeln und bereitstellen, die Unternehmen bei der Erkennung und Antizipation von Störungen in ihrer Lieferkette unterstützen können. Kleinen und mittelständischen Unternehmen werden im Rahmen der ResC4EU Net Zero Industrie Akademien maßgeschneiderte Unterstützungs- und Schulungsprogramme angeboten.

Ein weiterer Schwerpunkt der Initiative liegt auf der Erkundung von Kooperationsmöglichkeiten und dem Aufbau von Allianzen zwischen traditionellen KMU im verarbeitenden Gewerbe, die fortschrittliche Technologien implementieren müssen, und technisch versierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse anbieten. Die Unterstützung durch das Konsortium beginnt mit einer Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU.

Das ResC4EU-Konsortium bietet Unterstützung in folgenden Bereichen: Mobilität, Transport und Automobil; Einzelhandel; Sozialwirtschaft; Textilindustrie; Tourismus; Luft- und Raumfahrt & Verteidigung; erneuerbare Energien; energieintensive Industrien, Elektronik; Digital; Konstruktion; Agrarwirtschaft; Gesundheitswirtschaft sowie Kreativ- und Kulturindustrie. Das Konsortium besteht aus sechs der führenden Industriecluster Europas, einem Cluster- und Innovationsmanagement-Experten (KMU), einem technisch versierten KMU und zwei Forschungsorganisationen mit direktem Kontakt zu bis zu 1.000 KMU in ganz Europa. Koordiniert wird das Projekt vom deutschen Spitzencluster Composites United e.V.

Die einzelnen Partner des ResC4EU-Konsortiums sind:

- CU – Composites United e.V. (Deutschland) – Koordinator
- MCN – Maritimer Cluster Norddeutschland e.V. (Deutschland)
- LITC – Lettischer Informationstechnologie-Cluster (Lettland), ein europäisches digitales Innovationszentrum (EDIH, European Digital Innovation Hub)
- AIDIMME – Technologieinstitut und Verband innovativer Unternehmen (Spanien)
- PKTK – Polnischer Cluster für Verbundwerkstoffe (Polen), koordiniert von GoFar Sp.z.o.o
- ATIM – Irisches Cluster für fortschrittliche Technologien in der Fertigung (Irland), koordiniert von der Technischen Universität Shannon: Midlands Midwest (TUS)
- **Scaberia AS** (Norwegen)
- GreenTwin GmbH (Österreich)
- ISL – Institut für Seeverkehrswirtschaft und Logistik (Deutschland)
- Fraunhofer-Gesellschaft zur Förderung der angewandten Forschung e.V. (Deutschland)

ResC4EU Project: Strengthening the resilience and sustainability of European supply chains

The ResC4EU project focuses on helping European companies, especially SMEs, to strengthen their resilience and sustainability and to adapt to supply chain disruptions. It promotes collaboration, provides customised support for SMEs and explores opportunities for cooperation between different industrial sectors.

ISL is delighted to be part of the ResC4EU consortium "Resilient Supply Chains for Europe", which is supported by the European Union with funding of 3 million euros. The three-year project aims to help European companies, especially small and medium-sized enterprises (SMEs), to strengthen their resilience and sustainability and to adapt quickly to disruptions in supply chains. Such disruptions occurred, for example, during the COVID-19 crisis as well as other on-going conflicts or disasters, such as the blockade of the Suez Canal, the Ukraine conflict or floods.

The ResC4EU will provide an open space for collaboration, develop and provide models and tools that can assist companies in detecting and anticipating disruptions in their supply chain, and offering SMEs tailored support and training programmes as part of the ResC4EU Net-Zero Industry Academies.

Another focus is to explore collaboration opportunities and building alliances among traditional manufacturing SMEs in need of implementing advanced technologies and tech-savvy SMEs providing innovative solutions for more resilient and sustainable processes.

ISL has the task to develop algorithm and exemplary tools to comprehend and enhance the resilience of supply chains of SME.

The Consortium will start with an assessment of the needs, risks, disruptions, challenges and opportunities for SMEs. ResC4EU will bolster the resilience of European supply chains in Europe's most critical industrial ecosystems: mobility, transport & automotive, retail, proximity & social economy, textiles, tourism, aerospace & defence, renewable energy, energy-intensive industries, electronics, digital, construction, agri-food, health, and creative & cultural industries.

The ResC4EU consortium comprises six of Europe's leading industry clusters, one intercluster and innovation management expert (SME), one tech-savvy SME and two research organisations with a direct outreach to up to 1000 SMEs across Europe and covering all envisaged 14 industrial ecosystems. The project will be coordinated by the German Leading-edge Cluster Composites United e.V.

RESC4EU PROJEKT: EUROPÄISCHE LIEFERKETTEN STÄRKEN

REGELMÄSSIG
INFORMIERT SEIN?

Das ISL stärkt gemeinsam mit dem ResC4EU-Konsortium die Zukunft der europäischen Wirtschaft.
Bild: iStock, Maxiphoto

13.03.2024 | Das Projekt ResC4EU konzentriert sich darauf, europäischen Unternehmen, insbesondere KMU, bei der Stärkung ihrer Resilienz und Nachhaltigkeit sowie der Anpassung an Lieferkettenstörungen zu helfen. Es fördert Zusammenarbeit, bietet maßgeschneiderte Unterstützung für KMU und erforscht Kooperationsmöglichkeiten zwischen verschiedenen Industriebereichen.

TAGS | 1.0 INDUSTRY.ZERO & TRANSFORMATION LIEFERKETTE RESILIENZ KMUS
INSTITUT FÜR SEEVERKEHRSWIRTSCHAFT UND LOGISTIK (ISL)

Das ISL freut sich, Teil des ResC4EU-Konsortiums „Resilient Supply Chains for Europe“ zu sein, welches von der Europäischen Union mit einer Finanzierung von 3 Millionen Euro unterstützt wird. Das dreijährige Projekt zielt darauf ab, europäischen Unternehmen, insbesondere kleinen und mittleren Unternehmen (KMU), zu helfen, ihre Resilienz und Nachhaltigkeit zu stärken sowie sich besser an Unterbrechungen in den Lieferketten anpassen zu können.

Solche Unterbrechungen traten beispielsweise während der COVID-19-Krise sowie anderen anhaltenden Konflikten oder Katastrophen auf, wie etwa die Blockade des Suezkanals, der Ukraine-Konflikt oder Überschwemmungen.

Erkennung und Vorhersage von Störungen

ResC4EU wird einen offenen Raum für Zusammenarbeit schaffen, um Unternehmen bei der Erkennung und Vorhersage von Störungen in ihren Lieferketten zu unterstützen. Dies umfasst die Entwicklung und Bereitstellung von Modellen und Tools. Darüber hinaus werden im Rahmen der ResC4EU Net-Zero Industry Academies maßgeschneiderte Unterstützungs- und Schulungsprogramme speziell für KMU angeboten.

Ein weiterer Schwerpunkt liegt darauf, die Kooperationsmöglichkeiten zu erforschen und Allianzen zwischen traditionellen KMU im Fertigungsbereich, die fortschrittliche Technologien implementieren müssen, und technologieorientierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse bereits bereitstellen, aufzubauen.

Das ISL hat hier die Aufgabe übernommen Algorithmen und modellhafte Tools zu entwickeln mit den die Resilienz in Lieferketten von KMU erfasst und verbessert werden kann. Das Konsortium führt eine umfassende Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU durch.

ResC4EU wird die Widerstandsfähigkeit der europäischen Lieferketten in kritischen industriellen Ökosystemen Europas stärken, darunter Mobilität, Verkehr und Automobilindustrie, Einzelhandel, Nähe und soziale Ökonomie, Textilien, Tourismus, Luft- und Raumfahrt sowie Verteidigung, erneuerbare Energien, energieintensive Branchen, Elektronik, Digital, Bauwesen, Agrar- und Lebensmittelindustrie, Gesundheitswesen sowie kreative und kulturelle Industrien.

Das ResC4EU-Konsortium, koordiniert vom deutschen Spitzencluster Composites United, besteht aus sechs führenden Industrieclustern Europas, einem Intercluster- und Innovationsmanagement-Experten, einem technologiebewussten KMU und zwei Forschungsorganisationen. Diese Struktur bietet direkten Zugang zu bis zu 1.000 KMU in ganz Europa. Das Konsortium deckt alle 14 vorgesehenen industriellen Ökosysteme ab, was auf eine breite Expertise und Reichweite hindeutet.

ResC4EU Projekt: Stärkung der Resilienz und Nachhaltigkeit europäischer Lieferketten

14.03.2024 | Internationalisierung Deutschlands, Bi-/Multilaterales

Das Institut für Seeverkehrswirtschaft und Logistik (ISL) ist nun Teil des ResC4EU-Konsortiums, welches von der Europäischen Union mit einer Finanzierung von 3 Millionen EUR unterstützt wird. Das dreijährige Projekt zielt darauf ab, europäischen Unternehmen, insbesondere kleinen und mittleren Unternehmen (KMU), zu helfen, ihre Resilienz und Nachhaltigkeit zu stärken sowie sich besser an Unterbrechungen in den Lieferketten anpassen zu können. Es fördert Zusammenarbeit, bietet maßgeschneiderte Unterstützung für KMU und erforscht Kooperationsmöglichkeiten zwischen verschiedenen Industriebereichen.

Das Projekt "Resilient Supply Chains for Europe" (**ResC4EU**) wird einen offenen Raum für Zusammenarbeit schaffen, um Unternehmen bei der Erkennung und Vorhersage von Störungen in ihren Lieferketten zu unterstützen. Dies umfasst die Entwicklung und Bereitstellung von Modellen und Tools. Darüber hinaus werden im Rahmen der ResC4EU Net-Zero Industry Academies maßgeschneiderte Unterstützungs- und Schulungsprogramme speziell für KMU angeboten.

Ein weiterer Schwerpunkt liegt darauf, die Kooperationsmöglichkeiten zu erforschen und Allianzen zwischen traditionellen KMU im Fertigungsbereich, die fortschrittliche Technologien implementieren müssen, und technologieorientierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse bereits bereitstellen, aufzubauen.

Das ISL hat hier die Aufgabe übernommen Algorithmen und modellhafte Tools zu entwickeln mit denen die Resilienz in Lieferketten von KMU erfasst und verbessert werden kann.

Das Konsortium führt eine umfassende Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU durch. ResC4EU wird die Widerstandsfähigkeit der europäischen Lieferketten in kritischen industriellen Ökosystemen Europas stärken, darunter Mobilität, Verkehr und Automobilindustrie, Einzelhandel, Nähe und soziale Ökonomie, Textilien, Tourismus, Luft- und Raumfahrt sowie Verteidigung, erneuerbare Energien, energieintensive Branchen, Elektronik, Digital, Bauwesen, Agrar- und Lebensmittelindustrie, Gesundheitswesen sowie kreative und kulturelle Industrien.

Das ResC4EU-Konsortium, koordiniert vom deutschen Spitzencluster Composites United e.V., besteht aus sechs führenden Industrieclustern Europas, einem Intercluster- und Innovationsmanagement-Experten, einem technologiebewussten KMU und zwei Forschungsorganisationen. Das Konsortium deckt alle 14 vorgesehenen industriellen Ökosysteme ab.

Resilient Supply Chains for Europe (ResC4EU) heißt eine neue Initiative von zehn Unternehmen, Verbänden und Institutionen aus sieben Ländern. Diese haben sich – finanziell unterstützt von der EU – zu einem Konsortium zusammengeschlossen, um EU- und EFTA-Unternehmen dabei zu unterstützen, mittels fortschrittlicher Technologien widerstandsfähiger und nachhaltiger zu werden und sich schnell an Unterbrechungen ihrer Lieferketten anzupassen.

Das ResC4EU-Konsortium will Modelle und Tools entwickeln und bereitstellen, die Unternehmen bei der Erkennung und Antizipation von Störungen in ihrer Lieferkette unterstützen können. Das Projekt ist auf drei Jahre angelegt und soll sich unter anderem an kleine und mittelständische Unternehmen (KMU) richten. Diesen sollen im Rahmen der ResC4EU Net-Zero Industry Academies maßgeschneiderte Unterstützungs- und Schulungsprogramme angeboten werden.

Ein weiterer Schwerpunkt der Initiative liegt auf der Erkundung von Kooperationsmöglichkeiten und dem Aufbau von Allianzen zwischen traditionellen KMU im verarbeitenden Gewerbe, die fortschrittliche Technologien implementieren müssen, und technisch versierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse anbieten. Die Unterstützung durch das Konsortium beginnt mit einer Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU.

Das ResC4EU-Konsortium will Unterstützung in folgenden Branchen bieten: Mobilität, Transport und Automobil; Einzelhandel; Sozialwirtschaft; Textilindustrie; Tourismus; Luft- und Raumfahrt & Verteidigung; erneuerbare Energien; energieintensive Industrien, Elektronik; Digital; Konstruktion; Agrarwirtschaft; Gesundheitswirtschaft sowie Kreativ- und Kulturindustrie.

Das Konsortium besteht aus sechs der führenden Industriecluster Europas, einem Cluster- und Innovationsmanagement-Experten (KMU), einem technisch versierten KMU und zwei Forschungsorganisationen mit direktem Kontakt zu bis zu 1000 KMU in ganz Europa. Koordiniert wird das Projekt vom deutschen Spitzencluster Composites United e.V.

Supply Chain Management (SCM)

SCM: Resiliente Lieferketten für Europa

Das EU-Projekt ResC4EU, das die Resilienz insbesondere kleiner und mittlerer Unternehmen fördern soll, ist mit dem Maritimen Cluster Norddeutschland als Partner gestartet.

Resilienz in stürmischen Zeiten: Das EU-Projekt ResC4EU hat sich auf die Fahnen geschrieben, Modelle sowie Tools zu entwickeln, um Unternehmen bei der Erkennung und Vorhersage von Störungen in ihrer Lieferkette zu unterstützen. (Foto: Eduardo/stock.adobe.com)

25.03.2024 | Matthias Pieringer

Das Maritime Cluster Norddeutschland (MCN) ist Partner des neu gestarteten EU-Konsortiums „Resilient Supply Chains for Europe“ (ResC4EU), das mit einer Förderung von drei Millionen Euro über drei Jahre von der EU unterstützt wird. ResC4EU zielt darauf ab, europäische Unternehmen, insbesondere kleine und mittelständische Unternehmen (KMU), dabei zu unterstützen, mittels fortschrittlicher Technologien widerstandsfähiger und nachhaltiger zu werden sowie sich schnell an Unterbrechungen der Lieferkette anzupassen, teilte das MCN kürzlich mit.

„In den vergangenen Jahren hat sich für die maritime Industrie neben der Energiesicherheit auch die Resilienz als bedeutende Herausforderung erwiesen. Mit ResC4EU adressieren wir daher ein hochrelevantes Thema für die Branche“, sagte Oliver Bretag, Projektmanager beim MCN. „Die Ergebnisse dieses Projekts sind darauf ausgerichtet, Unternehmen in Europa wertvolle Unterstützung zu bieten. Ich freue mich, dass wir Teil dieses Vorhabens sind und in den kommenden drei Jahren einen Beitrag zur Stärkung der Resilienz in der Industrie leisten können.“

Modelle und Tools entwickeln

Das Projekt ResC4EU, das am 1. Januar 2024 begonnen hat und bis zum 31. Dezember 2026 läuft, soll einen offenen Raum für die internationale Zusammenarbeit schaffen. Außerdem lautet das Ziel, Modelle sowie Tools zu entwickeln und bereitzustellen, um Unternehmen bei der Erkennung und Vorhersage von Störungen in ihrer Lieferkette zu unterstützen. Maßgeschneiderte Unterstützungs- und Schulungsprogramme für KMU sind im Rahmen der „ResC4EU Net- Zero Industrie Akademien“ geplant.

Ein weiterer Schwerpunkt liegt laut dem MCN darauf, Kooperationsmöglichkeiten zu erkunden und Allianzen zwischen traditionellen KMU, die fortschrittliche Technologien implementieren müssen, und technologieorientierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse bereits bereitstellen, aufzubauen.

Umfassende Bewertung

ResC4EU soll eine umfassende Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU durchführen und die Resilienz der Lieferketten in verschiedenen europäischen Industriezweigen stärken, darunter Mobilität, Verkehr und Automobilindustrie, Einzelhandel, Sozialwirtschaft, Textilindustrie, Tourismus, Luft- und Raumfahrt sowie Verteidigung, erneuerbare Energien, energieintensive Branchen, Elektronik, Digital, Bauwesen, Agrarwirtschaft, Gesundheitswesen, sowie Kreativ- und Kulturindustrie.

Das ResC4EU-Konsortium besteht der Mitteilung zufolge aus sechs führenden Industrieclustern Europas, einem Cluster- und Innovationsmanagement-Experten, einem technisch versierten KMU und zwei Forschungseinrichtungen. Das Projekt wird vom deutschen Spitzencluster Composites United e.V.

Die Partner des ResC4EU-Konsortiums sind:

- ▶ AIDIMME – Technologieinstitut und Verband Innovativer Unternehmen (Spanien)
- ▶ ATIM – Irisches Cluster für fortschrittliche Technologien in der Fertigung (Irland), koordiniert von der Technischen Universität Shannon: Midlands Midwest (TUS)
- ▶ CU – Composites United e.V. (Deutschland) - Koordinator
- ▶ Fraunhofer – Gesellschaft zur Förderung der angewandten Forschung e.V. (Deutschland)
- ▶ GreenTwin GmbH (Österreich)
- ▶ ISL – Institut für Seeverkehrswirtschaft und Logistik (Deutschland)
- ▶ LITC – Lettischer Informationstechnologie-Cluster (Lettland), ein europäisches digitales Innovationszentrum (EDIH, European Digital Innovation Hub)
- ▶ MCN – Maritimes Cluster Norddeutschland e. V. (Deutschland)
- ▶ PKTK – Polnischer Cluster für Verbundwerkstoffe (Polen), koordiniert von GoFar Sp.z.o.o
- ▶ Scaberia AS (Norwegen)

Atim Cluster in €3m EU Supply Chain Resilience Consortium

<https://www.midlandsireland.ie/atim-cluster-in-e3m-eu-supply-chain-resilience-consortium/>

Midlands-based Industry Cluster *atim cluster* will represent Ireland and the Advanced Manufacturing sector in a new International Consortium Initiative launched to support EU businesses to Enhance Resilient Supply Chains for Europe. The ResC4EU Consortium proudly announced the launch of its collaboration and support initiative "Resilient Supply Chains for Europe" (ResC4EU) with €3m in European Union funding.

The purpose of the ambitious three-year initiative is to support EU businesses, especially small and medium sized enterprises (SMEs), to become more resilient and sustainable and be able to quickly adapt to supply chain disruptions such as those experienced during the COVID-19 crisis or other ongoing conflicts or disasters (e.g. Suez Channel closure, Ukraine war, flooding) by adopting advanced technologies.

The ResC4EU will provide an open space for collaboration, develop and provide models and tools that can assist companies in detecting and anticipating disruptions in their supply chain, and offering SMEs tailored support and training programmes as part of the ResC4EU Net-Zero Industry Academies.

Another focus is to explore collaboration opportunities and building alliances among traditional manufacturing SMEs in need of implementing advanced technologies and tech-savvy SMEs providing innovative solutions for more resilient and sustainable processes.

The Consortium will start with an assessment of the needs, risks, disruptions, challenges and opportunities for SMEs.

ResC4EU will bolster the resilience of European supply chains in Europe's most critical industrial ecosystems: mobility, transport & automotive; retail; proximity & social economy; textiles; tourism; aerospace & defence; renewable energy; energy-intensive industries, electronics; digital; construction; agri-food; health; and creative & cultural industries.

The ResC4EU consortium comprises six of Europe's leading industry clusters, one inter-cluster and innovation management expert (SME), one tech-savvy SME and two research organisations. The consortium partners operate across 7 EU countries, with combined direct outreach to up to 1,000 SMEs across Europe and covering all envisaged 14 industrial ecosystems. The project will be coordinated by the German leading-edge Cluster Composites United e.V.

The ResC4EU consortium partners are:

- Composites United e.V. (CU), Germany - Coordinator
- Maritime Cluster Northern Germany e.V. (MCN), Germany
- Latvian Information Technology Cluster, Latvia, a European Digital Innovation Hub
- AIDIMME, Spain, Technology Institute and Innovative Business Association
- Polish Cluster of Composite Materials (PKTK), Poland, coordinated by GoFar Sp.z o.o
- Advanced Technology in Manufacturing Cluster (*atim cluster*), Ireland, facilitated by Technological University of the Shannon (TUS)
- Scaberia AS, Norway
- GreenTwin GmbH, Austria
- Institute of Shipping Economics and Logistics (ISL), Germany
- Fraunhofer Society e.V., Germany

Midlands-based *atim* (advanced technologies in manufacturing) cluster represents its members in the Advanced Manufacturing sector as part of the consortium. The cluster supports the green and digital transition of manufacturing SMEs, and companies along their value chain, building on the Midlands regional strength in digital services, polymers and advanced manufacturing. Its goal is to support SMEs and identify common areas of interest, develop strategic alliances so collectively they can enhance capabilities to win business in global markets.

For more information about ResC4EU and its initiatives, please visit www.resC4EU.com

For more on the *atim cluster* visit www.atim.ie

Engpässe: Forschungsprojekt ResC4EU will Lieferketten europäischer KMU stärken

Im Rahmen des Projekts entwickelt das Fraunhofer IGCV Modelle und digitale Werkzeuge, die helfen sollen, Störungen in Produktionsprozessen schneller zu erkennen und beheben.

Wie können KMU bei Lieferketten-Disruptionen schnell neue Beschaffungswege aufbauen? (Symbolbild: ilkercekk / stock.adobe.com)

22.11.2024 | Therese Meitinger

Um vor allem kleine und mittlere Unternehmen (KMU) in Europa dabei zu unterstützen, Lieferkettenstörungen widerstandsfähiger und nachhaltiger entgegenzutreten, hat das ResC4EU Konsortium das EU-Projekt & die Initiative „ResC4EU“ (Resilient Supply Chains for Europe) ins Leben gerufen. Im Rahmen des Projekts arbeitet das Fraunhofer-Institut für Gießerei-, Composite- und Verarbeitungstechnik IGCV an der Entwicklung von Modellen und digitalen Werkzeugen, die Störungen in Produktionsprozessen schneller erkennen und beheben können, wie eine Pressemitteilung vom 20. November berichtet. Das EU-Projekt wird demnach mit drei Millionen Euro von der Europäischen Union gefördert und ist auf drei Jahre ausgelegt.

Schnell alternative Zulieferer finden

Unternehmen sind in der Regel auf unterschiedliche Zulieferer angewiesen. Rohmaterialien oder Bauteile werden nicht selten über weite Strecken mit dem LKW, Zug oder Flugzeug transportiert.

„Grundsätzlich ist es hilfreich, die eigenen Lieferketten gut zu kennen. Woher kommt mein Material und welche Wege muss es nehmen, um bei mir zu landen? Leider kommt es immer wieder vor, dass vor allem kleinere Unternehmen bankrottgehen, weil sie diesen Aspekt vernachlässigen und Liefereschwierigkeiten beziehungsweise –ausfälle im Krisenfall nicht ausgleichen können“, sagt Clemens Gonnermann, der am Fraunhofer IGCV zu Fragen der Digitalisierung und KI in der Produktion arbeitet.

Im Rahmen des ResC4EU-Projekts soll deshalb ein Wissensmodell entstehen, das Unternehmen einen genauen Überblick über ihre Lieferketten gibt und umfassende Risikobewertungen für potenzielle Unterbrechungen aufzeigt. Im Bedarfsfall gebe das digitale Werkzeug dann mithilfe eines Algorithmus individuelle Lösungen für Produktion, Transport sowie Lagerung an, heißt es vonseiten des Instituts. „Das übergeordnete Ziel ist immer, dass die Produktion wie gewohnt weitergeht, ohne Produktionsstopp oder Kurzarbeit der Mitarbeitenden. Das reduziert nicht nur Kosten, sondern fördert auch die Kundenzufriedenheit und schafft erhebliche Wettbewerbsvorteile“, erklärt der Fraunhofer-Wissenschaftler.

Forschen am Fraunhofer IGCV gemeinsam an ResC4EU (von links): die Wissenschaftler Clemens Gonnermann, Kunai Chaudhari, Dussama Etijani und Aljoscha Hieronymus. (Bild: Fraunhofer IGCV)

1 / 1

Disruption betrifft auch Nachhaltigkeit

Ändert sich eine Lieferkette, hat das nicht nur Auswirkungen darauf, ob weiter produziert werden kann oder nicht. Auch die CO₂-Bilanz eines Produktes ändert sich. Gemeint sind damit nicht nur CO₂-Emissionen sondern auch Methanemissionen und weitere Einflussfaktoren.

„Es lässt sich ein globaler Trend beobachten, bei dem Unternehmen immer stärker in die Pflicht genommen werden, transparent über ihre Treibhausgasemissionen Auskunft zu geben. Zudem werden diese zunehmend zu einem Wettbewerbsfaktor“, führt Aljoscha Hieronymus an, der am Fraunhofer IGCV im Themenbereich der Nachhaltigkeit arbeitet.

Am naheliegendsten sei das beim Standort und Transport. „Ob ich mein Material regional beziehe oder es einfliegen lasse, hat einen Einfluss auf dessen ökologischen Fußabdruck.“ Aber auch das Herstellungsverfahren als solches kann viel oder wenig Energie verbrauchen. Im Rahmen des EU-Projekts erarbeiten Gonnermann, Hieronymus und ihre Kolleginnen und Kollegen daher nicht nur einheitliche Parameter für die Widerstandsfähigkeit von Lieferketten, sondern kategorisieren diese auch nach ihrem Energie- und Ressourcenverbrauch sowie ihrer Klimawirkung. „Wir werfen dabei zum Beispiel einen Blick auf die Energiemärkte in unterschiedlichen Ländern und schauen, ob der Strom dort aus erneuerbaren oder fossilen Quellen stammt. Das vereinfacht die Nachhaltigkeitsfrage für Unternehmen deutlich.“

CO₂-Bilanz am Beispiel von Carbon-Bauteilen

Gemeinsam mit der Abteilung für Nachhaltige Fabrikplanung und -betrieb am Fraunhofer IGCV untersuchen Clemens Gonnermann und sein Team der Pressemitteilung zufolge exemplarisch die CO₂-Bilanz des Verbundwerkstoffs Carbon, der in der Luft- und Raumfahrt zum Einsatz kommt. Von der Produktion bis zum Recycling deckt das Fraunhofer IGCV dessen gesamte Wertschöpfungskette ab und berücksichtigt dabei auch die Ansprüche aus der Industrie.

„Aufgrund unserer Expertise in der Forschungs- und Entwicklungsarbeit von Carbon-Composites, können wir auf umfangreiche Daten zurückgreifen. Für das ResC4EU-Projekt entwickeln wir auf dieser Basis Modelle, die unterschiedliche Fertigungsprozesse miteinander vergleichen und dabei ökologisch und ökonomisch bewerten“, erklärt Gonnermann. „Diese Berechnungen werden automatisiert und bieten dem Unternehmen im Bedarfsfall eine nachhaltige und wirtschaftlich sinnvolle Lösung.“ Die Modellierungen sollen im zweiten Schritt als Bausteine für weitere technische Verfahren und Bauteile aus anderen Industriesektoren dienen.

Umfrage: Resiliente Lieferketten und KI im Fokus von Einkaufsleitern

Die ResC4EU-Initiative hat sich auf die Fahren geschrieben, Unterstützung für KMUs aus insgesamt 14 unterschiedlichen Industriesektoren anzubieten, darunter Luftfahrt-, Raumfahrt- und Verteidigung, zivile Sicherheit, Mobilität (Transport- und Automobilindustrie), Erneuerbare Energien, Elektronikindustrie, digitale Industrie, Baugewerbe, Textilindustrie, Agrar- und Lebensmittelsektor, Kultur- und Kreativwirtschaft, Gesundheitssektor, Sozialwirtschaft, Einzelhandel, und Tourismus.

Um diese Bandbreite abdecken zu können, besteht das ResC4EU-Konsortium laut der Pressemitteilung aus sechs europäischen Industrieverbände und -clustern mit direkten Zugang zu bis zu 1000 KMUs in ganz Europa. Außerdem gehören dem Konsortium zwei KMUs an, ein KMU für Cluster- und Innovationsmanagement und ein KMU für digitale B2B Plattformentwicklung und -management. Das Fraunhofer IGCV und das Institut für Seeverkehrswirtschaft und Logistik (ISL) vervollständigen das Konsortium als Forschungseinrichtungen. Koordiniert wird das EU-Projekt vom deutschen Industrieverband Composites United e.V. (CU).

In the PRESS: TEXTINATION – Connecting The World of Textiles, NEWS, 21 Nov. 2024, in German:
Fraunhofer IGCV unterstützt Europa bei Lieferengpässen
(Fraunhofer IGCV supports Europe in the event of supply bottlenecks)
<https://textination.de/de/news?str=BTE&newstype=6352>

21.11.2024 

Fraunhofer IGCV unterstützt Europa bei Lieferengpässen

Der Krieg in der Ukraine, die COVID-19-Krise oder auch die Schließung des Suezkanals hatten jeweils schwere Versorgungsunterbrechungen zur Folge und stellten die Weltwirtschaft vor finanzielle und logistische Herausforderungen. Doch auch im Kleinen konnte man erst kürzlich an den Überschwemmungen in Süddeutschland sehen, was es bedeutet, wenn Lieferketten unterbrochen sind.

Um vor allem kleine und mittlere Unternehmen (KMUs) in Europa zu unterstützen derartigen Störungen widerstandsfähiger und nachhaltiger entgegenzutreten, hat das ResC4EU Konsortium das EU-Projekt & die Initiative ResC4EU (Resilient Supply Chains for Europe) ins Leben gerufen. Im Rahmen des Projektes arbeitet das Fraunhofer IGCV an der Entwicklung von Modellen und digitalen Werkzeugen, die Störungen in Produktionsprozessen schneller erkennen und beheben können. Das EU-Projekt wird mit drei Millionen Euro von der Europäischen Union gefördert wird und ist auf drei Jahre ausgelegt.

Schnell Alternativen finden

Unternehmen sind in der Regel auf unterschiedliche Zulieferer angewiesen. Rohmaterialien oder Bauteile werden nicht selten über weite Strecken mit dem LKW, Zug oder Flugzeug transportiert. „Grundsätzlich ist es hilfreich, die eigenen Lieferketten gut zu kennen. Woher kommt mein Material und welche Wege muss es nehmen, um bei mir zu landen? Leider kommt es immer wieder vor, dass vor allem kleinere Unternehmen bankrottgehen, weil sie diesen Aspekt vernachlässigen und Liefereschwierigkeiten beziehungsweise -ausfälle im Krisenfall nicht ausgleichen können“, sagt Clemens Gonnermann, der am Fraunhofer IGCV zu Fragen der Digitalisierung und KI in der Produktion arbeitet.

Im Rahmen des ResC4EU Projekts soll deshalb ein Wissensmodell entstehen, das Unternehmen einen genauen Überblick über ihre Lieferketten gibt und umfassende Risikobewertungen für potenzielle Unterbrechungen aufzeigt. Im Bedarfsfall gibt das digitale Werkzeug dann mithilfe eines Algorithmus individuelle Lösungen für Produktion, Transport sowie Lagerung an. „Das übergeordnete Ziel ist immer, dass die Produktion wie gewohnt weiter geht, ohne Produktionsstopp oder Kurzarbeit der Mitarbeitenden. Das reduziert nicht nur Kosten, sondern fördert auch die Kundenzufriedenheit und schafft erhebliche Wettbewerbsvorteile“, erklärt der Fraunhofer-Wissenschaftler.

Nachhaltigkeit im Blick

Ändert sich eine Lieferkette, hat das allerdings nicht nur Auswirkungen darauf, ob weiter produziert werden kann oder nicht. Auch die CO₂e-Bilanz eines Produktes ändert sich. Gemeint sind damit nicht nur CO₂-Emissionen sondern auch Methanemissionen und weitere Einflussfaktoren. „Es lässt sich ein globaler Trend beobachten, bei dem Unternehmen immer stärker in die Pflicht genommen werden, transparent über ihre Treibhausgasemissionen Auskunft zu geben. Zudem werden diese zunehmend zu einem Wettbewerbsfaktor“, führt Aljoscha Hieronymus an, der am Fraunhofer IGCV im Themenbereich der Nachhaltigkeit arbeitet. Am naheliegendsten sei das beim Standort und Transport. „Ob ich mein Material regional beziehe oder es einfliegen lasse, hat einen Einfluss auf dessen ökologischen Fußabdruck.“

Aber auch das Herstellungsverfahren als solches kann viel oder wenig Energie verbrauchen. Im Rahmen des EU-Projekts erarbeiten Gonnermann, Hieronymus und die Kolleginnen daher nicht nur einheitliche Parameter für die Widerstandsfähigkeit von Lieferketten, sondern kategorisieren diese auch nach ihrem Energie- und Ressourcenverbrauch sowie ihrer Klimaauswirkung. »Wir werfen dabei zum Beispiel einen Blick auf die Energiemärkte in unterschiedlichen Ländern und schauen, ob der Strom dort aus erneuerbaren oder fossilen Quellen stammt. Das vereinfacht die Nachhaltigkeitsfrage für Unternehmen deutlich.«

CO₂e-Bilanz am Beispiel von Carbon-Bauteilen

Gemeinsam mit der Abteilung für Nachhaltige Fabrikplanung und -betrieb am Fraunhofer IGCV untersuchen Clemens Gonnermann und sein Team exemplarisch die CO₂e-Bilanz des Verbundwerkstoffs Carbon, der in der Luft- und Raumfahrt zum Einsatz kommt. Von der Produktion bis zum Recycling deckt das Fraunhofer IGCV dessen gesamte Wertschöpfungskette ab und berücksichtigt dabei auch die Ansprüche aus der Industrie. „Aufgrund unserer Expertise in der Forschungs- und Entwicklungsarbeit von Carbon-Composites, können wir auf umfangreiche Daten zurückgreifen. Für das ResC4EU-Projekt entwickeln wir auf dieser Basis Modelle, die unterschiedliche Fertigungsprozesse miteinander vergleichen und dabei ökologisch und ökonomisch bewerten“, erklärt Gonnermann. „Diese Berechnungen werden automatisiert und bieten dem Unternehmen im Bedarfsfall eine nachhaltige und wirtschaftlich sinnvolle Lösung.“ Die Modellierungen dienen im zweiten Schritt als Blaupause für weitere technische Verfahren und Bauteile aus anderen Industrie-sektoren.

Die ResC4EU Initiative bietet Unterstützung für KMUs aus insgesamt 14 unterschiedlichen Industrie-sektoren an, darunter Luftfahrt-, Raumfahrt- und Verteidigung, zivile Sicherheit, Mobilität (Transport- und Automobilindustrie), Erneuerbare Energien, Elektronikindustrie, digitale Industrie, Baugewerbe, Textilindustrie, Agrar- und Lebensmittelsektor, Kultur- und Kreativwirtschaft, Gesundheitssektor, Sozialwirtschaft, Einzelhandel, und Tourismus.

Um diese Bandbreite abdecken zu können, besteht das ResC4EU Konsortium aus sechs der führenden europäischen Industrieverbände und -cluster mit direkten Zugang zu bis zu 1000 KMUs in ganz Europa. Außerdem gehören dem Konsortium zwei KMUs an, eine KMU für Cluster- und Innovationsmanagement und eine KMU für digitale B2B Plattformentwicklung und -management. Das Fraunhofer IGCV und das Institut für Seeverkehrswirtschaft und Logistik (ISL) vervollständigen das Konsortium als Forschungseinrichtungen. Koordiniert wird das EU-Projekt vom deutschen Industrieverband Composites United e.V. (CU).

Die einzelnen Partner des ResC4EU-Konsortiums sind:

- CU, Composites United e.V. (Deutschland) – Koordinator
- MCN, Maritimes Cluster Norddeutschland e.V. (Deutschland)
- LITC, Lettischer IT Cluster (Lettland), ein Europäisches Digitales Innovationszentrum (EDIH, European Digital Innovation Hub)
- AIDIMME (Spanien), Technologieinstitut und Verband Innovativer Unternehmen
- PKTK, Polnisches Cluster für Verbundwerkstoffe (Polen), koordiniert von GoFar Sp.z o.o
- ATIM Cluster, Irisches Cluster für fortschrittliche Technologien in der Fertigung (Irland), koordiniert von der Technischen Universität Shannon: Midlands Midwest (TUS)
- Scaberia AS (Norwegen)
- GreenTwin GmbH (Österreich)
- ISL, Institut für Seeverkehrswirtschaft und Logistik (Deutschland)
- Fraunhofer-Gesellschaft zur Förderung der angewandten Forschung e.V. (Deutschland)

Das ResC4EU Konsortium

Das ResC4EU Konsortium wird Modelle und Tools entwickeln und bereitstellen, die KMUs bei der Erkennung und Antizipation von Störungen in ihrer Lieferkette unterstützen können. Des Weiteren werden KMUs maßgeschneiderte Unterstützungs- und Schulungsprogramme angeboten. Darüber hinaus werden KMUs aus dem verarbeitenden Gewerbe, die fortschrittliche Technologien implementieren müssen, mit technisch versierten KMUs zusammengebracht, die innovativen Lösungen für widerstandsfähigere und nachhaltigere Produktionsprozesse und Lieferketten anbieten. Die Unterstützung durch das Konsortium beginnt mit einer Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Möglichkeiten für KMUs.

Grand opening of the ResC4EU platform to support companies withstanding supply chain disruptions

30.09.2024

resc.PNG [21.35 KB]

The ResC4EU consortium proudly announces the grand opening of its ResC4EU platform, designed to support companies in making their supply chains more resilient and sustainable at this year's KOMPOZYT-EXPO®, the 13th International Trade Fair for Composite Materials, Technologies and Products, taking place from October 16-17, 2024, in Krakow, Poland.

The ResC4EU platform is made for companies across various industries with a special focus on supply chains within the composite manufacturing sectors, including aerospace, automotive, rail, shipbuilding, wind energy, building and construction, electronic, healthcare and consumer products.

Visit the ResC4EU booth (D59) to meet project partners and learn more about the ResC4EU initiative, which offers a comprehensive programme of digital tools, services, training and networking opportunities. The initiative is designed to help companies - particularly small and medium sized enterprises (SMEs) - become more resilient, sustainable and better equipped to respond quickly to supply chain disruptions such as those experienced during COVID-19 pandemic or other crises (e.g. the Suez Canal, the war in Ukraine, or flooding events).

The ResC4EU project and initiative is spearheaded by leading industry associations and clusters including Composites United e.V. (CU, Germany), the Polish Cluster of Composite Materials (PKTK, Poland), the Latvian Information Technology Cluster and European Digital Innovation Hub (LITC, Latvia), the Advanced Technology in Manufacturing Cluster (ATIM, Ireland), the Mari Cluster Northern Germany e.V. (MCN, Germany), Scaberia AS (Norway), GreenTwin GmbH (Austria), the Institute of Shipping Economics and Logistics (ISL, Germany) and the Fraunhofer Institute for Casting, Composites and Processing Technology (Fraunhofer IGC, Germany).

The grand opening of the ResC4EU platform will take place on the first day of the fair (16:30 CET, booth D59). Another highlight will be the panel discussion with Dr. Tjark von Reden, CEO of Composites United (12:00 CET, stage area). For more information about the ResC4EU project and its initiative for companies which is funded by the European Commission with €3 million, please visit the ResC4EU website at www.ResC4EU.com

Otwarcie platformy ResC4EU wspierającej firmy w walce z zakłóceniami w łańcuchu dostaw

30.09.2024

resc.PNG [21.35 KB]

Konsorcjum ResC4EU z radością ogłasza otwarcie platformy ResC4EU, zaprojektowanej w celu wspierania firm w budowaniu bardziej odpornych i zrównoważonych łańcuchów dostaw podczas tegorocznych targów KOMPOZYT-EXPO®, które odbędą się w dniach 16-17 października 2024 r. w Krakowie.

Platforma ResC4EU jest przeznaczona dla firm z różnych branż, ze szczególnym uwzględnieniem łańcuchów dostaw w sektorach produkcji kompozytów, w tym lotniczym, motoryzacyjnym, kolejowym, stoczniowym, energii wiatrowej, budowlanym, elektronicznym, opieki zdrowotnej i produktów konsumenckich.

Zapraszamy do odwiedzenia stoiska ResC4EU (D59), aby spotkać się z partnerami projektu i dowiedzieć się więcej o inicjatywie ResC4EU, która oferuje kompleksowy program narzędzi cyfrowych, usług, szkoleń i możliwości nawiązywania kontaktów. Inicjatywa ma na celu pomóc firmom - w szczególności małym i średnim przedsiębiorstwom (MŚP) - stać się bardziej odpornymi, zrównoważonymi i lepiej przygotowanymi do szybkiego reagowania na zakłócenia w łańcuchu dostaw, takie jak te doświadczane podczas pandemii COVID-19 lub innych kryzysów (np. Kanał Sueski, wojna na Ukrainie lub powódzie).

Na czele projektu i inicjatywy ResC4EU stoją wiodące stowarzyszenia i klastry branżowe, w tym Composites United e.V. (CU, Niemcy), Polski Klaster Materiałów Kompozytowych (PKTK, Polska), Lotewski Klaster Technologii Informacyjnych i Europejskie Centrum Innowacji Cyfrowych (LITC, Łotwa), Klaster Zaawansowanych Technologii w Produkcji (ATIM, Irlandia), Klaster Morski Północnych Niemiec e. V. (MCN, Niemcy), Klaster Technologii Informacyjnych i Innowacji Cyfrowych (MCN, Niemcy), V. (MCN, Niemcy), Scaberia AS (Norwegia), GreenTwin GmbH (Austria), Institute of Shipping Economics and Logistics (ISL, Niemcy) oraz Fraunhofer Institute for Casting, Composites and Processing Technology (Fraunhofer IGC, Niemcy).

Uroczyste otwarcie platformy ResC4EU odbędzie się pierwszego dnia targów (16:30, stoisko D59). Kolejną atrakcją będzie dyskusja panelowa z udziałem dr Tjark von Reden, CEO Compo United (12:00, Scena Główna).

Więcej informacji na temat projektu ResC4EU i jego inicjatywy dla firm, która jest finansowana przez Komisję Europejską w wysokości 3 milionów euro, można znaleźć na stronie internetowej ResC4EU pod adresem www.ResC4EU.com.

OSLO, Norway - Sept. 30, 2024 - [PRLog](#) -- The ResC4EU consortium proudly announces the grand opening of its ResC4EU platform, designed to support companies in making their supply chains more resilient and sustainable at this year's KOMPOZYT-EXPO®, the 13th International Trade Fair for Composite Materials, Technologies and Products, taking place from October 16-17, 2024, in Krakow, Poland.

The ResC4EU platform is made for companies across various industries with a special focus on supply chains within the composite manufacturing sectors, including aerospace, automotive, rail, shipbuilding, wind energy, building and construction, electronic, healthcare and consumer products.

Visit the ResC4EU booth (D59) to meet project partners and learn more about the ResC4EU initiative, which offers a comprehensive programme of digital tools, services, training and networking opportunities. The initiative is designed to help companies - particularly small and medium sized enterprises (SMEs) - become more resilient, sustainable and better equipped to respond quickly to supply chain disruptions such as those experienced during COVID-19 pandemic or other crises (e.g. the Suez Canal, the war in Ukraine, or flooding events).

The ResC4EU project and initiative is spearheaded by leading industry associations and clusters including Composites United e.V. (CU, Germany), the Polish Cluster of Composite Materials (PKTK, Poland), the Latvian Information Technology Cluster and European Digital Innovation Hub (LITC, Latvia), the Advanced Technology in Manufacturing Cluster (ATIM, Ireland), the Maritime Cluster Northern Germany e.V. (MCN, Germany), Scaberia AS (Norway), GreenTwin GmbH (Austria), the Institute of Shipping Economics and Logistics (ISL, Germany) and the Fraunhofer Institute for Casting, Composites and Processing Technology (Fraunhofer IGC, Germany).

The grand opening of the ResC4EU platform will take place on the first day of the fair (16:30 CET, booth D59). Another highlight will be the panel discussion with Dr. Tjark von Reden, CEO at Composites United (12:00 CET, stage area).

For more information about the ResC4EU project and its initiative for companies which is funded by the European Commission with €3 million, please visit the ResC4EU website at www.ResC4EU.com.

Below this is a large banner image featuring hot air balloons and the text 'POTEAU DAILY NEWS'. A search bar is visible on the right side of the banner. Underneath the banner is a red menu bar with various categories: News, Sports, Obituaries, Photos, PDN E-Edition, Classifieds, Antlers American E-Edition, Archives, and Best of 2024. Below the menu bar is a section for financial data, including a 'TICKER SYMBOL OR COMPANY NAME' input field, a 'GET QUOTE' button, and links for 'Recent Quotes', 'My Watchlist', and 'Indicators'. There are also tabs for 'Markets', 'Stocks', 'ETFs', and 'Tools'. The main content area displays the headline 'Grand opening of the ResC4EU platform to support companies withstanding supply chain disruptions' by PRLog, dated September 30, 2024 at 15:50 PM EDT. The article text follows, mentioning the ResC4EU consortium's announcement and the grand opening of its platform at the KOMPOZYT-EXPO® fair in Krakow, Poland. It details the platform's focus on supply chain resilience across various industries and lists the participating industry associations and clusters. The article concludes with contact information for ResC4EU Communication Manager Frank Schmull and a source attribution to Scaberia AS.

PROYECTO ResC4EU. Una iniciativa para ayudar a las empresas de la UE a mejorar la resiliencia de sus cadenas de suministro

14 marzo, 2024 mjunuez actualidad, difusión proyectos, proyectos europeos, ResC4EU

El Consorcio del proyecto **ResC4EU** (<https://cordis.europa.eu/project/id/101137643>) "Resilient Supply Chains for Europe" anuncia con orgullo el lanzamiento de su iniciativa de colaboración y apoyo a las "Cadenas de suministro resilientes para Europa" financiada por la Unión Europea con 3 millones de euros y una duración de tres años.

El propósito de esta ambiciosa iniciativa es apoyar a las empresas de la UE, especialmente a las pequeñas y medianas empresas (PYME), para que sean más resistentes y sostenibles y puedan adaptarse rápidamente a las interrupciones de la cadena de suministro, como las experimentadas durante la crisis de COVID-19 u otros conflictos o desastres en curso (por ejemplo, el cierre del Canal de Suez o la invasión de Ucrania, las inundaciones) mediante la adopción de tecnologías avanzadas.

ResC4EU proporcionará un espacio digital para la colaboración entre empresas, además de desarrollar y proporcionar modelos y herramientas que puedan ayudar a las empresas a detectar y anticiparse a las interrupciones en su cadena de suministro, y ofrecer así a las PYME apoyo y programas de formación a medida.

Otro de los objetivos es explorar oportunidades de colaboración y crear alianzas entre las PYME manufactureras tradicionales que necesitan implantar tecnologías avanzadas y las PYME expertas en tecnología que aportan soluciones innovadoras para lograr procesos más resistentes y sostenibles.

El Consorcio ha comenzado con una evaluación de las necesidades, riesgos, perturbaciones, retos y oportunidades de las PYME en distintos entornos industriales. ResC4EU reforzará la resistencia de las cadenas de suministro europeas en los 14 ecosistemas industriales más críticos de Europa según la **nueva estrategia industrial europea**: movilidad, transporte y automoción; comercio minorista; economía de proximidad y social; textil; turismo; aeroespacial y defensa; energías renovables; industrias de gran consumo energético, electrónica; digital; construcción; agroalimentación; salud; e industrias creativas y culturales.

El consorcio ResC4EU está formado por seis de las principales agrupaciones industriales europeas, junto con expertos en gestión de la innovación entre agrupaciones, expertos en tecnología y organizaciones de investigación, con un alcance directo de hasta 1.000 PYME de toda Europa y cubriendo los 14 ecosistemas industriales previstos. El proyecto está coordinado por el clúster alemán de vanguardia Composites United e.V.

El consorcio de ResC4EU está formado por: Composites United e.V. (CU, Alemania) – Coordinador; Maritime Cluster Northern Germany e.V. (MCN, Alemania); Latvian Information Technology Cluster (Letonia); un European Digital Innovation Hub; AIDIMME, Instituto Tecnológico Metalmeccánico, Mueble, Madera, Embalaje y Afines (España); Polish Cluster of Composite Materials (PKTK, Polonia), coordinado por GoFar Sp.z o.o.; Advanced Technology in Manufacturing Cluster (ATIM, Irlanda), junto con Technological University of the Shannon; Midlands Midwest (TUS, Irlanda); Scabería AS (Noruega); GreenTwin GmbH (Austria); Institute of Shipping Economics and Logistics (ISL, Alemania); Fraunhofer Society e.V. (Alemania).

SUPPLY CHAINS & LOGISTICS 2024

Strengthen resilient supply chains through clustering

Caitríona Mordan
atim Cluster Manager

Boosting innovation and supply chain resilience in Ireland's manufacturing, with industry-driven services, can enhance global competitiveness.

The Advanced Technologies in Manufacturing (atim) Cluster, funded by Enterprise Ireland, is playing a crucial role in enhancing supply chain resilience within Ireland's manufacturing sector. Hosted by the Technological University of the Shannon (TUS) Midlands Campus, the cluster has expanded rapidly since its 2021 launch, now boasting over 70 members from various industries, including engineering, machinery, polymer processing and digital solutions.

Growth and sustainability strategies

Focused on boosting innovation, competitiveness and sustainable growth, the cluster provides 19 industry-driven services across six strategic pillars: collaboration, digitalisation, talent development, R&D, sustainability and internationalisation. These services support members in adopting digital technologies, improving skills, accessing knowledge, forging business connections and securing funding for global expansion.

A core element of the cluster's mission is strengthening supply chains by identifying critical links in the value chain and fostering collaboration among stakeholders. A recent survey revealed that 94% of members successfully connected with others through this network, driving business growth.

"The cluster provides 19 industry-driven services across six strategic pillars"

Now in its third year, the cluster continues to support its members with specialised sub-groups focusing on sustainability, internationalisation and innovation projects valued at €1.9 million. Over 3,500 participants have engaged in its events and workshops, and more than 400 business-to-business connections have been facilitated. Additionally, a dedicated sub-group helps members prepare for the Corporate Social Responsibility Directive (CSRD), fostering a community of practice that promotes best practices.

Supply chain resilience and competitiveness

One of its flagship initiatives, ResC4EU – a €3 million EU-funded project – assists SMEs in adapting to supply chain disruptions by offering tools for detection and anticipation. The cluster represents Irish SMEs in this project, linking them with material and technology providers to mitigate risks.

Another key project, PolymerConnect, led in partnership with the Northern Ireland Polymer Association (NIPA) and Ibec, aims to map over 350 polymer companies across Ireland. This initiative seeks to address challenges like the circular economy and boost innovation and competitiveness in the polymer sector.

The atim cluster continues to be a crucial catalyst for the economic growth and global competitiveness of Ireland's manufacturing sector, offering unique services and innovative approaches to tackle complex challenges and build resilient supply chains.

Polska prezentuje innowacje w technologiach kompozytowych na Global Industry w Paryżu
(Poland presents innovations in composite technologies at Global Industry in Paris)

<https://kompozyty.net/polska-prezentuje-innowacje-w-technologiach-kompozytowych-na-global-industry-w-paryzu/>

Z kolei OFFSHORE Project, dostępny pod adresem www.offshore-project.eu, koncentruje się na wykorzystaniu technologii kompozytowych w sektorze morskim i offshore, co ma kluczowe znaczenie dla przyszłości zrównoważonej energii i inżynierii morskiej.

Zachęcił małe i średnie przedsiębiorstwa (MŚP) do aktywnego udziału w tych przedsięwzięciach, podkreślając, że jest to doskonała okazja do wymiany doświadczeń, nawiązania nowych kontaktów biznesowych i wspólnego dążenia do realizacji ambitnych celów, które stawia przed sobą Polski Klaster Technologii Kompozytowych.

Obecność i prezentacje na Global Industry w Paryżu są dowodem na to, że polski sektor technologii kompozytowych dynamicznie się rozwija i zyskuje uznanie na arenie międzynarodowej. Jest to także sygnał dla MŚP, że dzięki współpracy i zaangażowaniu w projekty takie jak ResC4EU i OFFSHORE Project, mogą one znacząco przyczynić się do rozwoju innowacyjnych technologii i zrównoważonego przemysłu na skalę globalną.

Otwarcie platformy RESC4EU wspierającej firmy w walce z zakłóceniami w łańcuchu dostaw

7 października 2024  Andrzej Czulak

Platforma RESC4EU zostanie oficjalnie otwarta podczas 13. Międzynarodowych Targów KOMPOZYT-EXPO®, które odbędą się w dniach 16-17 października 2024 roku w Krakowie. Platforma została zaprojektowana, aby wspierać przedsiębiorstwa w budowaniu bardziej odpornych i zrównoważonych łańcuchów dostaw, szczególnie w sektorach takich jak lotnictwo, motoryzacja, energetyka wiatrowa, elektronika i wiele innych.

Wydarzenie będzie nie tylko okazją do poznania funkcji platformy, ale także do uczestnictwa w panelu dyskusyjnym, który odbędzie się 16 października o godzinie 12:00 na scenie targowej. Główne otwarcie platformy RESC4EU będzie miało miejsce tego samego dnia o godzinie 16:30 na stoisku D59.

Zapraszamy wszystkie firmy z branży kompozytowej, a szczególnie małe i średnie przedsiębiorstwa, które chcą lepiej reagować na kryzysy i zakłócenia w łańcuchach dostaw.

Więcej szczegółów można znaleźć na stronach targów KOMPOZYT-EXPO(Kompozyt-Expo)([PRLog](#)).

W obliczu globalnych wyzwań, takich jak pandemia czy kryzys energetyczny, stabilność łańcucha dostaw stała się jednym z kluczowych zagadnień dla firm na całym świecie. W odpowiedzi na te wyzwania powstała innowacyjna platforma RESC4EU, której celem jest wspieranie przedsiębiorstw w minimalizowaniu zakłóceń w łańcuchu dostaw oraz wzmacnianie ich odporności na kryzysy.

Platforma RESC4EU zostanie oficjalnie otwarta 20 października 2024 roku podczas uroczystej konferencji w Warszawie, w Centrum Konferencyjnym przy ul. Prostej 50. Wydarzenie będzie doskonałą okazją do zapoznania się z funkcjami platformy, wzięcia udziału w panelach dyskusyjnych oraz wymiany doświadczeń z innymi przedsiębiorcami z branży.

Kluczowe funkcje platformy RESC4EU:

- Monitoring ryzyka:** Narzędzie do śledzenia zagrożeń w czasie rzeczywistym, które mogą wpłynąć na funkcjonowanie łańcucha dostaw, takich jak zmiany cen surowców czy trudności logistyczne.
- Optymalizacja procesów:** Funkcje wspierające planowanie, zarządzanie zasobami i dostosowanie strategii do zmieniających się warunków rynkowych.
- Analiza danych:** Zaawansowane algorytmy analizy danych pomagają w identyfikacji potencjalnych zagrożeń oraz w podejmowaniu szybkich, strategicznych decyzji.
- Wzmacnianie odporności:** Narzędzia umożliwiające firmom budowanie bardziej elastycznych łańcuchów dostaw, odpornych na kryzysy i zakłócenia.

Platforma jest dedykowana nie tylko dużym przedsiębiorstwom, ale także małym i średnim firmom, które często najbardziej odczuwają skutki globalnych zawirowań. Dzięki RESC4EU mogą one lepiej radzić sobie z nieprzewidywanymi sytuacjami i wzmacniać swoją pozycję na rynku.

Dlaczego platforma RESC4EU jest ważna dla branży kompozytów?

Branża kompozytów, która w dużej mierze opiera się na globalnych dostawach surowców oraz specjalistycznych komponentach, jest szczególnie narażona na zakłócenia w łańcuchach dostaw. W przypadku wstrzymania dostaw lub opóźnień, produkcja zaawansowanych materiałów kompozytowych może być poważnie zagrożona. Dlatego RESC4EU może okazać się kluczowym narzędziem wspierającym firmy z tego sektora w utrzymaniu płynności operacyjnej i minimalizacji strat.

Platforma RESC4EU to nie tylko wsparcie technologiczne, ale także baza wiedzy i najlepszych praktyk w zarządzaniu łańcuchem dostaw. Firmy z branży kompozytowej mogą dzięki niej zyskać większą pewność w obliczu globalnych wyzwań oraz skuteczniej reagować na dynamicznie zmieniające się warunki rynkowe.

Zaproszenie na otwarcie

Serdecznie zapraszamy wszystkie firmy z branży kompozytowej, a także przedsiębiorców z innych sektorów na uroczyste otwarcie platformy RESC4EU, które odbędzie się 20 października 2024 roku w Warszawie. To wyjątkowa okazja, aby dowiedzieć się, jak innowacyjne narzędzia mogą pomóc w budowaniu stabilnych i odpornych łańcuchów dostaw.

Więcej informacji na temat wydarzenia oraz rejestracji można znaleźć na stronie [kompozyt-expo.pl](#).

ResC4EU to Strengthen Company Resilience Against Supply Chain Disruptions

ResC4EU, a groundbreaking project and initiative funded by the European Union with a budget of 3 million euros (approximately 13 million Polish złoty), aims to empower companies, especially small and medium-sized enterprises (SMEs), to withstand supply chain disruptions and enhance their resilience. The project is a timely response to challenges posed by events like the COVID-19 pandemic, geopolitical tensions, and crises such as the Suez Canal blockage and major natural disasters. By promoting the adoption of advanced technologies, ResC4EU seeks to make companies more adaptable to such disruptions.

Supply chain disruptions are a significant risk to manufacturing companies, often leading to costly production downtime, fines or penalties. These disruptions can affect every part of the supply chain - from the procurement of raw materials to manufacturing processes and product delivery. Strengthening supply chains can reduce these risks and not only saves costs but also helps businesses maintain production, meet customer demand, and improve overall customer satisfaction - a competitive advantage in today's rapidly changing market.

ResC4EU provides SMEs with a collaborative space facilitated by key industry associations and clusters. The project offers digital tools to detect and anticipate supply chain disruptions, alongside tailored training and support programs. By fostering partnerships between traditional manufacturing SMEs and tech-savvy businesses, ResC4EU will help companies adopt innovative technologies to enhance their supply chain resilience.

With the goal of supporting at least 500 SMEs, training 2,000 employees, and facilitating 300 bu-

ResC4EU Wzmocnienie odporności firm na zakłócenia w łańcuchach dostaw

ResC4EU to przełomowy projekt finansowany przez Unię Europejską z budżetem 3 milionów euro (około 13 milionów złotych). Jego celem jest wsparcie firm, szczególnie małych i średnich przedsiębiorstw (MŚP), w radzeniu sobie z zakłóceniami w łańcuchach dostaw oraz wzmocnienie ich odporności na tego typu wyzwania. Projekt odpowiada na problemy wynikające z sytuacji takich jak pandemia COVID-19, napięcia geopolityczne, blokada Kanału Sueskiego czy klęski żywiołowe. Poprzez wprowadzenie zaawansowanych technologii, ResC4EU ma na celu uczynić firmy bardziej elastycznymi i odpornymi na te zakłócenia.

Zakłócenia w łańcuchach dostaw mogą prowadzić do przestoju, kar lub nawet strat finansowych, wpływając na różne etapy produkcji - od dostaw surowców po dostarczenie gotowych produktów. Silniejsze łańcuchy dostaw pomagają zredukować te ryzyka, co przekłada się na niższe koszty, utrzymanie produkcji, zadowolenie klientów i zwiększenie konkurencyjności.

ResC4EU oferuje MŚP platformę do współpracy, zarządzaną przez kluczowe stowarzyszenia przemysłowe i klastry. Projekt dostarcza cyfrowe narzędzia do monitorowania i przewidywania zakłóceń w łańcuchach dostaw, a także programy szkoleniowe dopasowane do indywidualnych potrzeb firm. Dzięki współpracy między MŚP a firmami technologicznymi.

ResC4EU wspiera wdrażanie innowacyjnych rozwiązań, które zwiększają odporność firm.

business collaborations, ResC4EU is poised to have a significant impact on European industry.

At this year's KOMPOZYT-EXPO*, the 13th International Trade Fair for Composite Materials, Technologies and Products, taking place from October 16-17, 2024, in Krakow, Poland, the ResC4EU consortium will officially launch its 'ResC4EU platform', a digital platform, designed to support companies in building more resilient and sustainable supply chains. The platform caters to various industries with a special focus on sectors related to composite manufacturing, including aerospace, automotive, rail, shipbuilding, wind energy, building and construction, electronic, healthcare and consumer products.

Initially, the platform's B2B marketplace will be launched, allowing companies to list raw materials, components, semi-finished products, goods and services, free of charge. Future expansions will include more advanced tools and features.

The ResC4EU project and initiative is led by a consortium of prominent European industry associations and clusters, including the Polish Cluster of Composite Materials (PKTK), Composites United e.V. (Germany), the Latvian Information Technology Cluster (LITC), the Advanced Technology in Manufacturing Cluster (Ireland), the Maritime Cluster Northern Germany e.V. (MCN), Scaberia AS (Norway), GreenTwin GmbH (Austria), the Institute of Shipping Economics and Logistics (ISL, Germany), and the Fraunhofer Institute for Casting, Composites, and Processing Technology (IGCV, Germany).

Projekt zakłada wsparcie dla 500 MŚP, przeszkolenie 2000 pracowników oraz stworzenie 300 nowych partnerstw biznesowych. W październiku 2024 roku, podczas targów KOMPOZYT-EXPO* w Krakowie, ResC4EU oficjalnie uruchomi swoją cyfrową platformę, która pomoże firmom zbudować bardziej odporne i zrównoważone łańcuchy dostaw, z naciskiem na branże takie jak lotnictwo, motoryzacja, energetyka wiatrowa i budownictwo.

Na początek platforma zaoferuje rynek B2B, gdzie firmy będą mogły bezpłatnie wystawiać swoje surowce, komponenty i usługi. W przyszłości planowane są dalsze rozszerzenia funkcjonalności.

Projekt ResC4EU prowadzony jest przez konsorcjum czołowych europejskich organizacji, w tym Polski Klaster Technologii Kompozytowych (PKTK), Composites United e.V. (Niemcy), Łotewski Klaster Technologii Informatycznych (LITC), Advanced Technology in Manufacturing Cluster (Irlandia), Maritime Cluster Northern Germany e.V. (MCN), Scaberia AS (Norwegia), GreenTwin GmbH (Austria), Institute of Shipping Economics and Logistics (ISL, Niemcy) oraz Fraunhofer Institute for Casting, Composites, and Processing Technology (IGCV, Niemcy).

Summary of the 13th International Trade Fair KOMPOZYT EXPO®

<https://kompozyt-expo.pl/en/about-the-fair/previous-editions/kompozyt-expo-2024>

Home > About the fair > Previous editions > **KOMPOZYT-EXPO® 2024**

Summary of the 13th International Trade Fair KOMPOZYT-EXPO®

- Krakow's KOMPOZYT-EXPO® is one of our favorite events of the year—two days full of inspiring conversations - commented Szymon Skorupski from Fanum.

The 13th edition of the International Trade Fair for Composite Materials, Technologies and Products KOMPOZYT-EXPO® took place on 16-17 October 2024 at EXPO Kraków, gathering 84 exhibitors and 2,518 visitors.

Innovations in the spotlight

This year, after a few years' break, the KOMPOZYT-EXPO® product and technology competition returned, awarding prizes for the best products and technologies.

The jury selected two winners. In the product category, the award went to SAERTEX GmbH & Co. KG for their SAERcore® product for closed-mold injection processes, such as RTM (Resin Transfer Moulding), RTM light, and infusion processes. In the technology category, the winners were the Silesian University of Technology's Faculty of Materials Engineering and Złotecki Sp. z o.o., for their innovative method of manufacturing an internal combustion engine piston reinforced with a locally placed Al/SiCp composite insert, shaped through centrifugal casting.

The only event for the composite industry in Poland

KOMPOZYT-EXPO® is the only trade fair in Poland, and the largest in Central and Eastern Europe, dedicated to the composite materials industry. With a highly specialized scope, the fair attracts a focused audience well-versed in the topic of composites.

- The visitors are people who are genuinely looking for solutions. That's a win for us, as it allows us to truly engage and establish productive partnerships. We're pleased with the turnout and the actionable insights we gained here. There were specific questions, and now we have specific tasks to tackle - shared Dariusz Adamczak, CEO of Basalttech Sp. z o.o.

KOMPOZYT-EXPO® attracts new projects

The event included the final of the AMULET project and the launch of the ResC4EU platform. Several international clusters, consortia, and associations attended, including Composites United e.V., the Polish Cluster of Composite Materials, the Latvian Information Technology Cluster, the European Digital Innovation Hub, and the Bydgoszcz Industrial Cluster – Tool Valley.

As is tradition, the "Science for Industry" booth presented R&D collaboration opportunities with participation from AGH University of Science and Technology in Krakow, the Technology Transfer Center of the Krakow University of Technology, the Central Mining Institute - National Research Institute, Lodz University of Technology, Silesian University of Technology, Warsaw University of Technology, Wrocław University of Science and Technology, and the West Pomeranian University of Technology in Szczecin.

Several student science clubs also presented innovative projects, including a hydrogen-powered car, a solar-powered boat, racing cars, and motorcycles.

International Consortium Launches Initiative to support EU businesses to Enhance Resilient Supply Chains for Europe

<https://composites-united.com/en/international-consortium-launches-initiative-to-support-eu-businesses-to-enhance-resilient-supply-chains-for-europe/>

Oslo, Norway, 9 March 2024 – The ResC4EU Consortium proudly announces the launch of its collaboration and support initiative “Resilient Supply Chains for Europe” (ResC4EU) funded by the European Union with 3 million Euros.

The purpose of this ambitious three-year initiative is to support EU businesses, especially small and medium sized enterprises (SMEs), to become more resilient and sustainable and be able to quickly adapt to supply chain disruptions such as experienced during COVID-19 crisis or other ongoing conflicts or disasters (e.g. Suez Channel closure, Ukraine war, floodings) by adopting advanced technologies.

The ResC4EU will provide an open space for collaboration, develop and provide models and tools that can assist companies in detecting and anticipating disruptions in their supply chain, and offering SMEs tailored support and training programmes as part of the ResC4EU Net-Zero Industry Academies.

Another focus is to explore collaboration opportunities and building alliances among traditional manufacturing SMEs in need of implementing advanced technologies and tech-savvy SMEs providing innovative solutions for more resilient and sustainable processes.

The Consortium will start with an assessment of the needs, risks, disruptions, challenges and opportunities for SMEs.

ResC4EU will bolster the resilience of European supply chains in Europe's most critical industrial ecosystems: mobility, transport & automotive; retail, proximity & social economy; textiles; tourism; aerospace & defence; renewable energy; energy-intensive industries, electronics; digital; construction; agri-food; health; and creative & cultural industries.

The ResC4EU consortium comprises six of Europe's leading industry clusters, one inter-cluster and innovation management expert (SME), one tech-savvy SME and two research organisations with a direct outreach to up to 1000 SMEs across Europe and covering all envisaged 14 industrial ecosystems. The project will be coordinated by the German Leading-edge Cluster Composites United e.V.

The ResC4EU consortium partners are:

- Composites United e.V. (CU, Germany) – Coordinator
- Maritime Cluster Northern Germany e.V. (MCN, Germany)
- Latvian Information Technology Cluster (Latvia), a European Digital Innovation Hub
- AIDIMME (Spain), Technology Institute and Innovative Business Association
- Polish Cluster of Composite Materials (PKTK, Poland), coordinated by GoFar Sp. z o.o.
- Advanced Technology in Manufacturing Cluster (ATIM, Ireland), facilitated by Technological University of the Shannon, Midlands Midwest (TUS)
- Scaberia AS (Norway)
- Greentwin GmbH (Austria)
- Institute of Shipping Economics and Logistics (ISL, Germany)
- Fraunhofer Society e.V. (Germany)

Internationales Konsortium mit Norwegen als Mitglied unterstützt KMU bei Schaffung widerstandsfähiger Lieferketten

<https://composites-united.com/internationales-konsortium-mit-norwegen-als-mitglied-unterstuetzt-kmu-bei-schaffung-widerstandsfaehiger-lieferketten/>

Oslo, Norwegen, 9. März 2024. Zehn Unternehmen, Verbände und Institutionen aus sieben Ländern haben sich zu einem Konsortium zusammengeschlossen, um EU- und EFTA-Unternehmen, insbesondere kleine und mittelständische Unternehmen (KMU), dabei zu unterstützen, mittels fortschrittlicher Technologien widerstandsfähiger und nachhaltiger zu werden und sich schnell an Unterbrechungen der Lieferkette anzupassen. Die EU finanziert die Initiative „Resilient Supply Chains for Europe“ (ResC4EU) des ResC4EU-Konsortiums mit drei Millionen Euro. Das Projekt ist auf drei Jahre angelegt. Norwegen ist durch die Firma Scaberia AS vertreten.

Das ResC4EU-Konsortium wird Modelle und Tools entwickeln und bereitstellen, die Unternehmen bei der Erkennung und Antizipation von Störungen in ihrer Lieferkette unterstützen können. Kleinen und mittelständischen Unternehmen werden im Rahmen der ResC4EU Net Zero Industrie Akademien maßgeschneiderte Unterstützungs- und Schulungsprogramme angeboten.

Ein weiterer Schwerpunkt der Initiative liegt auf der Erkundung von Kooperationsmöglichkeiten und dem Aufbau von Allianzen zwischen traditionellen KMU im verarbeitenden Gewerbe, die fortschrittliche Technologien implementieren müssen, und technisch versierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse anbieten. Die Unterstützung durch das Konsortium beginnt mit einer Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU.

Das ResC4EU-Konsortium bietet Unterstützung in folgenden Bereichen: Mobilität, Transport und Automobil, Einzelhandel, Sozialwirtschaft, Textilindustrie, Tourismus, Luft- und Raumfahrt & Verteidigung, erneuerbare Energien, energieintensive Industrien, Elektronik, Digital, Konstruktion, Agrarwirtschaft, Gesundheitswirtschaft sowie Kreativ- und Kulturindustrie.

Das Konsortium besteht aus sechs der führenden Industriecluster Europas, einem Cluster- und Innovationsmanagement-Experten (KMU), einem technisch versierten KMU und zwei Forschungsorganisationen mit direktem Kontakt zu bis zu 1000 KMU in ganz Europa. Koordiniert wird das Projekt vom deutschen Spitzencluster Composites United e.V.

Die einzelnen Partner des ResC4EU-Konsortiums sind:

- CU – Composites United e.V. (Deutschland) – Koordinator
- MCN – Maritimer Cluster Norddeutschland e.V. (Deutschland)
- LITC – Lettischer Informationstechnologie-Cluster (Lettland), ein europäisches digitales Innovationszentrum (EDIH, European Digital Innovation Hub)
- AIDIMME – Technologieinstitut und Verband Innovativer Unternehmen (Spanien)
- PKTK – Polnischer Cluster für Verbundwerkstoffe (Polen), koordiniert von GoFar Sp.z o.o
- ATIM – Irisches Cluster für fortschrittliche Technologien in der Fertigung (Irland), koordiniert von der Technischen Universität Shannon: Midlands Midwest (TUS)

ResC4EU – Resilient Supply Chains for Europe

ResC4EU is a collaboration project and initiative funded by the European Union with 3 million Euros. It aims to support EU businesses, particularly Small and Medium sized enterprises (SMEs), in becoming more resilient and sustainable and be able to quickly adapt to supply chain disruptions such as experienced during COVID-19 crisis, geopolitical tensions or disasters (e.g. Suez Channel closure, floodings, strikes) by adopting advanced technologies.

ResC4EU will provide an open space for collaboration facilitated by Industry clusters, develop and provide models and tools that can assist SMEs in detecting and anticipating disruptions in their supply chains, and offering SMEs tailored support and training programs as part of the ResC4EU Net-Zero Industry Academies. Further, manufacturing SMEs in need of implementing advanced technologies will be brought together with tech-savvy SMEs providing innovative solutions.

Project objectives – what we want to achieve

- Developing and offering tools that can be used by manufacturing SMEs for identification and mitigation of supply chain risk and disruptions.
- Offering an open space for training of manufacturing SMEs and networking with tech-savvy SMEs.
- Accelerating Advanced Technologies in manufacturing SMEs.
- Demonstrating the benefits of supply chain resilience while also deriving improvements in sustainability (i.e. GHGs emission reduction, energy savings, resource savings).
- Increasing public understanding on resilient supply chains and advanced technologies as solutions for making EU businesses more resilient and sustainable.

Project Consortium

ResC4EU is led by a consortium of 10 robust partners from 7 European countries. It includes 6 of Europe's foremost industry associations and clusters, representing over 1000 SMEs across 14 European industrial sectors and spanning 5 European countries. Additionally, the consortium features 2 SMEs specializing in inter-cluster and innovation management, as well as B2B platform development. Two research organizations specializing in logistics, supply chain risk modelling, and product life-cycle assessment complete the consortium. The ResC4EU project is coordinated by Composites United.

ISL ist Teil des kürzlich gestarteten EU-Projekts zur Stärkung der Lieferkettenresilienz in Europa.

<https://www.isl.org/isl-ist-teil-des-kuerzlich-gestarteten-eu-projekts-zur-staerkung-der-lieferkettenresilienz-europa>

ISL ist Teil des kürzlich gestarteten EU-Projekts zur Stärkung der Lieferkettenresilienz in Europa

Das ISL freut sich, Teil des ResC4EU-Konsortiums "Resilient Supply Chains for Europe" zu sein, welches von der Europäischen Union mit einer Finanzierung von 3 Millionen Euro unterstützt wird. Das dreijährige Projekt zielt darauf ab, europäischen Unternehmen, insbesondere kleinen und mittleren Unternehmen (KMU), zu helfen, ihre Resilienz und Nachhaltigkeit zu stärken sowie sich besser an Unterbrechungen in den Lieferketten anpassen zu können. Solche Unterbrechungen traten beispielsweise während der COVID-19-Krise sowie anderen anhaltenden Konflikten oder Katastrophen auf, wie etwa die Blockade des Suezkanals, der Ukraine-Konflikt oder Überschwemmungen.

ResC4EU wird einen offenen Raum für Zusammenarbeit schaffen, um Unternehmen bei der Erkennung und Vorhersage von Störungen in ihren Lieferketten zu unterstützen. Dies umfasst die Entwicklung und Bereitstellung von Modellen und Tools. Darüber hinaus werden im Rahmen der ResC4EU Net-Zero Industry Academies maßgeschneiderte Unterstützungs- und Schulungsprogramme speziell für KMU angeboten.

Ein weiterer Schwerpunkt liegt darauf, die Kooperationsmöglichkeiten zu erforschen und Allianzen zwischen traditionellen KMU im Fertigungsbereich, die fortschrittliche Technologien implementieren müssen, und technologieorientierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse bereits bereitstellen, aufzubauen.

Das ISL hat hier die Aufgabe übernommen Algorithmen und modellhafte Tools zu entwickeln mit den die Resilienz in Lieferketten von KMU erfasst und verbessert werden kann.

Das Konsortium führt eine umfassende Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU durch. ResC4EU wird die Widerstandsfähigkeit der europäischen Lieferketten in kritischen industriellen Ökosystemen Europas stärken, darunter Mobilität, Verkehr und Automobilindustrie, Einzelhandel, Nähe und soziale Ökonomie, Textilien, Tourismus, Luft- und Raumfahrt sowie Verteidigung, erneuerbare Energien, energieintensive Branchen, Elektronik, Digital, Bauwesen, Agrar- und Lebensmittelindustrie, Gesundheitswesen sowie kreative und kulturelle Industrien.

Das ResC4EU-Konsortium, koordiniert vom deutschen Spitzencluster Composites United e.V., besteht aus sechs führenden Industrieclustern Europas, einem Intercluster- und Innovationsmanagement-Experten, einem technologiebewussten KMU und zwei Forschungsorganisationen. Diese Struktur bietet direkten Zugang zu bis zu 1000 KMU in ganz Europa. Das Konsortium deckt alle 14 vorgesehenen industriellen Ökosysteme ab, was auf eine breite Expertise und Reichweite hindeutet.

Resilient Supply Chains for Europe

The ResC4EU project, supported by the EU with €3 million, focuses on helping European companies, especially SMEs, to strengthen their resilience and sustainability and to adapt to supply chain disruptions. It promotes collaboration, provides customised support for SMEs and explores opportunities for cooperation between different industrial sectors. Through the collaboration of six of Europe's leading industrial clusters and other experts, the consortium covers all 14 industrial ecosystems to make European supply chains more resilient. ISL has taken on the task of developing algorithms and modelling tools to measure and improve resilience in SME supply chains.

Project objective:

- ~ Risk analysis and alarm models for supply chains: Development of models to identify and predict disruptions in industrial ecosystems.
- ~ Building a European value network: Promoting clustering and strategic alliances to strengthen supply chains and SMEs.
- ~ Utilising advanced technologies: Accelerating the integration of sustainable and resilient practices in SMEs.
- ~ Demonstrating resilience and sustainability: demonstrating the climate neutrality and stability of economic processes in industrial ecosystems.

Press Release

Bremen, 12.03.2024

ISL is part of the new EU project launched to strengthen supply chain resilience in Europe

ResC4EU: Strengthening the resilience and sustainability of European supply chains through innovative technologies and cross-industry collaboration

ISL is delighted to be part of the ResC4EU consortium "Resilient Supply Chains for Europe", which is supported by the European Union with funding of 3 million euros. The three-year project aims to help European companies, especially small and medium-sized enterprises (SMEs), to strengthen their resilience and sustainability and to adapt quickly to disruptions in supply chains. Such disruptions occurred, for example, during the COVID-19 crisis as well as other ongoing conflicts or disasters, such as the blockade of the Suez Canal, the Ukraine conflict or floods.

The ResC4EU will provide an open space for collaboration, develop and provide models and tools that can assist companies in detecting and anticipating disruptions in their supply chain, and offering SMEs tailored support and training programmes as part of the ResC4EU Net-Zero Industry Academies.

Another focus is to explore collaboration opportunities and building alliances among traditional manufacturing SMEs in need of implementing advanced technologies and tech-savvy SMEs providing innovative solutions for more resilient and sustainable processes.

ISL has the task to develop algorithm and exemplary tools to comprehend and enhance the resilience of supply chains of SME.

The Consortium will start with an assessment of the needs, risks, disruptions, challenges and opportunities for SMEs. ResC4EU will bolster the resilience of European supply chains in Europe's most critical industrial ecosystems: mobility, transport & automotive, retail, proximity & social economy, textiles, tourism, aerospace & defence, renewable energy, energy-intensive industries, electronics, digital, construction, agri-food, health, and creative & cultural industries.

The ResC4EU consortium comprises six of Europe's leading industry clusters, one intercluster and innovation management expert (SME), one tech-savvy SME and two research organisations with a direct outreach to up to 1000 SMEs across Europe and covering all envisaged 14 industrial ecosystems. The project will be coordinated by the German Leading-edge Cluster Composites United e.V.

ResC4EU: Resiliente Lieferketten für Europa

Das Maritime Cluster Norddeutschland (MCN) ist Partner des Anfang 2024 gestarteten EU-Konsortiums „Resilient Supply Chains for Europe“ (ResC4EU), das mit einer Förderung von 3 Millionen Euro über drei Jahre von der EU unterstützt wird. ResC4EU zielt darauf ab, europäische Unternehmen, insbesondere kleine und mittelständische Unternehmen (KMU), dabei zu unterstützen, mittels fortschrittlicher Technologien widerstandsfähiger und nachhaltiger zu werden sowie sich schnell an Unterbrechungen der Lieferkette anzupassen. Solche Unterbrechungen treten beispielsweise durch die Schließung des Suez-Kanals, den Ukraine-Konflikt oder Überschwemmungen auf.

„In den vergangenen Jahren hat sich für die maritime Industrie neben der Energiesicherheit auch die Resilienz als bedeutende Herausforderung erwiesen. Mit ResC4EU adressieren wir daher ein hochrelevantes Thema für die Branche“, erklärt Oliver Malmström, Projektmanager beim MCN. „Die Ergebnisse dieses Projekts sind darauf ausgerichtet, Unternehmen in Europa wertvolle Unterstützung zu bieten. Ich freue mich, dass wir Teil dieses Vorhabens sind und einen Beitrag zur Stärkung der Resilienz in der Industrie leisten können.“

Das Projekt wird einen offenen Raum für die internationale Zusammenarbeit schaffen und Modelle sowie Tools entwickeln und bereitstellen, um Unternehmen bei der Erkennung und Vorhersage von Störungen in ihrer Lieferkette zu unterstützen. Maßgeschneiderte Unterstützungs- und Schulungsprogramme für KMU sind im Rahmen der ResC4EU Net-Zero Industrie Akademien geplant.

Ein weiterer Schwerpunkt liegt darauf, Kooperationsmöglichkeiten zu erkunden und Allianzen zwischen traditionellen KMU, die fortschrittliche Technologien implementieren müssen, und technologieorientierten KMU, die innovative Lösungen für widerstandsfähigere und nachhaltigere Prozesse bereits bereitstellen, aufzubauen.

ResC4EU wird eine umfassende Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Chancen für KMU durchführen und die Resilienz der Lieferketten in verschiedenen europäischen Industriezweigen stärken, darunter Mobilität, Verkehr und Automobilindustrie; Einzelhandel; Sozialwirtschaft; Textilindustrie; Tourismus; Luft- und Raumfahrt sowie Verteidigung; erneuerbare Energien; energieintensive Branchen, Elektronik; Digital; Bauwesen; Agrarwirtschaft; Gesundheitswesen; sowie Kreativ- und Kulturindustrie.

Das ResC4EU-Konsortium besteht aus sechs führenden Industrieclustern Europas, einem Cluster- und Innovationsmanagement-Experten (KMU), einem technisch versierten KMU und zwei Forschungseinrichtungen. Das Projekt wird vom deutschen Spitzencluster Composites United e.V. koordiniert.

Über das Maritime Cluster Norddeutschland

Das Maritime Cluster Norddeutschland (MCN) fördert und stärkt die Zusammenarbeit in der norddeutschen maritimen Branche. Es ermöglicht Plattformen des Dialogs der Akteure untereinander und fördert Innovation und Schnittstellen zu anderen Branchen. Mit Geschäftsstellen in Bremen, Hamburg, Mecklenburg-Vorpommern, Niedersachsen und Schleswig-Holstein ist das MCN präsent und kooperiert mit den Akteuren vor Ort. Es unterstützt unter anderem bei der Suche nach Innovationspartner:innen, informiert zu Förderprogrammen und vermittelt Kontakte in die maritime Branche. Mehr als 350 Unternehmen und Institutionen aus Wirtschaft, Wissenschaft und Politik sind Mitglied im MCN. Insgesamt acht Fachgruppen koordiniert das MCN zu den Themen Innovationsmanagement, Maritime Informations- und Kommunikationstechnologien, Maritimes Recht, Maritime Sicherheit, Maritime Wirtschaft, Offshore Wind, Personal und Qualifizierung, Schiffeffizienz sowie Unterwasserkommunikation.

Das Maritime Cluster Norddeutschland wurde 2011 gegründet. Zunächst arbeiteten die Länder Hamburg, Niedersachsen und Schleswig-Holstein in dem länderübergreifenden Cluster zusammen, im September 2014 kamen auch Bremen und Mecklenburg-Vorpommern hinzu. Seit 2017 agiert das MCN als Verein.

International Consortium Launches Initiative to support EU businesses to Enhance Resilient Supply Chains for Europe.

<https://www.itbaltic.com/single-post/international-consortium-launches-initiative-to-support-eu-businesses-to-enhance-resilient-supply-ch>

International Consortium Launches Initiative to support EU businesses to Enhance Resilient Supply Chains for Europe

The **ResC4EU** Consortium proudly announces the launch of its collaboration and support initiative *"Resilient Supply Chains for Europe"* (ResC4EU) funded by the European Union with 3 million Euros.

The purpose of this ambitious three-year initiative is to support EU businesses, especially small and medium sized enterprises (SMEs), to become more resilient and sustainable and be able to quickly adapt to supply chain disruptions such as experienced during COVID-19 crisis or other ongoing conflicts or disasters (e.g. Suez Channel closure, Ukraine war, floodings) by adopting advanced technologies.

The **ResC4EU** will provide an open space for collaboration, develop and provide models and tools that can assist companies in detecting and anticipating disruptions in their supply chain, and offering SMEs tailored support and training programmes as part of the **ResC4EU** Net-Zero Industry Academies.

Another focus is to explore collaboration opportunities and building alliances among traditional manufacturing SMEs in need of implementing advanced technologies and tech-savvy SMEs providing innovative solutions for more resilient and sustainable processes.

The Consortium will start with an assessment of the needs, risks, disruptions, challenges and opportunities for SMEs.

ResC4EU will bolster the resilience of European supply chains in Europe's most critical industrial ecosystems: mobility, transport & automotive; retail; proximity & social economy; textiles; tourism; aerospace & defence; renewable energy; energy-intensive industries, electronics; digital; construction; agri-food; health; and creative & cultural industries.

The **ResC4EU** consortium comprises six of Europe's leading industry clusters, one inter-cluster and innovation management expert (SME), one tech-savvy SME and two research organisations with a direct outreach to up to 1000 SMEs across Europe and covering all envisaged 14 industrial ecosystems. The project will be coordinated by the German Leading-edge Cluster Composites United e.V.

The **ResC4EU** consortium partners are:

- Composites United e.V. (CU, Germany) - Coordinator
- Maritime Cluster Northern Germany e.V. (MCN, Germany)
- Latvian Information Technology Cluster (Latvie), a European Digital Innovation Hub
- AIDIMME (Spain), Technology Institute and Innovative Business Association
- Polish Cluster of Composite Materials (PKTK, Poland), coordinated by GoFar Sp. z o.o.
- Advanced Technology in Manufacturing Cluster (ATIM, Ireland), facilitated by Technological University of the Shannon: Midlands Midwest (TUS)
- Scaberle AS (Norway)
- GreenTwin GmbH (Austria)
- Institute of Shipping Economics and Logistics (ISL, Germany)
- Fraunhofer Society e.V. (Germany)

Published by Latvian IT Cluster, EDIH news, 4 April 2024:

Latvijas IT klasteris uzsāk dalību ResC4EU projektā, kā mērķis ir stiprināt piegāžu ķēdes Eiropā

https://dih.lv/lv/jaunumi-un-pasakumi/jaunumi/latvijas-it-klasteris-uzsak-dalibu-resc4eu-projekta-ka-merkis-ir-stiprinat-piegazu-kesdes-eiropa?fbclid=IwZXh0bgNhZW0CMTAAR2ejKXWrCL-Qj8RY6EWktOkB-S7_WY6toI9Et5yYYqSms9qIloIkP7Qspo_aem_ZmFrZWRR1bW15MTZieXRlcw

Latvijas IT klasteris uzsāk dalību projektā "Noturīgas piegādes ķēdes Eiropai" (ResC4EU), ko finansē Eiropas Savienība ar 3 miljoniem eiro.

Šis vērienīgās trīs gadu iniciatīvas mērķis ir palīdzēt ES uzņēmumiem, jo īpaši mazajiem un vidējiem uzņēmumiem (MVU), kļūt noturīgākiem un ilgtspējīgākiem un spēt ātri pielāgoties piegādes ķēžu traucējumiem, piemēram, Covid-19 krīzes vai citu notiekošu konfliktu vai katastrofu (piemēram, Suecas kanāla slēgšanas, Ukrainas kara, plūdu) laikā, ieviešot jaunākās tehnoloģijas.

ResC4EU nodrošinās atvērtu telpu sadarbībai, izstrādās un nodrošinās modeļus un rīkus, kas var palīdzēt uzņēmumiem atklāt un paredzēt traucējumus to piegādes ķēdē, un piedāvās MVU pielāgotas atbalsta un apmācības programmas ResC4EU neto nulles līmeņa rūpniecības akadēmiju ietvaros. Vēl viens mērķis ir izpētīt sadarbības iespējas un veidot alianses starp tradicionālajiem ražošanas MVU, kuriem ir jāievieš progresīvas tehnoloģijas, un tehnoloģiju MVU, kas nodrošina inovatīvus risinājumus noturīgākiem un ilgtspējīgākiem procesiem.

ResC4EU stiprinās Eiropas piegādes ķēžu noturību Eiropas viskritiskākajās rūpniecības ekosistēmās: mobilitāte, transports un autobūve; mazumtirdzniecība; tuvuums un sociālā ekonomika; tekstilizstrādājumi; tūrisms; kosmiskā aviācija un aizsardzība; atjaunojamā enerģija; energoietilpīgas nozares, elektronika; digitālā nozare; būvniecība; lauksaimniecības pārtika; veselība; un radošās un kultūras nozares.

ResC4EU konsorcijs veido seši Eiropas nozaru klasteri, viens starpklasteru un inovācijas pārvaldības eksperts (MVU), viens tehnoloģiju MVU un divas pētniecības organizācijas, kas tieši sadarbojas ar līdz pat 1000 MVU visā Eiropā un aptver visas paredzētās 14 rūpnieciskās ekosistēmas. Projektu koordinēs Vācijas vadošais klasteris Composites United.

ResC4EU konsorcijs partneri:

- Composites United klasteris (CU, Germany)
- Ziemeļvācijas jūrniecības klasteris (MCN, Vācija)
- Latvijas IT klasteris (Latvija)
- AIDIMME (Spānija)
- Polijas kompozītmateriālu klasteris (PKTK, Polija)
- Jaunāko ražošanas tehnoloģiju klasteris (Īrija)
- Scaberia AS (Norvēģija)
- GreenTwin GmbH (Austrija)
- Kuģniecības ekonomikas un loģistikas institūts (Vācija)
- Fraunhofer biedrība (Vācija)

ResC4EU project at SMM 2024 in Hamburg.

<https://www.isl.org/en/resc4eu-project-smm-2024-hamburg>

ResC4EU project at SMM 2024 in Hamburg

The ISL project ResC4EU will be presented at SMM, the world's leading trade fair and conference for the maritime industry. The event will take place in Hamburg from 3 to 6 September 2024 and expects over 40,000 participants and around 2,000 exhibitors from more than 120 countries.

The ResC4EU project partners will be represented at the stand of the Maritime Cluster Northern Germany (MCN) in **Hall B6, Stand 154**. There will also be an opportunity to meet with consortium representatives during the "Blue Hour" on 5 September 2024 from 4 to 6 p.m. (Hall B6, Stand 146/154).

Registration for the "Blue Hour" (limited places): [Register here](#) →

ResC4EU: Resilient Supply Chains for Europe.

[Opening of the ResC4EU platform at this year's KOMPOZYT-EXPO® | ISL](#)

Opening of the ResC4EU platform at this year's KOMPOZYT-EXPO®

The Kompozyp Expo 2024, which takes place from 16 to 17 October in Krakow, Poland, is the leading trade fair for composites, technologies and products in Poland and Central Europe. The trade fair offers a platform for manufacturers, suppliers, processors and users of composite materials, where the latest trends and technologies in the industry will be presented.

The fair focuses on raw materials, machinery and tools as well as applications in various industries, including aerospace, automotive, wind energy, construction and sports.

The trade fair is an important platform for establishing business contacts and presenting innovations in the composites industry.

We are pleased to announce that Debarshee Bhardwaj and Sönke Maatsch from ISL, in collaboration with the Fraunhofer Institute for Casting, Composite and Processing Technology (IGCV), will present their first framework for an exciting resilience assessment model at the 3rd General Assembly during the opening of the ResC4EU platform on the 15th October.

This model is designed to support small and medium-sized enterprises (SMEs) by strengthening their preparedness for supply chain and transport disruptions. At the heart of the platform is the Resilience Assessment Score, a dynamic tool that evaluates whether a company's resilience is balanced or unbalanced and helps the organisation identify key vulnerabilities and operational risks.

Beyond these core features, the platform offers advanced tools such as multi-level supply chain visibility, which provides access to validated data across multiple supplier tiers. It also provides the ability to calculate Global Warming Potential (GWP), allowing companies to assess the environmental impact of their supply chains.

Thanks to this comprehensive approach, SMEs can make smarter and more informed decisions that increase their resilience while improving sustainability.

If you would like to be part of this exciting trade fair, you can register as a visitor free of charge via the link below on the Kompozyp Expo website.

Schnell Alternativen finden

Unternehmen sind in der Regel auf unterschiedliche Zulieferer angewiesen. Rohmaterialien oder Bauteile werden nicht selten über weite Strecken mit dem LKW, Zug oder Flugzeug transportiert. »Grundsätzlich ist es hilfreich, die eigenen Lieferketten gut zu kennen. Woher kommt mein Material und welche Wege muss es nehmen, um bei mir zu landen? Leider kommt es immer wieder vor, dass vor allem kleinere Unternehmen bankrottgehen, weil sie diesen Aspekt vernachlässigen und Lieferschwierigkeiten beziehungsweise -ausfälle im Krisenfall nicht ausgleichen können«, sagt Clemens Gonnermann, der am Fraunhofer IGCV zu Fragen der Digitalisierung und KI in der Produktion arbeitet. Im Rahmen des ResC4EU Projekts soll deshalb ein Wissensmodell entstehen, das Unternehmen einen genauen Überblick über ihre Lieferketten gibt und umfassende Risikobewertungen für potenzielle Unterbrechungen aufzeigt. Im Bedarfsfall gibt das digitale Werkzeug dann mithilfe eines Algorithmus individuelle Lösungen für Produktion, Transport sowie Lagerung an. »Das übergeordnete Ziel ist immer, dass die Produktion wie gewohnt weiter geht, ohne Produktionsstopp oder Kurzarbeit der Mitarbeitenden. Das reduziert nicht nur Kosten, sondern fördert auch die Kundenzufriedenheit und schafft erhebliche Wettbewerbsvorteile«, erklärt der Fraunhofer-Wissenschaftler.

Nachhaltigkeit im Blick

Ändert sich eine Lieferkette, hat das allerdings nicht nur Auswirkungen darauf, ob weiter produziert werden kann oder nicht. Auch die CO₂-Bilanz eines Produktes ändert sich. Gemeint sind damit nicht nur CO₂-Emissionen sondern auch Methanemissionen und weitere Einflussfaktoren. »Es lässt sich ein globaler Trend beobachten, bei dem Unternehmen immer stärker in die Pflicht genommen werden, transparent über ihre Treibhausgasemissionen Auskunft zu geben. Zudem werden diese zunehmend zu einem Wettbewerbsfaktor«, führt Aljoscha Hieronymus an, der am Fraunhofer IGCV im Themenbereich der Nachhaltigkeit arbeitet. Am naheliegendsten sei das beim Standort und Transport. »Ob ich mein Material regional beziehe oder es einfliegen lasse, hat einen Einfluss auf dessen ökologischen Fußabdruck.« Aber auch das Herstellungsverfahren als solches kann viel oder wenig Energie verbrauchen. Im Rahmen des EU-Projekts erarbeiten Gonnermann, Hieronymus und die Kolleg:innen daher nicht nur einheitliche Parameter für die Widerstandsfähigkeit von Lieferketten, sondern kategorisieren diese auch nach ihrem Energie- und Ressourcenverbrauch sowie ihrer Klimaauswirkung. »Wir werfen dabei zum Beispiel einen Blick auf die Energiemärkte in unterschiedlichen Ländern und schauen, ob der Strom dort aus erneuerbaren oder fossilen Quellen stammt. Das vereinfacht die Nachhaltigkeitsfrage für Unternehmen deutlich.«

CO₂-Bilanz am Beispiel von Carbon-Bauteilen

Gemeinsam mit der Abteilung für Nachhaltige Fabrikplanung und -betrieb am Fraunhofer IGCV untersuchen Clemens Gonnermann und sein Team exemplarisch die CO₂-Bilanz des Verbundwerkstoffs Carbon, der in der Luft- und Raumfahrt zum Einsatz kommt. Von der Produktion bis zum Recycling deckt das Fraunhofer IGCV dessen gesamte Wertschöpfungskette ab und berücksichtigt dabei auch die Ansprüche aus der Industrie. »Aufgrund unserer Expertise in der Forschungs- und Entwicklungsarbeit von Carbon-Composites, können wir auf umfangreiche Daten zurückgreifen. Für das ResC4EU-Projekt entwickeln wir auf dieser Basis Modelle, die unterschiedliche Fertigungsprozesse miteinander vergleichen und dabei ökologisch und ökonomisch bewerten«, erklärt Gonnermann. »Diese Berechnungen werden automatisiert und bieten dem Unternehmen im Bedarfsfall eine nachhaltige und wirtschaftlich sinnvolle Lösung.« Die Modellierungen dienen im zweiten Schritt als Blaupause für weitere technische Verfahren und Bauteile aus anderen Industrie-sektoren.

Der Krieg in der Ukraine, die COVID-19-Krise oder auch die Schließung des Suezkanals hatten jeweils schwere Versorgungsunterbrechungen zur Folge und stellten die Weltwirtschaft vor finanzielle und logistische Herausforderungen. Doch auch im Kleinen konnte man erst kürzlich an den Überschwemmungen in Süddeutschland sehen, was es bedeutet, wenn Lieferketten unterbrochen sind.

Um vor allem kleine und mittlere Unternehmen (KMUs) in Europa zu unterstützen derartigen Störungen widerstandsfähiger und nachhaltiger entgegenzutreten, hat das ResC4EU Konsortium das EU-Projekt & die Initiative ResC4EU (Resilient Supply Chains for Europe) ins Leben gerufen. Im Rahmen des Projektes arbeitet das Fraunhofer IGCV an der Entwicklung von Modellen und digitalen Werkzeugen, die Störungen in Produktionsprozessen schneller erkennen und beheben können. Das EU-Projekt wird mit drei Millionen Euro von der Europäischen Union gefördert wird und ist auf drei Jahre ausgelegt.

Die ResC4EU Initiative bietet Unterstützung für KMUs aus insgesamt 14 unterschiedlichen Industriesektoren an, darunter Luftfahrt-, Raumfahrt- und Verteidigung, zivile Sicherheit, Mobilität (Transport- und Automobilindustrie), Erneuerbare Energien, Elektronikindustrie, digitale Industrie, Baugewerbe, Textilindustrie, Agrar- und Lebensmittelsektor, Kultur- und Kreativwirtschaft, Gesundheitssektor, Sozialwirtschaft, Einzelhandel, und Tourismus.

Um diese Bandbreite abdecken zu können, besteht das ResC4EU Konsortium aus sechs der führenden europäischen Industrieverbände und -cluster mit direkten Zugang zu bis zu 1000 KMUs in ganz Europa. Außerdem gehören dem Konsortium zwei KMUs an, eine KMU für Cluster- und Innovationsmanagement und eine KMU für digitale B2B Plattformentwicklung und -management. Das Fraunhofer IGCV und das Institut für Seeverkehrswirtschaft und Logistik (ISL) vervollständigen das Konsortium als Forschungseinrichtungen. Koordiniert wird das EU-Projekt vom deutschen Industrieverband Composites United e.V. (CU).

Die einzelnen Partner des ResC4EU-Konsortiums sind:

- CU, Composites United e.V. (Deutschland) – Koordinator
- MCN, Maritimes Cluster Norddeutschland e.V. (Deutschland)
- UTC, Lettischer IT Cluster (Lettland), ein Europäisches Digitales Innovationszentrum (EDIH, European Digital Innovation Hub)
- AIDIMME (Spanien), Technologieinstitut und Verband innovativer Unternehmen
- PKTK, Polnisches Cluster für Verbundwerkstoffe (Polen), koordiniert von GoFar Sp. z o.o.
- ATIM Cluster, Irisches Cluster für fortschrittliche Technologien in der Fertigung (Irland), koordiniert von der Technischen Universität Shannon: Midlands Midwest (TUS)
- Scaberia AS (Norwegen)
- GreenTwin GmbH (Österreich)
- ISL, Institut für Seeverkehrswirtschaft und Logistik (Deutschland)
- Fraunhofer-Gesellschaft zur Förderung der angewandten Forschung e.V. (Deutschland)

Das ResC4EU Konsortium

Das ResC4EU Konsortium wird Modelle und Tools entwickeln und bereitstellen, die KMUs bei der Erkennung und Antizipation von Störungen in ihrer Lieferkette unterstützen können. Des Weiteren werden KMUs maßgeschneiderte Unterstützungs- und Schulungsprogramme angeboten. Darüber hinaus werden KMUs aus dem verarbeitenden Gewerbe, die fortschrittliche Technologien implementieren müssen, mit technisch versierten KMUs zusammengebracht, die innovativen Lösungen für widerstandsfähigere und nachhaltigere Produktionsprozesse und Lieferketten anbieten. Die Unterstützung durch das Konsortium beginnt mit einer Bewertung der Bedürfnisse, Risiken, Störungen, Herausforderungen und Möglichkeiten für KMUs.

Our cluster manager, [Caitriona Mordan](#) recently joined [Ronan Berry](#) on [Midlands 103](#) Taking Care of Business show to discuss the [ResC4EU](#) project.

The atim cluster is delighted to be a partner on this three-year [European Commission](#) funded initiative which aims to bolster the resilience and sustainability of EU businesses, particularly small and medium-sized enterprises (SMEs), in the face of supply chain disruptions like those witnessed during the COVID-19 crisis and ongoing conflicts or disasters such as the Suez Channel closure, Ukraine war, and floodings.

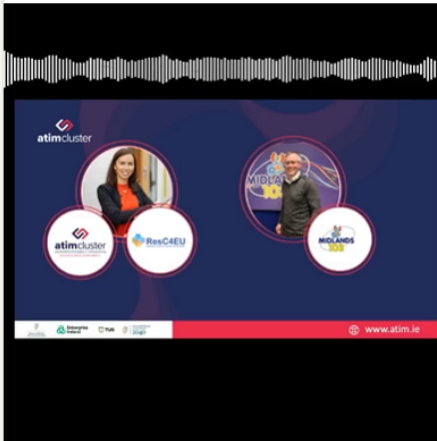

ResC4EU will serve as a collaborative platform, offering cutting-edge models and tools to help companies detect and anticipate disruptions in their supply chains. Our focus on SMEs includes tailored support and training programs through the ResC4EU Net-Zero Industry Academies. The project is dedicated to fostering alliances between manufacturing SMEs and technological solution providers to drive resilience and sustainability in industrial processes.

The consortium, led by [Composites United](#) e.V., comprises of six industry clusters, an intercluster and innovation management expert, and two research organisations. We will directly engage with up to 1000 SMEs across Europe, covering 14 critical industrial ecosystems.

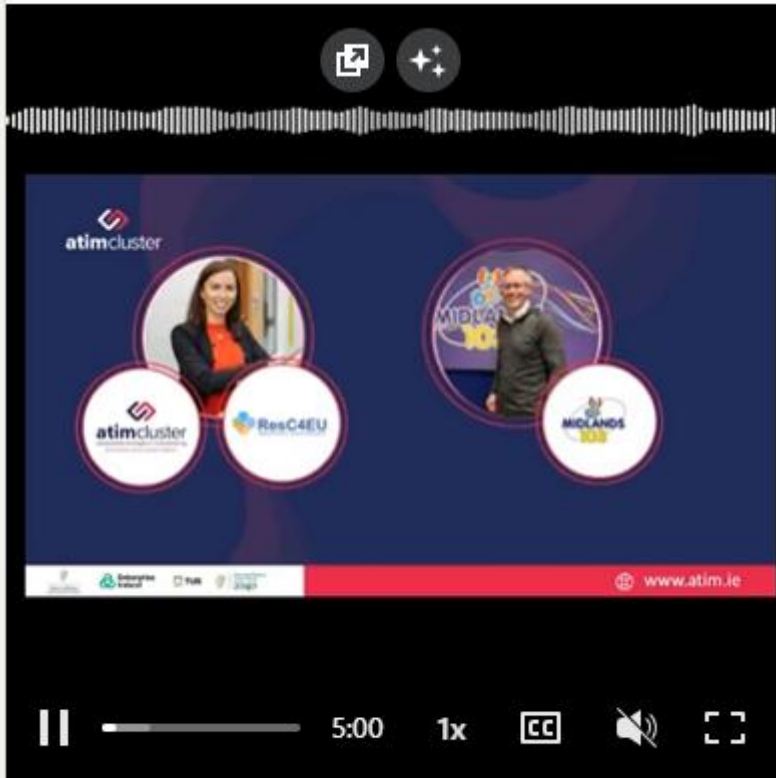

We are looking forward to representing the voice and needs of atim cluster members in this project and supporting them tackle their supply chain challenges and providing opportunities to network with partners and SMEs across Europe to support their needs.

Targi GLOBAL INDUSTRIE 2024

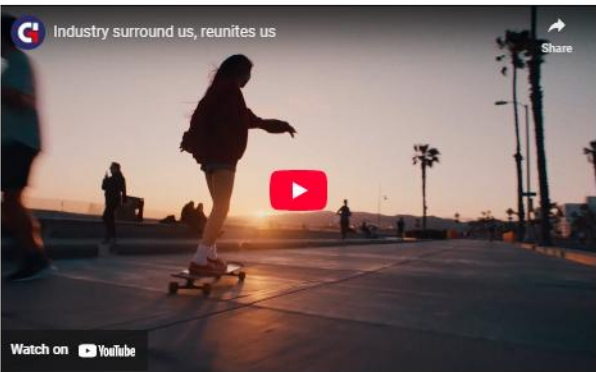

21 marca 2024 · Andrzej Czulak

Z ogromną przyjemnością zapraszamy do odwiedzenia naszego stoiska na prestiżowych targach GLOBAL INDUSTRIE International Trade Fair, które odbędą się w Paryżu od 25 marca 2024. To wyjątkowa okazja, aby spotkać się z liderami branży, wymienić doświadczenia i zainspirować się nowymi pomysłami!

Nasze stoisko *Polish Cluster of Composite Technologies / Polski Klaster Technologii Kompozytowych* będzie reprezentowane przez koordynatora klastra GoFar Marta Czulak, a wraz z nami będą nasi wspaniali członkowie: Instytut Badań i Rozwoju Motoryzacji BOSMAL sp. z o.o., Basalttech Sp. z o.o., Carbon Design Sp. z o.o., Łukasiewicz – Instytut Ceramiki i Materiałów Budowlanych BLEJKAN, Rymatex.

To wyjątkowa szansa, aby osobiście spotkać się z naszymi specjalistami, porozmawiać o najnowszych trendach i innowacjach w technologii kompozytowych oraz odkryć, jakie korzyści mogą one przynieść Państwa firmie.

Industry surround us, reunites us

Watch on YouTube

Targi GLOBAL INDUSTRIE 2024 to nie tylko przestrzeń do prowadzenia biznesu, ale również miejsce, gdzie wspólnie możemy inspirować się do działania na rzecz zielonej przyszłości całego sektora przemysłowego. To symbol zobowiązania do reindustrializacji, promocja innowacji oraz konkretne inicjatywy podejmowane razem, aby świadomie kształtować przyszłość.

Nie przegapcie tej wyjątkowej okazji, aby być częścią tego inspirującego wydarzenia. Czekamy na Państwa w Paryżu, aby razem budować sukces!

Bardzo dziękujemy PAIH za organizację tego wydarzenia.

Workshop, NOW Boostcamp – Seaway 7, Norway, Stavanger, Norway, 4 April 2024:

ResC4EU presentation by PKTK

<https://www.norwegianoffshorewind.no/events/boostcamp-norway>

The screenshot shows the Norwegian Offshore Wind website. At the top, there is a dark blue header with the company logo and name. Below this, a navigation bar shows '< All events'. The main content area features a large title 'Boostcamp Norway: The Seaway 7 Way' in white text on a dark blue background. Below this, a white card displays the event details: 'NOW Boostcamp - Seaway 7', the date 'Torsdag 4. april 2024' from '10:00 - 16:00', and the location 'Seaway 7, Kanalsletta 9, 4033 Stavanger, Norway'. A grey button with an information icon and the text 'Arrangementet er slutt' is also visible. Below the card, a section titled 'Om arrangementet' provides a description of the event, stating it is a practical one-day workshop where the hosting company shares perspectives on achieving and maintaining market success and how this translates into the selection of their suppliers. It also mentions that this quarterly event is about sharing knowledge and identifying best practices for building world-class supply chains, welcoming supply chain companies from both Norway and international markets, and providing them with valuable insight and connections.

GREENOFFSHORETECH Investor Round & Innovation Award Competition

📅 05.06.2024 10:00 Uhr – 06.06.2024 17:00 Uhr

📍 Digital Hub Logistics GmbH Am Sandtorkai 32 – 20457 Hamburg, Am Sandtorkai 32, 20457 Hamburg, Deutschland

🏢 MCN-Veranstaltung

On June 5th, the **Investor Round**, we want to allow all Phase 2 winners of the GreenOffshoreTech project to pitch their product, service, or idea to a broad audience. According to the pitching decks, we will also invite potential investors for this purpose. In addition, the investor round will be a good opportunity for networking with other relevant stakeholders. This event is the best opportunity to present your idea directly to investors who might support you, which means a great chance to receive financial support.

On June 6th, we will conduct the **Innovation Award Competition** which focuses on keynotes, networking, B2B, and a competition looking for the best product pitch. The best pitches will be awarded. A total of €40,000 is allocated for the competition, aimed at assisting the winning SMEs in advancing their prototypes towards market readiness.

National Conference, Zakopane, Poland, 13-16 Jun. 2024:

14th Conference of the Polish Ceramic Society

https://ptcer.pl/wp-content/uploads/2024/01/XIV_PTCer_2024.pdf

Polskie Towarzystwo Ceramiczne

Zarząd i Członkowie Polskiego Towarzystwa Ceramicznego
serdecznie zapraszają na

XIV Konferencję

**Polskiego Towarzystwa Ceramicznego
w dniach 13 - 16 czerwca 2024 w Zakopanem**

Szanowni Członkowie i Sympatycy Polskiego Towarzystwa Ceramicznego,

Kontynuując tradycję naszych zakopiańskich spotkań zapraszamy do aktywnego uczestnictwa w kolejnej edycji konferencji PTCer. Staramy się aby to wydarzenie efektywnie integrowało środowisko naukowców i technologów. Zależy nam na zbalansowanym udziale ceramików na każdym stopniu wtajemniczenia oraz ich integracji.

Chcielibyśmy, w szczególny sposób zaprosić na konferencję młodych naukowców i doktorantów, dla których planujemy wprowadzenie konkursu na najlepszą prezentację. Przewidujemy sesje panelowe połączone z moderowaną dyskusją, poświęcone konkretnym zagadnieniom oraz sesji posterowych. Planujemy również warsztaty dotyczące nowoczesnej aparatury pomiarowej, które przeprowadzą specjaliści producentów. Ze względu na krótki okres przygotowań do konferencji prosimy o sprawne podejmowanie decyzji o uczestnictwie i deklaracje do końca kwietnia.

Serdecznie zapraszam do uczestnictwa oraz przekazania dalej informacji o tym wydarzeniu.

Do zobaczenia w Zakopanem ☺

*Prezes Polskiego Towarzystwa Ceramicznego
prof. dr hab. inż. Zbigniew Pędzich*

Członkowie **Polish Cluster of Composite Technologies / Polski Klastar Technologii Kompozytowych** przypominam, iż kolejne spotkanie Członków PKTK odbędzie się 20 czerwca 2024 w Rymanowie **Rymatex**. u naszego Partnera, który objął ZŁOTYM PATRONATEM to wydarzenie.

W ramach tego spotkania zaprosimy Państwa do udziału w projekcie **ResC4EU**. **ResC4EU** to projekt współpracy i inicjatywa finansowana przez **European Union** w wysokości 3 milionów euro. Ma on na celu wspieranie unijnych przedsiębiorstw, w szczególności małych i średnich przedsiębiorstw (MŚP), w zwiększaniu ich odporności i zrównoważonego rozwoju oraz w szybkim dostosowywaniu się do zakłóceń w łańcuchu dostaw, takich jak kryzys COVID-19, napięcia geopolityczne lub katastrofy (np. zamknięcie Kanału Sueskiego, powodzie, strajki) poprzez wdrażanie zaawansowanych technologii. **ResC4EU** zapewni otwartą przestrzeń do współpracy ułatwioną przez stowarzyszenia branżowe i klastry, opracuje i dostarczy narzędzia cyfrowe, które mogą pomóc MŚP w wykrywaniu i przewidywaniu zakłóceń w ich łańcuchach dostaw oraz oferowaniu MŚP dostosowanego wsparcia i programów szkoleniowych. Co więcej, MŚP produkcyjne potrzebujące wdrożenia zaawansowanych technologii zostaną połączone z MŚP znajdującymi się na technologii i dostarczającymi innowacyjne rozwiązania.

Strona projektu www.resc4eu.com

Zostało jeszcze kilka wolnych miejsc. Zainteresowane podmioty proszę o wiadomość.
Szczególne podziękowania dla **Robert Szalajko**

On June 20, 2024, members of the Polish Cluster of Composite Technologies / Polski Klastar Technologii Kompozytowych gathered at Rymatex. in Rymanów for an insightful meeting. Huge thanks to Rymatex. for hosting and providing a fantastic factory tour. During the event, we presented the latest Cluster activities and discussed the **#Resc4eu** project, which supports EU SMEs in becoming more resilient and sustainable through advanced technologies. Over 30 Cluster members attended, with presentations from Rymatex. (thanks Robert Szalajko), Amargo® TANK Think Tank (Szczepan Gorbacz) @RAE Sp. z o. o. (Ariel Stępień), POLiner Sp. z o.o. (@Tomasz Goździor, Michał Milczarek), and CWP ITWL Sp. z o.o.. The evening concluded with a delightful dinner, lively discussions, and regional music. 🎵

20 czerwca 2024 roku członkowie Polskiego Klastra Technologii Kompozytowych zebrali się w Rymanowie w firmie Rymatex na inspirującym spotkaniu. Ogromne podziękowania dla Rymatex za gościnność i wspaniałą prezentację fabryki. Podczas wydarzenia zaprezentowaliśmy najnowsze aktywności Klastra oraz omówiliśmy projekt **#Resc4eu**, który wspiera MŚP z UE w zwiększaniu odporności i zrównoważonego rozwoju dzięki zaawansowanym technologiom. W spotkaniu wzięło udział ponad 30 członków Klastra, z prezentacjami od Rymatex (dziękujemy Robertowi Szalajko), Amargo® TANK Think Tank (Szczepan Gorbacz), RAE Sp. z o.o. (Ariel Stępień), Poliner Sp. z o.o. (Tomasz Goździor, Michał Milczarek) oraz CWP ITWL Sp. z o.o. Wieczorem odbyła się kolacja z rozmowami w kulisach i muzyką regionalną. 🎵

BLOG ABOUT CLUSTERS

Professionals4Ukraine week 2024 – report

Yurchak Alexandre • 03.09.2024

Report on Events from August 26-29 in Lviv and Kyiv

The events held from August 26 to 29 as part of the ClusterINT UCA project marked a significant milestone in developing the internationalization program for Ukrainian clusters. More than ten visits to organizations in two regions, four roundtables, and two mini-conferences took place, featuring numerous exchanges and discussions. This was the first time such a large-scale exchange occurred in Ukrainian clusters between Ukraine and the EU cluster communities. This report details the exchanges and the initial results of this study tour of foreign ambassadors.

About the Professionals4Ukraine program and the ambassadors who participated in the August events

Alexandre Yurchak • 2nd
Head of Ukrainian Cluster Allian...
7mo • Edited •

The 4-day series of **#Professionals4Ukraine** program came to the end yesterday. Photos from Lviv and Kyiv well convey this warm atmosphere of cluster meetings. Altogether, during these days, we had 11 visits to UA enterprises, public bodies, clusters, innovation parks, and EDIHs; 4 round tables; 2 mini-conferences, and still unforgettable warm evenings. There will still be detailed reporting, but it is already clear that

- 1) We have significantly modified the perception of many of our foreign colleagues about what is happening in Ukraine. Yes, it's not so easy waking up at 4:00 a.m. from another air alarm. However, this is not the main message broadcast by Western media. **Geru Marius**, who visited Ukraine for the first time during the war, says - "What our media shows about Ukraine is completely different from what we see here in reality. Your motivation, energy, and innovation spirit are really impressive, and it inspires us"
- 2) Such meetings are needed regularly, and not just to get the truth about reality in Ukraine. "What should cooperation between Ukrainian and European businesses and clusters look like?" - was a key question in many meetings. And there are no simple answers to this question. But what we managed to do was to build or consolidate our relations. It all starts with trust.
- 3) One of the key appeals to Ukrainian and European stakeholders is the crucial need for med-long term support programs of our collaboration. The **European Commission** is already doing a lot for this, but we still lack target programs to support cluster cooperation for 3-5 years. Therefore, we eagerly anticipate the Facility plan for Ukraine, which will be in the fall. We are preparing our projects and programs for the **#RebuildUkraine** Warsaw conference on November, and we need your continued support.

Many thanks to all our ambassadors and numerous partners who took part in **#Professionals4Ukraine** events. I am looking forward to new meetings, and let's continue to build a new agenda for the Recovery of Ukraine.

Loïc MARIN Geru Marius Daniel Cosnita Mike RICHARDSON Florian Andrews Andrzej Czulak Anna Pobol @Adrian Jasik Tereza Šamanová Olga Millward @Tomas Kubala Luigi De Bernardini Kuba Boratyński Marek Przeor Martine Diss

Rückblick: Das Maritime Cluster Norddeutschland auf der SMM 2024

Die SMM 2024, die weltweit führende Fachmesse der maritimen Wirtschaft, zog vom 3. bis 6. September 2.200 Aussteller und über 48.000 Teilnehmende aus mehr als 100 Ländern nach Hamburg. Für das Maritime Cluster Norddeutschland (MCN) bot die Messe eine hervorragende Gelegenheit, seine Projekte und Aktivitäten zu präsentieren, wertvolle Kontakte zu knüpfen und entscheidende Impulse für die Zukunft der Branche zu setzen.

Wir danken allen Beteiligten und freuen uns bereits auf die nächste SMM!

The **Maritimes Cluster Norddeutschland e. V.** will be at the SMM exhibition in Hamburg from 3-6 September. One of our maritime topics is the EU funded project **ResC4EU**. Aim of the project is to help companies to become resilient regarding supply chain disruptions. Do you want to find out more? Then visit us at booth 154 in hall B6.

📅 17.09.2024 09:30 Uhr – 18.09.2024 16:30 Uhr
📍 mehrere Veranstaltungsorte in Rostock
🔗 MCN-Veranstaltung

Unter dem Motto „Aus der Praxis – für die Praxis“ erhalten Teilnehmende beim Kompaktseminar des Maritimen Clusters Norddeutschland (MCN) spannende Einblicke in die maritime Welt. Unsere Kooperationspartner [Liebherr-MCCtec Rostock GmbH](#), [Fraunhofer-Institut für Großstrukturen in der Produktionstechnik \(IGP\)](#) und [TAMSEN MARITIM GmbH](#) lassen sich an den zwei Schultagungen live über die Schulter schauen. So haben die Teilnehmenden die Möglichkeit, Einblicke in die Produktion maritimer Krane, den Bau und die Instandsetzung von Schiffen sowie in die maritime Forschung zu erlangen.

Zielgruppe: Die Veranstaltung richtet sich an Interessierte aus allen Hierarchieebenen der Unternehmen, die in der maritimen Branche beheimatet oder tätig sind und wichtige Grundkenntnisse erlangen oder ausbauen möchten. Insbesondere Quereinsteiger und Akteure der maritimen Zulieferindustrie können ihr Wissen und allgemeines Verständnis der komplexen maritimen Welt ausbauen.

Hochkarätige Expertinnen direkt aus der maritimen Industrie und Wirtschaft vermitteln wichtige Kenntnisse aus ihrem Tagesgeschäft, den dazugehörigen Jobs und Herausforderungen, sowie Informationen zu den Besonderheiten der maritimen Welt. Neben der leicht verständlichen Vermittlung von Grundlagenwissen lässt das Seminar viel Raum für interessantes Netzwerken in maritimer Atmosphäre.

EDIH Workshop: KICKSTART Digitalisation Training

<https://dih.lv/lv/kickstart>

<https://www.kickstart.lv/kalendars>

**Digitalizācijas treniņš
“Kickstart”**

Laiks: 2024. gada 26. septembrī plkst 10:00 – 15:00
Norises vieta: Ogres LIAA pārstāvniecība, Brīvības iela 32, Ogre, Ogres novads, LV-5001

“Izlaidums”
2024. gada 26. septembrī

09:45 – 10:00	Ierašanās, reģistrācija
10:00 – 10:20	Iesildīšanās darbs komandās (“Varoņa ceļojums”)
10:20 – 12:00	Dalībnieku noslēguma prezentācijas (1. daļa) <ul style="list-style-type: none"> Noslēguma prezentācijas ilgums: 10 min Ekspertu atgriezeniskā saite: 8 min
12:00 – 12:20	Kafijas pauze
12:20 – 13:40	Dalībnieku noslēguma prezentācijas (2. daļa) <ul style="list-style-type: none"> Noslēguma prezentācijas ilgums: 10 min Ekspertu atgriezeniskā saite: 8 min
13:40 – 14:30	Apliecinājumu pasniegšana un pasākuma izvērtējums
14:30 – 14:40	Izaugsmes iespējas: ResC4EU prezentācija (Inese Mūrmiece, Latvijas IT klasteris)
14:40 – 15:00	Neformālā daļa (“brīvais mikrofons”)

Kickstart ir mācību treniņa programma, lai ieraudzītu nozīmīgākos virzienus uzņēmuma digitalizācijai un tos izvērtētu. Tā ir iespēja nākotnē pārliecinoties, ka pretendēt uz finanšu atbalsta instrumentiem, grantiem un lielākām atbalsta programmām, kas pieejamas no Atveseļošanās fonda līdzekļiem. Neformālā atmosfērā notiekošā pasākumā uzņēmējiem ir iespēja dzirdēt un redzēt vērtīgu pieredzi vai mūsdienīgus risinājumus, kā arī paskatīties uz savu uzņēmumu no cita skatu punkta.

Apmācību moderatori: Aleksandrs Ļubinskis, Cēsu Digitālā centra vadītāja vietnieks
Vita Brakovska, biedrības “Zināšanu un inovācijas sabiedrība” (ZINIS) vadītāja

ABOUT THE FAIR FOR EXHIBITORS

KOMPOZYT-EXPO® 2024

KOMPOZYT-EXPO® attracts new projects

The event included the final of the AMULET project and the **launch of the ResC4EU platform.**

Several international clusters, consortia, and associations attended, including Composites United e.V., the Polish Cluster of Composite Materials, the Latvian Information Technology Cluster, the European Digital Innovation Hub, and the Bydgoszcz Industrial Cluster – Tool Valley.

As is tradition, the “Science for Industry” booth presented R&D collaboration opportunities with participation from AGH University of Science and Technology in Krakow, the Technology Transfer Center of the Krakow University of Technology, the Central Mining Institute - National Research Institute, Lodz University of Technology, Silesian University of Technology, Warsaw University of Technology, Wrocław University of Science and Technology, and the West Pomeranian University of Technology in Szczecin.

Several student science clubs also presented innovative projects, including a hydrogen-powered car, a solar-powered boat, racing cars, and motorcycles.

Technologietage Leichtbau

<https://www.iec>

<https://composites-united.com/leichtbau-als-schlüssel-zur-nachhaltigen-transformation/>

Von Visionen zu Lösungen: Der Technologietag Leichtbau 2024 in Stuttgart – eine Plattform für Innovation und Fortschritt

Stuttgart | 13.11.2024 Der Technologietag Leichtbau 2024, der am 6. November am Fraunhofer-Institut für Produktionstechnik und Automatisierung IPA in Stuttgart stattfand, zeigte eindrucksvoll das Potenzial und die Innovationskraft des Leichtbaus in Baden-Württemberg. Mit mehr als 85 Teilnehmenden und 25 hochkarätigen Vorträgen diente die Veranstaltung als Treffpunkt für Fachleute aus Industrie und Forschung, um neueste Technologien zu diskutieren und kooperative Ansätze auszubauen.

Die treibende Kraft des Leichtbaus in Baden-Württemberg

Prof. Markus Milwich, Repräsentant der Leichtbau-Allianz Baden-Württemberg, begrüßte die Gäste beim Gastgeber Fraunhofer IPA in Stuttgart und stellte die Leichtbau-Allianz BW vor / Bild: Leichtbau-Allianz Baden-Württemberg

Der Technologietag Leichtbau unterstrich die Bedeutung Baden-Württembergs als innovatives Zentrum für Leichtbau-Technologien. Gemäß dem Motto der Leichtbau-Allianz BW „Gemeinsam leichter voran“ betonte auch Wirtschaftsministerin Dr. Nicole Hoffmeister-Kraut in ihrer Videobotschaft die Wichtigkeit der Kooperation für nachhaltige Fortschritte und die Stärkung der regionalen Wirtschaft in der Leichtbau-Branche, um Standards für eine nachhaltige Transformation zu setzen.

„Wir als Leichtbau-Allianz Baden-Württemberg sind fest entschlossen, die Bedeutung der Leichtbautechnologien als unverzichtbaren Bestandteil der modernen Industrie zu festigen. Unsere Aktivitäten als Allianz, bestehend aus den drei großen Leichtbauvereinen aus Baden-Württemberg: AFBW, CU BW des Composites United e.V. und LBZ-BW, zielen darauf ab, durch innovative Kooperationen und die Förderung von Forschung und Entwicklung, den Leichtbau als Schlüsseltechnologie für nachhaltiges Wirtschaften und ökologische Verantwortung weiter zu etablieren stellte Prof. Markus Milwich, Repräsentant der Leichtbau-Allianz BW, die Aufgaben der Leichtbau-Allianz vor und bedankte sich beim Ministerium für Wirtschaft, Arbeit und Tourismus sowie dem Ministerium für Wissenschaft, Forschung und Kunst Baden-Württemberg für die Förderung.

Zaproszenie

Mamy ogromną przyjemność zaprosić Państwa do udziału w wydarzeniu poświęconemu sytuacji, roli i rozwojowi klastrów, jakim jest 10 Kongres Kłastrów Polskich, który odbędzie się w dniach

6-7 listopada 2024 r. w Białymstoku.

Związek Pracodawców Klastry Polskie, reprezentujący ponad 40 klastrów i inicjatyw klastrowych zrzeszających firmy, reprezentujące branże innowacyjne z terenu całej Polski, nieprzerwanie od 2013 roku organizuje wydarzenia z cyklu Kongres Kłastrów Polskich. Celem wydarzenia jest m.in. omówienie aktualnych trendów w polityce klastrowej i stymulowanie dyskusji na wysokim szczeblu na temat wyzwań i potrzeb, którymi należy się zająć, lepiej wykorzystując klastry.

Fakt, że przed nami już 10 edycja Kongresu - tegoroczne wydarzenie stanowi również doskonałą okazję, by spojrzeć wstecz na historię i osiągnięcia klastrów, ocenić ich obecny stan i omówić przyszłe kierunki rozwoju. Chcemy zaprezentować

🇵🇱 #LIMACON 2024 - Poland at the Forefront of Modern Composite Solutions for Hydrogen! ⚡

Polish Composite Technologies Cluster had the honour to participate in and co-organize the #LIMACON conference, organized by Bialystok University of Technology in cooperation with the Marshal's Office of the Podlaskie Voivodeship, as well as key Polish clusters: Evoluma, Polish Construction Cluster and the Polish Society of Theoretical and Applied Mechanics. It was a unique event exploring innovation and the future of hydrogen and composites.

🗨 During the first discussion panel, we explored the subject of composites in hydrogen storage and distribution. Thanks to the lightweight, durable and efficient design of composite-based systems, hydrogen is becoming an increasingly viable energy source that has the potential to revolutionise Europe. Our experts discussed challenges – from high production costs to limited infrastructure – and solutions to drive the future of sustainable energy.

🔍 The panel devoted to the role of hydrogen in the development of the Podlaskie Voivodeship was a space for innovation, opportunities and risk analysis. It was a unique opportunity to learn how composite technologies can shape the region's energy future, increasing efficiency and safety, and building a resilient infrastructure for hydrogen. We would like to thank the organizers (especially: [Dariusz Perkowski](#) [Izabela Zgłobicka](#), [Białystok University of Technology](#), [Evoluma](#) [Klaster Przemysłowy](#), [dawniej Klaster Obróbki Metali](#)) and participants for their active participation and inspiring conversations! Together, we are shaping a future that can make hydrogen one of the pillars of Europe's energy transition.

We also had the opportunity to present the activities of [Polish Cluster of Composite Technologies / Polski Klaster Technologii Kompozytowych](#) and the projects implemented in this [ResC4EU](#)

MCN meets Ocean Technologies@Fraunhofer

📅 07.11.2024 17:00 Uhr – 07.11.2024 20:00 Uhr

📍 Studio 301, Alter Hafen Nord 301, 18069 Rostock

🏢 Kooperationsveranstaltungen | MCN-Veranstaltung

Fraunhofer ist ein international führender Partner für innovative Technologien in der Meerestechnik. Zusammen mit zahlreichen Fraunhofer-Instituten beleuchten wir spannende Themenfelder von Sensorik über Messtechnik bis hin zu Testfeldern und vielem mehr. Ziel der Veranstaltung ist es, mit der breiten Palette der kompetenten Ansprechpartner in den gegenseitigen Austausch zu kommen und mögliche Synergien und Kooperationsfelder zu erschließen.

Hierzu planen wir zusammen mit dem Fraunhofer einen Wettbewerb, bei dem verschiedene Institute der Fraunhofer-Gesellschaft ihre Expertise aus folgenden Bereichen und Querschnittsthemen vorstellen:

- Unterwasser-Lasermessung
- Sensorhüllen für Offshore-Strukturen
- Unterwasser-Beschichtungsroboter
- Unterwasser-Fischbeobachtungsstation für nicht-invasive Überwachung
- Autonomiefähigkeit für mobile Robotersysteme
- Halbautomatisches Peilsystem für die präzise
- Vermessung und Kartierung
- uvm.

Zusammen mit Ihnen werden die besten Präsentationen ausgewählt und prämiert. Im Anschluss steht der gemeinsame Austausch im Fokus.

Neue maritime Risiken - den Herausforderungen begegnen: Störung von Onboard-Navigationssystemen

📅 20.11.2024 11:00 Uhr – 20.11.2024 16:30 Uhr

📍 Technologie- und Gewerbezentrum e. V. Schwerin/Wismar, Konferenzraum, Alter Holzhafen 19, 23966 Wismar

👥 FG Maritime IKT | FG Maritime Sicherheit | FG Maritime Wirtschaft Offshore Wind | MCN-Veranstaltung

Die Fachgruppe Maritime Sicherheit lädt herzlich zum Auftakt ihrer neuen Veranstaltungsreihe „**Neue Maritime Risiken – den Herausforderungen begegnen**“ am **20. November 2024 nach Wismar** ein.

Die aktuelle Weltlage ist geprägt von einer ganzen Reihe von unterschiedlichen Problemen und Herausforderungen. Neben klimatologischen Veränderungen stellen sich u. a. Fragen zur zukünftigen Energieversorgung oder zu neuen geopolitischen Bedrohungen. Hier wird deutlich, dass damit auch Fragen zur maritimen Sicherheit in den Fokus rücken. Diese adressieren z. B. die Aufrechterhaltung eines sicheren Schiffsbetriebes, das Funktionieren globaler Handelsketten oder den Aufbau von neuen Energiesystemen im Meer.

Die neue Veranstaltungsreihe der MCN-Fachgruppe Maritime Sicherheit nimmt sich dieses Themas an. In unserer ersten Veranstaltung werden wir uns unter dem Titel „**Störung von Onboard-Navigationssystemen**“ mit der bewussten Störung oder Manipulation von Signalen globaler Satellitennavigationssysteme (GNSS) und deren Konsequenzen für die maritime Navigation beschäftigen.

Hintergrund: Seit Ende Dezember 2023 gibt es nachweisbare Belege dafür, dass im baltischen Raum immer wieder massive Störungen von GNSS durch Jamming auftreten. Dies betrifft große Teile des nordöstlichen Polens, Teile Finnlands, der baltischen Staaten sowie dem Südwesten der Ostsee – bis hinein nach Mecklenburg-Vorpommern.

In der Veranstaltung werden Expertinnen und Experten aus der Wirtschaft, von Behörden und aus der Forschung aufzeigen, was genau sich hinter Jamming & Spoofing verbirgt, wie man beides detektieren kann und welche Anforderungen an die zugelassene Navigationsausrüstung gestellt werden.

Ziel ist aufzuzeigen, wie sich Anwender/Nutzer auf Jamming/Spoofing vorbereiten können, welche technischen Lösungen die Industrie parat hat und was die Forschung an Gegenmaßnahmen für die Zukunft zu bieten kann.

Das genaue Programm finden Sie im Downloadbereich.

Polski i niemiecki z tłumaczeniem
równoległym
Udział w konferencji jest bezpłatny.

Polsko-Niemiecka Izba Przemysłowo-Handlowa (AHK Polska) zaprasza do udziału w konferencji „Biometan i zielony wodór – produkcja i zastosowanie. Rynek polski i w niemiecki”.

Konferencję organizuje Polsko-Niemiecka Izba Przemysłowo-Handlowa we współpracy z firmą eclareon GmbH oraz Izbą Gospodarczą Biogazu i Biometanu w ramach projektu Niemieckiego Federalnego Ministerstwa Gospodarki i Ochrony Klimatu.

Celem konferencji jest prezentacja niemieckiego rynku zielonych gazów, w szczególności biogazu, biometanu i zielonego wodoru i stosowanych tam technologii oraz rozważenie możliwości współpracy w tym obszarze firm polskich i niemieckich jak i omówienie kierunków rozwoju tego sektora w Polsce. Wykłady w trakcie konferencji będą wygłaszane przez specjalistów z Polski i z Niemiec. Ponadto podczas konferencji swoją działalność zaprezentują firmy niemieckie z branży, zainteresowane nawiązaniem kontaktów na rynku polskim.

Zachęcamy do zapoznania się [z programem](#) konferencji*

Do udziału zapraszamy firmy z branży, instytucje publiczne, prasę oraz wszelkie inne podmioty zainteresowane tą tematyką.

*Organizator zastrzega sobie prawo dokonywania zmian w programie konferencji.

BIOMETAN I ZIELONY WODÓR – PRODUKCJA I ZASTOSOWANIE RYNEK POLSKI I NIEMIECKI

03.12.2024

SALA OLIMP

Program konferencji *

Moderacja: eclareon / AHK Polska

09:00 - 09:30	Rejestracja uczestników
09:30 - 09:45	Otwarcie Lars Guthel, Dyrektor Generalny, Polsko-Niemiecka Izba Przemysłowo-Handlowa
09:45 - 09:50	Energiewende made in Germany - wprowadzenie Philip Bergforth, eclareon na zlecenie Inicjatywy Exportowej Niemieckiego Ministerstwa Gospodarki i Ochrony Klimatu
09:50 - 10:10	Rynek biometanu w Niemczech i UE - szanse, ryzyka i perspektywy Frank Hofmann, Fachverband Biogas
10:10 - 10:15	Q&A
10:15 - 10:35	Rządowe ramy wsparcia zielonych gazów w Polsce Miłosz Motyka, Podsekretarz stanu, Ministerstwo Klimatu i Środowiska (tbc)
10:35 - 10:40	Q&A
10:40 - 11:10	Prezentacje firm niemieckich Ilak Luka, Wegscheid Entrenco GmbH, "Elektrownie na biomasę z jednostkami kogeneracyjnymi (CHP) z odpadów biogenicznych (zrębki drzewne, pellety drzewne i brykiety)" Michael Kraftzig, OekoBit GmbH, "Inteligentne i elastyczne pod względem substratu instalacje biogazu i biometanu" Alfredi Anagnostaki, HeGo Biotec International GmbH, "Substancje do oczyszczania ścieków i gazów oraz reagenty do odsiarczania biogazu powstającego w procesach fermentacji beztlenowej"
11:10 - 11:15	Q&A
11:15 - 11:35	Perspektywy rozwoju rynku biogazu i biometanu w Polsce Marcin Białek, Członek Komitetu, Komitet Organizacyjny Izby Gospodarczej Biogazu i Biometanu
11:35 - 12:05	Q&A
12:05 - 12:30	Przerwa kawowa
12:30 - 12:50	Certyfikacja zrównoważonego rozwoju biometanu i wodoru ze źródeł biogennych Peter Jürgens, Prezes, Sustainable Resources Verification Scheme GmbH
12:50 - 12:55	Q&A
12:55 - 13:25	Prezentacje firm niemieckich Hans-Peter Schmid, WS Reformer GmbH, "X-to-Hydrogen. Technologie zdecentralizowanej produkcji wodoru i gazu syntezowego" Jakob Fenzl, Quest One GmbH, "Zielony wodór i elektroliza PEM" Daniel Neumann, FEV Group, "Rozwiązania łączące w sieć i całokształt optymalizujące wytwarzanie energii i ciepła, mobilność i przemysł oraz magazynowanie, transport i wykorzystanie oze w tym zielonego wodoru"
13:25 - 13:30	Q&A
13:30 - 13:50	Perspektywy rozwoju rynku technologii wodorowych w Polsce Andrzej Czulaś, Małopolskie Centrum Innowacyjnych Technologii Przechowywania i Transportu Wodoru
13:50 - 13:55	Q&A
13:55 - 14:15	Fundusze z programów krajowych i unijnych na realizację projektów w sektorze zielonych gazów Zanna Białek, Kierownik, Wydział Innowacji, NFOŚiGW
14:15 - 14:20	Q&A&Podsumowanie
14:20 - 15:30	Rozmowy bilateralne przy lunchu

Partnerat:    

Politechnika Krakowska dołączyła do grona Patronów Honorowych konferencji MAŁOPOLSKA H2 CO₂nnect, która odbędzie się 16 grudnia 2024 roku w Krakowie. Wydarzenie to skupia się na kluczowych aspektach rozwoju technologii wodorowych, łącząc naukę z przemysłem. Patronat uczelni podkreśla jej zaangażowanie w rozwój innowacji i technologii wspierających transformację energetyczną.

Jednym z prelegentów konferencji będzie dr Gabriela Berkowicz-Płatek z Politechniki Krakowskiej, która przedstawi temat alternatywnych rozwiązań do produkcji wodoru z wykorzystaniem katalitycznych źródeł fluidalnych. Wystąpienie to wpisuje się w główny nurt konferencji, koncentrujący się na synergii nauki i przemysłu oraz praktycznych zastosowaniach wodoru w sektorze wysokoenergetycznym i gazowniczym.

Konferencja MAŁOPOLSKA H2 CO₂nnect odbędzie się w Hotelu Qubus Kraków i zgromadzi przedstawicieli nauki, przemysłu oraz władz regionalnych, w tym reprezentantów Politechniki Krakowskiej, AGH, Sieci Badawczej Łukasiewicz, a także ekspertów z kraju i zagranicy. Wydarzenie ma na celu stworzenie przestrzeni do wymiany wiedzy i doświadczeń, które przyczynią się do rozwoju gospodarki wodorowej w Polsce.

Obecność Politechniki Krakowskiej jako Patrona Honorowego świadczy o jej znaczącej roli w kształtowaniu innowacyjnych rozwiązań w dziedzinie technologii wodorowych oraz wspieraniu rozwoju regionu Małopolski jako lidera transformacji energetycznej.

European Workshop, MARESEC 2024, online webinar, 6-7 Jun. 2024:

Presentation on “Resilience of Maritime Transport Chains – The Logistics perspective” by ISL

<https://www.isl.org/en/isl-participated-presentation-maresec-2024>

<https://dlr.expert/overview/error/index.php>

ISL participated with a presentation at MARESEC 2024

The 4th European Workshop on Maritime Systems Resilience and Security (MARESEC 2024) took place in Bremerhaven from 6 to 7 June 2024. The event brought experts and researchers from various disciplines together to explore and discuss resilience, security, technology and the associated ethical, legal and social aspects (ELSA) in a maritime context.

The workshop covered a wide range of topics, including offshore and onshore infrastructures, navigation and shipping as well as autonomous systems. The aim was to present new research findings and ongoing projects, share valuable experiences and explore potential collaborations.

One highlight was the keynote speech by Prof Dr Frank Arendt, Institute of Shipping Economics and Logistics. On 6 June, he spoke about “Resilience of Maritime Transport Chains - The Logistics Perspective”, highlighting the challenges and solutions from a logistical and economic perspective.

Overall, the event was a great success and provided a valuable opportunity for researchers and experts to discuss the latest developments and challenges in the field of maritime systems and develop joint solutions.

5mo • Edited •

We are excited to announce our Webinar WCTRS-SIGB1 on the cutting-edge ResC4EU Resilience Assessment model on the World Conference on Transport Research Society (WCTRS)! This is a unique opportunity to explore the model that empower Small and Medium-sized Enterprises (SMEs) to enhance resilience against supply chain disruptions and assess vulnerabilities.

- World Conference on Transport Research Society (WCTRS) - WCTRS SIGB1 Webinar
- Announcement and Presentation of the ResC4EU Resilience Assessment model for Small and Medium-sized Enterprises (SMEs)
- Date: Tuesday, November 5, 2024
- Time: 09:30 – 11:00 CET (UTC+1)
- Zoom Link: <https://shorturl.at/Mm2qu>
- Meeting ID: 81477323797
- Password: 773123

What to Expect :
This interactive session will introduce the model that provides SMEs a self-assessment to measures the resilience through a comprehensive Resilience Assessment Score. This Score highlights whether the firm's resilience is balanced or unbalanced, helping to identify areas for improvement. The model also provides insights into critical vulnerabilities and offers targeted capability recommendations, including multi-tier supply chain visibility and environmental impact metrics.

Featured Speaker:
Debarshee Bhardwaj, an esteemed supply chain professional and researcher at the Institute of Shipping Economics and Logistics (ISL) with experience across academia and industry, will share his expertise on this innovative model designed to prepare SMEs for future challenges. He holds a Ph.D. from Universität Bremen, a Master of Science in Supply Chain Engineering from Jacobs University, Bremen and a B.Eng. in Mechanical Engineering from Gauhati University.
